Browsing Tips

- You can browse the catalog by selecting a **product category, supplier name** or **page number** in the bookmark window. Your location in the bookmark structure is marked in blue. To get a larger view of the page, click the bookmark window icon to close the bookmark pane or use the magnifying glass on your tool bar to make the page bigger. Click the bookmark window icon to show the bookmark pane when you are done viewing the page. **bookmark window icon** **magnifying glass**
- Select the product pages you'd like to view or select **"Catalog Indexes"**. For a detailed view of all the products, click on the page number you wish to view.
- All **blue part numbers** in this catalog have links. Click on the part number to view the product details, inventory status, and add it to your order. If you are unable to see the blue part numbers, scroll your mouse over the part numbers and a "W" will appear on the cursor indicating it has a link.
- Catalog products without a direct link can also be displayed and ordered by typing the part number into the **search box** on Mouser's home page.

BLUEGIGA Bluetooth, Wi-Fi Modules and Devices

RoHS Compliant **This product is RoHS compliant.**

BLE112 4.0 LOW ENERGY BLUETOOTH MODULE

Bluetooth Low Energy Modules are single mode devices targeted for low power sensors and accessories. Bluetooth Low Energy Modules offer all Bluetooth low energy features—radio, stack, profiles, and application space for customer applications—so an external processor is not needed.

For quantities greater than listed, call for quote.

MOUSER STOCK NO.	Bluegiga Part No.	Fig.	Bluetooth Specification	Bluetooth Class	Antenna Option	Chip	Firmware	Price Each 1	25	50	100

WT41 LONG RANGE BLUETOOTH MODULE

WT41 is truly a long range Bluetooth module offering impressive 1,000 meters range between two WT41 Bluetooth modules. The module utilizes Bluegiga's sophisticated radio frequency design methodologies and offers OEM's a trouble free product even with tight integration with surrounding electronics.

For quantities greater than listed, call for quote.

WT32 BLUETOOTH AUDIO MODULE

WT32 is the latest generation of Bluetooth modules. It provides highest level of integration with integrated 2.4GHz radio, DSP, battery charger, stereo codec and antenna ready to hit mono and stereo applications. WT32 is also fully ready to support the latest Bluetooth 2.1 + EDR standard.

For quantities greater than listed, call for quote.

WT21 BLUETOOTH HCI MODULE

WT21 is intended at Bluetooth applications where a host processor is capable of running the Bluetooth software stack. WT21 only implements the low level Bluetooth Host Controller Interface (HCI) but still offers advantages of a module - easy implementation and certifications.

For quantities greater than listed, call for quote.

WF111 WI-FI RADIO MODULES

WF111 is a fully integrated single 2.4GHz band 802.11 b/g/n module for portable and battery powered applications, where Wi-Fi connectivity is needed.

PRODUCT NEW

Features:

- IEEE802.11b/g/n
- Max. Data Rate: 72.2Mbps
- Dimensions: 12 x 19 x 2.1mm
- SDIO Drivers for Linux 2.6 and 3.x kernels

For quantities greater than listed, call for quote.

WF121 WI-FI STAND ALONE MODULES

WF121 is a stand-alone Wi-Fi module providing fully integrated 2.4GHz 802.11 b/g/n radio and a 32-bit microcontroller (MCU) platform for embedded applications requiring simple, low-cost and low-power wireless TCP/IP connectivity, also providing flexible interfaces for connecting to various peripherals.

PRODUCT NEW

Features:

- IEEE802.11b/g/n
- Max. Data Rate: 72.2Mbps
- Dimensions: 15.4 x 26.2 x 2.1mm
- Embedded Bluegiga Wi-Fi Software

For quantities greater than listed, call for quote.

CEL Embedded RF Wireless Products

RoHS Compliant This page of product is compliant.

California Eastern Laboratories

802.15.41 ZIGBEE SOLUTIONS

CEL's comprehensive line of ZigBee solutions includes ICs, modules, and software application packages designed for use in mesh, point-to-point, and point-to multipoint systems. They provide a fully integrated, easy-to-use transceiver solution for IEEE 802.15.4 networks. CEL ZigBee modules and ICs are ideal for remote sensing, AMR/AMI, home and building automation, and security applications.

Integrated RF Transceiver/MCU for ZigBee/IEEE 802.15.4/SNAP Networks

Key Features:
- Industry leading RF Link Budget @ 106dB
- Embedded 8051 Compatible MCU with 96KB/8KB Flash/RAM
- Scalable Data Rate: 250kbps for ZigBee, 500kbps
- Voice Codec Support
- 4 Level Power Management Scheme
- Single Voltage Operation of 1.9V to 3.3V
- Hardware MAC

For quantities greater than listed, call for quote.

DIGI INTERNATIONAL Embedded RF Wireless Products

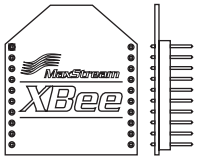
Products may be RoHS compliant. Check mouser.com for RoHS status.

Easy-to-Use! No configuration is necessary for out-of-box RF operation. Simply feed data into one module, then the data is sent out the other end of the wireless link. If more advanced functionality is needed, the modules support an extensive set of AT commands.

MaxStream 900MHz solutions are certified for use in North American, but integrators in Europe must use Digi RF 2.4GHz solutions.

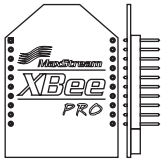
XBee Specifications:
- Indoor/Urban Range: Up to 133' (40m)
- Outdoor Line-of-Sight Range: Up to 400' (120m)
- Transmit Power: 1.25mW (+1dBm)
- Power-Down Current: <10µA
- Operating Frequency: 2.4GHz
- RF Data Rate: 250,000bps
- Receiver Sensitivity (1% PER) -96dBm in boost mode

RoHS Compliant



XBee-Pro Specifications:
- Indoor/Urban Range: Up to 300' (100m)
- Outdoor Line-of-Sight Range: Up to2 miles (3200m)
- Transmit Power: 63mW (+18dBm)
- Power-Down Current: <10µA
- Operating Frequency: 2.4GHz
- RF Data Rate: 250,000bps
- Receiver Sensitivity (1% PER) -102dBm

RoHS Compliant



XBEE® & XBEE-PRO® ZB RF MODULES

XBee and XBee-PRO ZB embedded SMT RF modules provide cost-effective wireless connectivity to electronic devices. They are interoperable with other ZigBee PRO feature set devices, including devices from other vendors. Programmable versions of the XBee-PRO ZB module make customizing applications easy. Programming directly on the module eliminates the need for a separate processor.

DIGI M10™ COMPACT SATELLITE MODEM

The Digi m10™ satellite module provides worldwide satellite data connectivity for a wide variety of asset-tracking and industrial remote communication applications. Small footprint satellite modem with global satellite connectivity is designed for a wide variety of asset tracking and remote device communication applications.

For quantities greater than listed, call for quote.

DLP DESIGN RFID and ZigBee™ Modules

Products may be RoHS compliant. Check mouser.com for RoHS status.

DLP USB/MICROCONTROLLER MODULE

The DLP-2232MSPF combines the same USB interface used in the DLP-2232H and the DLP-1232H modules with a Texas Instruments microcontroller with internal FRAM to form a rapid development tool. The MSP430FR5739 microcontroller is preprogrammed with basic functionality for accessing the port pins and can be reprogrammed with user firmware via a 12-pin header using the MSP-FET430UIF device programmer/debugger (purchased separately).

DLP-RFID1 RFID READER AND WRITER

The DLP-RFID1 is a low-cost, USB-powered module for reading from and writing to ISO 15693, ISO 18000-3, and Tag-it™ intelligent RFID transponder tags. It has the ability to both read and write up to 256 bytes of data in addition to reading the unique identifier (UID/SID). All of the DLP-RFID1's electronics and antenna reside within the compact unit, and all operational power is taken from the host PC via the USB interface. The range of the internal antenna is up to 4 inches depending upon the size of the tag being read.

Retail Version

Applications:

- Real-Time Security
- Personal Identification
- Pharmaceutical Tracking
- Inventory/Asset Management and Tracking
- Library/Book Management & Tracking
- Baggage Tagging
- Sports Event Timing

For quantities greater than listed, call for quote.

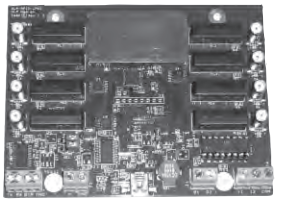
DLP-RFID-LP8C 8-CHANNEL RFID READER/WRITER

The DLP-RFID-LP8C is a low-cost, USB-powered module for reading from and writing to ISO 15693, ISO 18000-3 and Tag-it™ intelligent RFID transponder tags via up to eight external antennas. It has the ability to both read and write up to 256 bytes of data in addition to reading the unique identifier (UID/SID). All of the DLP-RFID-LP8C's electronics reside on a single, compact PCB; and all operational power is taken from the host Windows/Windows CE/ Linux PC via the USB interface. Up to eight external antennas can be connected via standard SMA connectors.

DLP-RFID-LP8C



Features:

- ISO 15693, 18000-3, 14443, Tag-it™ HF-I Compatible
- Can read the UID/SID of up to 15 Tags Simultaneously
- 13.56MHz Reader/Writer
- 8 Channels for External Antenna Connections
- FCC/IC/CE Modular Approvals in Place
- USB Port Powered from Windows, CE or Linux PC
- Both USB and RS232 Interfaces Provided
- USB Interface; No Driver Development Required for Windows, CE or Linux PC
- Operating Temperatures: 0°C to 70°C
- Dimensions: (L x W x H) 4.36" x 3.32" x 0.6

For quantities greater than listed, call for quote.

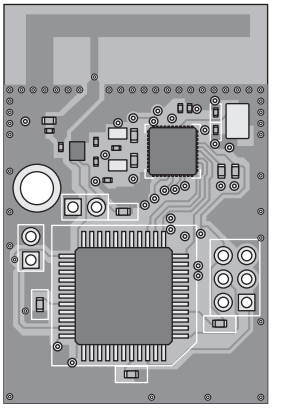
DLP 802.15.4/ZIGBEE™ READY MODULE

The DLP-RF2 OEM Module is a short-range, low-power, 2.4GHz, unlicensed worldwide ISM band transceiver designed around the IEEE 802.15.4 Wireless Standard. It supports point-to-point and star network configuration using preprogrammed firmware.

RoHS Compliant



DLP-RF2 - 2.4 GHZ OEM RF Transceiver Module

The DLP-RF2 combines a Freescale™ MC13192 2.4GHz Direct-Sequence, Spread-Spectrum RF Transceiver IC and Freescale MC9S08GT60 microcontroller to form an IEEE 802.15.4 compliant, ZigBee™ ready, short-range transceiver module. The DLP-RF2 connects to user electronics via a standard, 20-pin male header.

The MC9S08GT60 microcontroller is preprogrammed with DLP Design's Serial Interface Packet Processor (SIPP™ firmware) for accessing the transceiver functions via simple serial calls. Interface to an external serial host microcontroller/DSP/FPGA, etc. is accomplished via a simple 2-wire (RX, TX, and ground) interface.

PRODUCT NEW

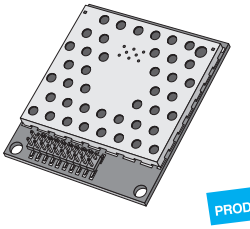
Compact AC4490 900MHz transceivers can replace miles of cable in harsh industrial environments. Using field-proven FHSS technology that needs no additional site licensing ✻, AC4490s reject interference, enable co-located system operation, increase output power and maintain data integrity.

AC4490s feature drop-in installation and a number of on-the-fly control commands, providing OEMs with a versatile interface for any application. They can be used as direct wire replacements, requiring no special host software for communication. All frequency hopping, synchronization and RF system data transmission/reception is performed by the transceiver.



PRODUCT NEW

High-performance AC4790 transceivers utilize Laird's "masterless" protocol, allowing each transceiver to communicate with any other in-range transceiver for true peer-to-peer operation.

AC4790's protocol features a dynamic addressing scheme, which simplifies the most efficient transmission path, so OEMs can design routing sequences that optimize the RF network. This makes AC4790 ideal for a wide variety of RF network. This makes AC4790 ideal for a wide variety of industrial applications that must rely on smooth, constant data flow.

AC4486/4868 SERIES - OEM TRANSCEIVER MODULES

Compact 868MHz transceivers can replace miles of cable in harsh environments. Using field-proven RF technology which needs no additional ETSI (Europe) licensing, OEMs with little or no previous RF experience can easily and quickly make existing systems wireless.

RoHS Compliant

LAIRD TECHNOLOGIES Wireless System Modules

WIRELESS ETHERNET BRIDGE CONNEXLAN 400

Based on Laird Technologies' WISM+ 802.11 embedded module, the CL400 series of wireless Ethernet bridges provide outstanding data throughput over long ranges in a ruggedized industrial package. The CL400 Ethernet Bridge products are ideal for users looking for a simple to use wireless Ethernet bridge. Available with an AC power adapter, standard RJ-45 Ethernet jack and antennas, the CL400 come prepackaged with all necessary accessories. With no configuration necessary, users can simply plug in their Ethernet cable and apply power and have a wireless bridge at distance up to 1 mile and speeds up to 11Mbs. Optimized for point-to-point bridge connections the CL400 starter packs come pre-configured to communicate come pre-configured to communicate over a WPA2-CCMP encrypted secure 802.11 RF channel. The intelligent devices will optimize link speeds according to the RF conditions and distances between the units.

Features:

- Easy to use, no configuration necessary
- Standard 10/100 RJ-45 Ethernet Jack
- Auto Sensing interface for connection to peripherals or network devices
- Optimized RF Data rates dependant on conditions
- AES encrypted wireless link
- RF Speeds up to 11Mbps
- Line of sight distances up to 1 mile

FLEXRF® 915MHZ AND 2.4GHZ WIRELESS MODULES

Laird Technologies' fifth generation 2.4GHz FHSS module sets the standard for industrial RF communication. Based on proprietary FlexRF™ technology, this globally-accepted module will exceed most OEM application and performance requirements. Embedded with Laird Technologies' robust server-client protocol, the LT2510 permits each module to communicate with any other in-range module for true peer-to-peer operation. "Out of range" modules can be reached via a meshing topology. The configuration and test software enables OEMs to structure and optimize the network to suit their application.

Laird Technologies' third generation 915MHz FHSS module sets yet another standard for industrial RF communication. Based on proprietary FlexRF™ technology, this globally-accepted module will exceed most OEM application and performance. From the OEM integrator's point of view, the LT1110's interface (API, configuration, etc) is 100% compatible with the LT2510 allowing the OEM to choose either 915MHz or 2.4GHz. The enhanced API commands provide packet routing control and network intelligence. With its field-proven proprietary FHSS RF protocol and increased penetration at 915 MHz, the LT1110 rejects RF noise, excels in multipath scenarios, allows for co-located systems, and provides an extremely reliable communication link.

LINX TECHNOLOGIES RF Modules and Dev Systems

Products may be RoHS compliant. Check mouser.com for RoHS status.

Linx RF modules make it easy and cost-effective to add wireless capabilities to your product. Linx modules contain all the components necessary for the transmission of RF. Since no external components (except an antenna) are needed, the modules are easily applied, even by persons without previous RF design experience. This conserves valuable engineering resources and greatly reduces the product's time to market.

LS RESEARCH Wireless Modules and Dev Kits

LS RESEARCH
Wireless Product Development

TIWI-BLE TRANSCEIVER MODULES

Features:
- 2.4GHz IEEE 802.11 b/g/n
- Bluetooth 2.1+EDR, Power Class 1.5
- Full support for BT4.0 BLE and ANT
- Miniature footprint: 18mmx13mm
- Terminal for PCB/Chip antenna feeds
- Integrated band-pass filter
- Worldwide acceptance: FCC (USA), IC (Canada), and CE (Europe)
- Based on Texas Instruments WL1271L Transceiver
- Seamless integration with TI OMAP™ application processor
- SDIO host data path interfaces
- RoHS compliant

Si-FLEX

PROFLEX ZIGBEE TRANSCEIVER MODULES

Features:
- 2.4GHz Output Frequency
- 100mW output power
- Long range: 4000 feet
- Miniature footprint: 0.9"x1.63"
- Integrated PCB F antenna or U.FL connector for external antenna
- Worldwide acceptance: FCC, IC and ETSI
- Powerful Texas Instruments 256k MSP430 with 802.15.4 MAC or ZigBee Stack
- LSR serial interface based on 802.15.4 MAC
- Low power operation
- RoHS compliant

For quantities greater than listed, call for quote.

SI-FLEX

The SiFLEX module is a high performance 900MHz IEEE 802.15.4 radio (AT86RF212 and RF amplifier circuit) and microcontroller (ATXMEGA256A3) in a cost effective, pre-certified footprint. Full debug and programming capabilities are included to develop custom applications. Easily load the ZigBee or MAC stack onto the module and create your own network.

Features:
- 900MHz DSSS 802.15.4/ZigBee/6LoWPAN Transceiver
- Very Versatile, Ultra Low Power Microcontroller Platform
- Serial Communications API (UART)
- Simple SiFLEX Network Protocol: Star Networks, Simple Repeating, AES Encryption, Data Rate up to 1Mbps
- Open Hardware Platform to Enable User Developed Application Code

Specifications:
- 250mW RF Output Power
- RF Sensitivity up to -102dBm
- FCC/IC Approved (pending)
- 2.0V to 3.45V Operation
- 256K Flash/16K RAM/4K EEPROM
- Power Consumption: 300mA in Transmit, 30mA in Receive, <5uA in Sleep

For quantities greater than listed, call for quote.

SIFLEX ZIGBEE TRANSCEIVER MODULES

Features:
- 900MHz Output Frequency
- 750mW output power
- Long range
- Up to 1Mbps RF data rate
- Miniature footprint: 0.9"x1.63"
- Multiple antenna options
- Dual antennas
- Agency Approvals: FCC and IC
- Powerful Atmel 256k ATXMEGA256A3 with 802.15.4 MAC or ZigBee Stack
- LSR serial interface based on 802.15.4 MAC
- Low power operation
- RoHS compliant

For quantities greater than listed, call for quote.

TIWI

TIWI5 Transceiver Module

Features:
- 802.11 a/b/g/n and Bluetooth® 2.1+EDR, 3.0, 4.0 (BLE), and ANT compliant
- 2.4 and 5.8GHz operation
- Supports requirements for WiFi Protected Access (WPA and WPA2.0) and IEEE 802.11i
- Supports requirements for WiFi Protected Access (WPA and WPA2.0) and IEEE 802.11i
- Works with IEEE std 802.1x for VPN
- Terminal for PCB/Chip antenna feeds
- Integrated band-pass filters
- Cost saving module level certification accepted worldwide: FCC (USA), IC (Canada), and ETSI (Europe)
- Compact design based on Texas Instruments WiLink™ 6.0 WL1273L transceiver
- Seamless integration with TI OMAP™ application processors
- SDIO host data path interfaces
- Bluetooth advanced audio interfaces
- Low power operation modes
- RoHS compliant

Specifications:
- Vcc min: 3.0V
- Vcc max: 4.8V
- Temp range: -40 to +85°C
- Miniature footprint: 18mmx13mm
- Low height profile: 1.9mm

For quantities greater than listed, call for quote.

TIWI-R2 Transceiver Module

The TiWi-R2 module is a high performance 2.4GHz IEEE 802.11 b/g/n Bluetooth 2.1+EDR radio in a cost effective, pre-certified footprint. The module realizes the necessary PHY/MAC layers to support WLAN applications in conjunction with a host processor over a SDIO interface. The module also provides a Bluetooth platform through the HCI transport layer.Both WLAN and Bluetooth share the same antenna port.

Features:
- IEEE 802.11 b,g,n,d,e,i, compliant
- Typical WLAN Transmit Power: 20.0dBm, 11Mbps, CCK (b) 14.5dBm, 54Mbps, OFDM (g) 12.5dBm, 65Mbps, OFDM (n) Output Power: 9.5dBm, Class 1.5
- Bluetooth 2.1+EDR, Power Class 1.5
- Typical WLAN Transmit Power: - 89dBm, 8% PER,11Mbps - 76dBm, 10% PER, 54Mbps - 73dBm, 10% PER, 65Mbps

Specifications:
- Miniature footprint: 18mmx13mm
- Low height profile: 1.9mm
- U.FL connector for external antenna
- Terminal for PCB/Chip antenna feeds
- Integrated band-pass filter
- Worldwide acceptance: FCC (USA), IC (Canada), and ETSI (Europe)
- Compact design based on Texas Instruments WL1271WSP Transceiver
- Seamless integration with TI OMAP™ application processor
- SDIO Host data path interfaces
- Bluetooth Advanced Audio Interfaces
- Low power operation mode
- Streamlined development with LSR design services
- RoHS compliant

For quantities greater than listed, call for quote.

MOUSER STOCK NO.	LS Research Part No.	Description	Price Each 1	50	100	1000

TIWI-SL Transceiver Module

Features:
- IEEE 802.11 b/g compliant.
- Typical WLAN Transmit Power: +19.0dBm, 11Mbps, CCK (b) +15dBm, 54Mbps, OFDM (g)
- Typical WLAN Sensitivity: -85dBm, 8% PER,11Mbps -70dBm, 10% PER, 54Mbps

Specifications:
- Miniature footprint: 14mmx21mm
- Low height profile: 2.3mm
- Operating Voltage: 2.9V to 3.6V
- Operating temperature: -40°C to +85°C
- Embedded network stack
- Wireless Security WEP, WPA Personal, WPA2 Personal
- Terminal for PCB/Chip antenna feeds
- Compact design based on Texas Instruments CC3000 transceiver
- SPI host interface
- Simple integration with microcontrollers and microprocessors
- Worldwide acceptance: FCC (USA), IC (Canada), and ETSI (Europe)
- Streamlined development with LSR design services
- RoHS compliant

For quantities greater than listed, call for quote.

IEEE STD. 802.11 WI-FI® MODULES

Microchip has added 802.11 wireless communications to its lineup of wireless technologies for the embedded market. Microchip has a Wi-Fi PICtail development board that adds 802.11 capabilities to Microchip's development platforms for the PIC18, PIC24, PIC32, and dsPIC family of microcontrollers. The PICtail development board contains the MRF24WB0MA FCC and Wi-Fi certified module. The Wi-Fi PICtail allows designers to quickly create a direct connection to the Internet by seamlessly connecting to standard 802.11b/g access points. In managing the connection, the MRF24WB0MA module controls the MAC and baseband layers and is connected to the host MCU via an SPI port. The 8/16 or 32-bit Microchip MCU that resides on the Microchip development board controls the TCP/IP networking stack and runs the system application.

Features:
- Compatible with PIC18, PIC24, PIC32 and dsPIC microcontrollers
- IEEE 802.11b compliant wireless solution compatible with b/g/n routers
- Supports infrastructure and Adhoc networks
- MRF24WB0MA small footprint module integrated antenna, MAC, Baseband, RF and power amplifier
- MRF24WB0MA/B module is FCC, IC, Wi-Fi certified, and ROHS, CE and ETSI compliant, providing considerable cost savings and quick time-to-market
- License Free TCP/IP stack supporting standard suite of Internet Protocols
- Built-in EZConfig application to facilitate network provisioning without a keyboard or display
- Built-in ZeroConf (Bonjour, Avahi) application to simplify human interaction
- Supports WEP, WPA, and WPA2 security protocols on module
- Solutions as simple as a single PIC plus WiFi module with power and passives

MOUSER STOCK NO.	Microchip Part No.	Description	Price Each

STAND-ALONE LIN 2.1/SAE J2602 TRANSCEIVERS

Features:
- Compliant with LIN Bus Specifications 1.3, 2.0 and 2.1 and are compliant to SAE J2602
- Support Baud Rates up to 20 Kbaud with LIN-compatible output driver
- 43V load dump protected
- Very low EMI meets stringent OEM requirements
- Very high immunity to RF disturbances meets stringent OEM requirements
- Wide supply voltage, 6.0V-27.0V continuous
- Extended Temperature Range: -40°C to +125°C
- Interface to PIC® MCU EUSART and standard USARTs

2.4GHZ IEEE STD. 802.15.4™ RF TRANSCEIVER MODULES

IEEE Std 802.15.4™ is created to address low-cost, low-data rate, and low-power design application for short-range Wireless Personal Area Networks (WPAN). The IEEE 802.15.4 defined standard for wireless connectivity among fixed, portable, and moving devices in a WPAN environment is the foundation for network protocols such as standard based ZigBee® and Microchip's Wireless proprietary MiWi™ and MiWi P2P.

The AC164134 PICTail Plus 2.4GHz RF card includes the Microchip MRF24J40MA transceiver module. The MRF24J40MA is an agency certified module with an integrated PCB antenna mounted on a PICTail Plus edge connector board for the Explorer 16 Development environment.

Features (MRF24J40):
- 2.4GHz IEEE 802.15.4 compliant
- Supports MiWi™, MiWi P2P and ZigBee
- In-line/stand-alone encryption
- Automatic MAC retransmit
- 18mA(RX)/22mA(TX)/2μA(Sleep)

Features (MRF24J40MA and MRF24J40MB):
- Microchip's MRF24J40 2.4GHz transceiver
- Integrated PCB antenna
- FCC (U.S.A.), IC (Canada), and ETSI (Europe) certified

BLUETOOTH EVALUATION KIT

The Microchip Bluetooth® Evaluation Kit is an expansion board used for evaluating and adding Bluetooth® wireless technology on 16/32-bit PIC MCUs and dsPIC DSCs. The evaluation kit consists of the Microchip Bluetooth® PICtail™ Plus Daughter Board, and the PIC24FJ256GB110 and PIC32MX795 USB Plug-in Modules, both of which come pre-programmed with the dotstack™ Bluetooth® demonstration Stack and SPP (Serial Protocol Profile). This kit requires an Explorer-16 Development Board to complete the board configuration.

MOUSER STOCK NO.	Microchip Part No.	Description	Price Each
579-DM183036	DM183036	Bluetooth evaluation board supports a wide range of PIC24, dsPIC and PIC32 devices	

SUB-GHZ TRANSCEIVER RADIO AND PICTAIL PLUS DAUGHTER BOARDS

The Industrial, Scientific and Medical (ISM) unlicensed Sub-GHz radio frequency bands are used for many short-range, low data-rate, and low-power wireless applications. Microchip provides stand alone transceivers and receiver products along with our family of rfPIC transmitter with embedded PIC® microcontroller. These radio solutions are ideal for AMR Metering, Consumer Electronics, Home, Business, Industrial Automation, Automotive and Medical applications.

The MRF49XA ia a fully integrated Sub-GHz RF transceiver supporting the 434/868/915MHz ISM frequency band. The MRF49XA supports FSK modulation with FHSS capability is ideal for two-way, short-range wireless applications.

The MRF89XA is a single chip FSK/OOK transceiver capable of operating in the 863-870MHz and 902-928MHz license-free ISM frequency bands, as well as the 950-960MHz frequency band. The low-cost MRF89XA is optimized for very low power consumption (3mA in Receiver mode). It incorporates a baseband modem with data rates up to 200kb/s. Data handling features include a 64-byte FIFO, packet handling, automatic CRC generation and data scrambling. Its highly integrated architecture allows for minimum external component count while still maintaining design flexibility.

Each of the MRF49XA PICtail/PICtail Plus Daughter Boards (579-AC164137-1 and 579-AC164137-2) are a demonstration and development daughter board for the MRF49XA ISM Band Sub-GHz RF Transceiver. The daughter board can plug into multiple Microchip Technology demonstration and development boards. For example, for 8-bit microcontroller development using the PIC18 Explorer Board (DM183032) or 16-bit microcontroller development using the Explorer 16 Development Board (DM240001).

2.4GHZ RF AUDIO STREAMER ICS

Features:
- Low cost, low power 2.4GHz RF solution for streaming uncompressed CD quality audio
- Embedded custom protocol stack for audio streaming based on Adaptive Frequency Hopping (AFH) for optimal co-existence performance
- I2S interface for direct audio interfacing with an external ADC/DAC

Applications:
- Gaming microphones
- Home karaoke microphones
- Subwoofers

For quantities greater than listed, call for quote.

BLUETOOTH LOW ENERGY

Features:
- Fully qualified Bluetooth® v4.0 low energy Connectivity IC with integrated Radio, Link Layer, and Host stack
- Optimized for Peripheral (Slave) role operation
- Fully integrated, low tolerance 32kHz RC oscillator eliminating the need for external 32kHz crystals
- Simple serial interface (ACI) supporting a range of different external application microcontrollers
- Includes temperature sensor

Applications:
- Mobile phone accessories
- Proximity tags and watches
- Sports, fitness, and healthcare sensors
- PC peripherals
- Consumer electronics (CE) remote controls
- Home and industrial automation

For quantities greater than listed, call for quote.

NXP SEMICONDUCTOR Wireless Solutions

RoHS Compliant **This product is RoHS compliant.**

WIRELESS MICROCONTROLLER

JN5148 Single Chip JenNet, ZigBee PRO and IEEE802.15.4 Solution

The JN5148 is an ultra low power, high performance wireless microcontroller targeted at JenNet and ZigBee PRO networking applications. The device features an enhanced 32-bit RISC processor offering high coding efficiency through variable width instructions, a multistage instruction pipeline and low power operation with programmable clock speeds. It also includes a 2.4GHz IEEE802.15.4 compliant transceiver, 128kB of ROM, 128kB of RAM, and a rich mix of analogue and digital peripherals. The large memory footprint allows the device to run both a network stack (e.g. ZigBee PRO) and an embedded application or in a coprocessor mode. The operating current is below 18mA, allowing operation direct from a coin cell. Enhanced peripherals include low power pulse counters running in sleep mode designed for pulse counting in AMR applications and a unique Time of Flight ranging engine, allowing accurate location services to be implemented on wireless sensor networks. It also includes a 4-wire I2S audio interface, to interface directly to mainstream audio CODECs, as well as conventional MCU peripherals.

Features:
- Single chip integrates transceiver and microcontroller for wireless sensor networks
- Large memory footprint to run ZigBee PRO or JenNet together with an application
- Very low current solution for long battery life
- Highly featured 32-bit RISC CPU for high performance and low power
- System BOM is low in component count and cost
- Extensive user peripherals

Applications:
- Robust and secure low power wireless applications
- ZigBee PRO and JenNet networks
- Smart metering (e.g. AMR)
- Home and commercial building automation
- Location Aware services (e.g. Asset Tracking)
- Industrial systems
- Telemetry
- Remote Control
- Toys and gaming peripherals

For quantities greater than listed, call for quote.

ZIGBEE PRO EVALUATION KIT

Jennic's JN5148-EK010 ZigBee PRO evaluation kit provides a complete environment for the development of ZigBee PRO applications based on the JN5148 wireless microcontroller. The kit contains a complete package of hardware and software, including five wireless sensor nodes, an unrestricted software developer kit (SDK), an example code.

WIRELESS MODULES

The JN5139-xxx-Myy family is a range of surface mount modules that enables users to implement systems using Jennic's own JenNet networking stack or IEEE802.15.4 with minimum time to market and at the lowest cost. They remove the need for expensive and lengthy development of custom RF board designs and test suites. The modules use Jennic's JN5139 wireless microcontroller to provide a comprehensive solution with high radio performance and all RF components are included. All that is required to develop and manufacture wireless control or sensing products is to connect a power supply and peripherals such as switches, actuators and sensors, considerably simplifying product development.

REDPINE SIGNALS Wireless Solutions

Redpine technology spans the complete end-to-end wireless solution and includes an extensive patent portfolio on OFDM, MIMO, embedded processor architectures and low-power techniques. The company's offerings include both the hardware and the software as differentiated sub-systems to provide flexibility and ease of integration to the system integrator. This single-stop approach enables Redpine to deliver an optimal wireless solution to meet customer's requirements at an optimal price point.

N-LINK™ SERIES

The nLink™ family of IEEE802.11n single stream modules designed to provide high throughputs at ultra low power consumption. The modules have an integrated MAC, baseband processor, RF transceiver and power amplifier. An integrated processor allows for providing a rich set of peripherals with minimal load on the host processor. The small form factor enables the customer to use these modules in handheld and other portable consumer electronic products. The modules allow for interfacing with the host over SDIO and SPI.

Features:

- 802.11n features for high throughput and extended range
- Host interface through SDIO and SPI
- Bluetooth coexistence
- Ultra low power operation
- Complete WLAN software along with host driver for Windows Embedded CE, Windows Mobile, Windows XP, and Linux OS
- Single supply 3.1 to 3.6V operation

For quantities greater than listed, call for quote.

CONNECT-IO-N™ SERIES

The Connect-io-n™ products are highly integrated single stream 802.11n modules designed to provide future-proof 'plug-and-play' Wi-Fi connectivity to embedded devices. They all feature standard UART or SPI interfaces to a host microcontroller and include all the functionality required in a WLAN client. They also include a full networking stack running on the embedded processor within Redpine's chipset, enabling network connectivity into numerous embedded systems with no additional burden on their microcontrollers. The Connect-io-n series includes variants offering single or dual-band operation and choice of form-factor.

Features:

- Compliant to 802.11b/g and single stream 802.11n
- 2.4/5GHz, 802.11n RF transceiver with power amplifier
- Highly integrated 2.4GHz/5GHz transceiver with direct conversion architecture
- Self-contained serial-to-wireless functionality - requires very little host processor bandwidth
- WPA/WPA2-PSK, WEP and TKIP modes of security
- Host Interface: UART and SPI, selectable through a hardware pin
- Integrated TCP/IP stack with option to bypass in SPI mode through software configuratio
- Ultra low power operation with power save modes
- Single supply 3.1 to 3.6V operation
- 65Mbps Data Rates

Specifications:

- Network Standard Support: IEEE 802.11b/g/n
- Data Rates: 802.11n: 6.5, 13, 19.5, 26, 39, 52, 58.5, 65Mbps
  802.11g: 6, 9, 12, 18, 24, 36, 48, 54Mbps
  802.11b: 1, 2, 5.5, 11Mbps
- Modulation Techniques: OFDM with BPSK, QPSK, 16-QAM, and 64-QAM 802.11b with CCK and DSSS
- Network Protocols: TCP, UDP, IPv4, ARP, ICMP, DHCP Client
- Supported UART baud rates: Supports standard baud rates from 9600bps to 3.6Mbps
- Operating Temperature: Industrial Grade -40ºC to +85ºC

For quantities greater than listed, call for quote.

WISECONNECT™ SERIES

WiSeConnect™ modules are fully integrated 802.11 a/b/g/n modules with advanced features for M2M, industrial, medical, enterprise and IOT (Internet of Things) applications. Powered with WiFi-Direct™, it can directly communicate with smart-phones and tablet PCs without an Access Point based infrastructure. Integrated with Enterprise Security as well as TCP/IP and WLAN stacks, it can be designed quickly into any Host platform for secure and standards based Wi-Fi connectivity in a variety of environments.

Features:

- 802.11a/b/g/n, operation over 2.4 and 5Ghz bands
- WiFi-Direct™, Access Point and Client mode
- Enterprise Security - EAP-TLS, EAP-TTLS, EAP-FAST, PEAP-MSHCAP-V2
- Integrated TCP/IP stack, HTTP Server/Client, DHCP
- Host interface through UART and SPI
- Integrated antenna and uFL connector for external antenna
- Ultra low power operation with power save modes

Specifications:

- Network Standard Support: IEEE 802.11b/g/n
- Data Rates: 802.11n: 6.5, 13, 19.5, 26, 39, 52, 58.5, 65 Mbps

RF DIGITAL Wireless Modules and Kits

RF DIGITAL
WWW.RFDIGITAL.COM

RoHS Compliant **This product is RoHS compliant.**

RF Digital manufactures an extensive line of fully integrated, low cost, high quality, high performance, configurable Wireless RF Transmitter, Receiver & Transceiver Modules, suitable for nearly every type of application.

2.4 GHZ SERIAL TRANSCEIVERS

Complete Compliance Approved & Certified, READY-TO-USE, 2.4 GHz wireless solution with built-in RFDP8 interference-tolerant user application protocol. Includes RFID, 32 Bit ESN, Logic Switch Transmitter / Receiver, 9600-8N1 Serial UART Transceiver and many easy-to-use addressable network modes. No development required at all, no RF layout, no code writing, all features are built-in. Be up and running with a wireless solution in minutes.

The RFDANT's Revolutionary Patent Pending design enables it to reach distances of 2,000 feet, while still being an Ultra Low Power device. This huge range is reached without any power amplifiers at all, it's unique design is responsible for it reaching these great distances without any extra battery drain or extra power. The RFDANT makes it easy for you to satisfy GREEN directives due to its unique design and ultra high performance. The RFDANT fits in the palm of your hand and looks like an Antenna, but of course it is much more since it is the whole radio and processing system in one unit. There are no RF cables at all, simply connect +V, GND, and a few logic signal wires based on your application and you are done. There is no need for PCB layout either. You can directly connect to the 11 pin, 8 inch cable extending out of the bottom of the RFDANT.

Features:

- Runs on a single coin cell for years
- WiFi interference tolerant
- Heavy 2.4GHz noise and interference tolerant
- No external parts required
- No RF layout required
- Easy and ready-to-use, hand-held, eval and application boards available
- Ultra small 15mm x 15mm footprint
- Fully contained, truly finished, ready to use module
- CE/ETSI/IC & FCC Certified and Approved
- Typical range: 500ft (150m)
- 2uA ultra low power modes
- Only 14mA current consumption at 0dbm TX and 17mA at RX

RFM 802.15.4, FHSS and 802.11

RFM offers a complete line of spread spectrum wireless products for industrial and factory applications. Using both patented frequency hopping technology and open-standard direct sequence technologies, these products fall in two categories: ready-to-use devices for systems integration, and design-in OEM modules for custom applications.

802.15.4 ZIGBEE PRO MODULES

RFM's ZPM3750 module is a standards-based wireless transceiver designed for Smart Energy and other short range wireless markets that require low power consumption, high transmit power (20dBm typical) and high receiver sensitivity (-103dBm). The ZPM3750 is based upon the IEEE 802.15.4 wireless network specification and includes the ZigBee PRO stack. The module can be used to develop applications supporting the ZigBee PRO Smart Energy and Home Automation application profiles. The ZPM3750 module operates in the 2.4GHz unlicensed ISM frequency band for worldwide deployment.

Contains:

- (2) ZPM3570 development boards
- (2) USB and 2 serial cables
- 9V batteries and wall-mount power supplies
- Antennas and RF cables
- Program CD with software and manuals
- Quick Start Guide

For quantities greater than listed, call for quote.

802.15.4 PRODUCTS

RFM's LPR2430 Series of 802.15.4 2.4GHz modules is comprised of the low-power LPR2430/LPR2430A and the extended range LPR2430ER/LPR2430ERA. The RFM LPR2430 Series modules are easy to integrate and provide robust wireless communications in applications where meshing is not needed or desired.

TRANSCEIVER MODULES

The DNT90 FHSS transceiver module provides a low-cost, versatile solution for wireless data communications in the 900MHz ISM band. The DNT90 RF output power can be set at 40 or 158mW. The DNT90 receiver input is protected by low-loss SAW filter, providing an excellent combination of receiver sensitivity and out-of-band interference rejection. The DNT90 module includes analog, digital and serial I/O, providing the flexibility to serve applications ranging from cable replacements to sensor networks. The DNT90 transceiver module is easy to integrate and provides reliable wireless communications up to 5 miles in line-of-sight installations.

For quantities greater than listed, call for quote.

802.11 PRODUCTS

RFM's WSN802G is a 2.4GHz IEEE 802.11g Radio Transceiver Module that enables OEMs to build low-power wireless local area networking (WLAN) and sensor monitoring solutions for the global market. The WSN802G delivers an exceptionally low power profile and long battery life capabilities in a fully functional, certified radio module that is easily interfaced to existing 802.11. b/g infrastructure for a wide variety of sensor monitoring and WLAN applications.

RFM Short Range Radios and RFICs

Products may be RoHS compliant. Check mouser.com for RoHS status.

VIRTUAL WIRE RADIO RF MODULES

Features:

- Integrated RF IC with quartz SAW filtering and frequency control components in a single hybrid
- High Data rates for data, control and digitized voice transmissions
- Stable, sensitive receiver technology with excellent "channel capture" performance
- Ultra Low current consumption for operation from small 3V batteries
- Very small, low-profile package to make "watch size" applications practical
- Rugged, self-shielding, metal-ceramic hybrid package
- Wide operating temperature range for industrial and outdoor applications
- Easy to optimize for a wide range of application requirements
- Easy certification to stringent short-range radio regulatory requirements
- No external RF filters, IF filters, resonators or crystals are required

For quantities greater than listed, call for quote.

Bluetooth Modules

The RN-41 Class 1 module is available with on board chip antenna and is both FCC/CE certified and bluetooth SIG registered.
The RN-24 super module has voltage regulation, status LEDs, thru hole pins/headers, and chip (S) or SMA (E) Antenna options.

Features:

- Postage stamp sized modules, 15mm x 22mm
- Castellated SMT pads for easy and reliable PCB mounting
- Bluetooth v1.1, 1.2, and 2.0/EDR compliant
- On board ceramic ANT(S) and external SMA ANT(E) versions
- On board bluetooth stacks/profiles make integration simple (no host code)
- Low power consumption, 1mA standby, 25mA connected
- Sustained data performance of >100kbps bi-directional
- Advanced features such as auto pairing and auto connect master
- Fully configurable with simple AT style commands locally over UART and remotely over Bluetooth
- Complete embedded solution, simplest mode requires only 4-pin connection (TX, RX, VCC, GND)

For quantities greater than listed, call for quote.

WiFly™ 802.11b/g GSX Embedded Module

The new WiFly GSX Module is a stand alone, embedded wireless 802.11b/g WiFi module that uses 100m WATT when active and 10m WATT in sleep mode. This GSX Module incorporates a 2.4GHz radio, processor, TCP/IP stack, real-time clock, crypto accelerator, power management and analog sensor interfaces. Because of its small form factor and extremely low power consumption, the RN-131G is perfect for mobile wireless applications such as asset monitoring, GPS tracking and battery sensors. The RN-134 Super Module is built upon Roving Networks RN-131 WiFly GSX module. The RN-134 is a field ready, WiFi certified 802.11b/g solution.

For quantities greater than listed, call for quote.

SI100X/1X SINGLE CHIP WIRELESS MCU

The Si100x/1x family is the lowest power single chip MCU with integrated sub-GHz RF transceiver. It has been designed to address the specific requirements of low power embedded systems requiring a RF bi-directional communication link such as metering, in-home utility monitoring, wireless security panels, wireless sensors, home & building automation, and access control.

Specifications:

- Peak MIPS: 25
- Communications: I2C, SPI, UART
- Timers (16-bit): 4
- QFN-42 Package Style

SKYETEK Developer Kits and Modules

skyetek

SKYEMODULE™ DEVELOPER KITS

The SkyeTek™ Developer Kit is a complete RFID development tool kit that enables quick demonstrations, proof-of-concepts, and trials when integrating RFID into numerous applications and products.
The SkyeTek™ Developer Kit includes all the components needed to get started, including: reader modules, sample tags, RFID antennas, connectors, demo software, device drivers, design guides, application notes, and more.

SKYEMODULE™ EMBEDDED RFID READERS

SkyeTek's SkyeModules are space, cost and power efficient RFID reader modules for highly performing embedded RFID applications. SkyeTek's Advanced Universal Reader Architecture (AURA)™ and robust software drive powerful functionality into an extremely small form factor. This functionality allows a diverse range of companies, primarily OEMs and systems integrators, to add RFID as a feature to their products, services and applications.

SKYEMODULE™ MULTI-PLEXER ACCESSORIES

SkyeTek offers the SkyePlus™ MXH and MXU antenna multiplexers to expand the reader's capability by adding up to 8 antennas.
The addition of multiplexers can help significantly reduce overall solution cost and are best used in applications that require multiple read-points.

For quantities greater than listed, call for quote.

TEXAS INSTRUMENTS Wireless Modules

RoHS Compliant **This product is RoHS compliant.**

For a complete listing of Texas Instruments Low Power Wireless Development Tools visit **mouser.com/ti**

- Evaluate the SmartRF®04 products. Right out of the box, the user can do range testing (PER testing) and transfer data from one PC to another using the SmartRF®04DK. This enables the user to quickly find out how well the SmartRF®04 products fit the intended application. A number of demonstration applications serve to highlight the innovative features of the SmartRF®04 ICs.
- Perform RF measurements. Using SmartRF® Studio, the user can configure the radio ICs with parameters that suit the intended application and easily measure sensitivity, output power and other RF parameters.

The CC2530ZNP Mini Development Kit is designed for engineers who want to get familiar with the ZigBee Network Processor concept without having to port a lot of software to get up and running. The ZigBee Network Processor allows adding ZigBee interface to any application using a simple serial interface. The development kit comes with three target boards which allow users to set up a small ZigBee network. Two boards can be mobile using two AAA batteries provided in the kit sensor boards include accelerometer, temperature sensor, and light sensor that can be used in conjunction with led lights and push buttons to develop simple demo applications.

MOUSER STOCK NO.	Texas Instruments Part No.	Product Group	Price Each

The CC2591 RF Front End includes PA, LNA, switches, balun, RF matching network and inductor, and will increase output power and improve receiver sensitivity on a 2.4GHz low-power RF solution. The CC2520 is an IEEE 802.15.4 compliant RF transceiver.

MOUSER STOCK NO.	Texas Instruments Part No.	Product Group	Price Each
595-CC2520-CC2591EMK	CC2520-CC2591EMK	2.4GHz, ZIGBEE-Software	

SimpleLink™ CC3000 Wi-Fi is a self-contained wireless solution that simplifies the process of implementing Internet connectivity. SimpleLink Wi-Fi minimizes host microcontroller (MCU) software requirements making it the ideal solution for embedded applications using any low-cost/low-power MCU. The SimpleLink CC3000 Wi-Fi solution is provided as a module to reduce development time, lower manufacturing costs, save board space, ease certification, and minimize RF expertise required. Additionally, it is provided as a complete platform solution including software drivers, sample applications, API guide, user documentation and a world-class support community.

595-CC3000TIWISLEM	CC3000TIWISLEM	WiFi/802.11	

The eZ430-RF2500 is a complete wireless development tool for the MSP430 and CC2500 that includes all the hardware and software required to develop an entire wireless project with the MSP430 in a convenient USB stick. The tool includes a USB-powered emulator to program and debug your application in-system and two 2.4-GHz wireless target boards featuring the highly integrated MSP430F2274 ultra-low-power MCU.

MOUSER STOCK NO.	Texas Instruments Part No.	Product Group	Price Each
595-EZ430-RF2500	EZ430-RF2500	2.4GHz	

The eZ430-RF2500-SEH is a complete Solar Energy Harvesting development kit to help create a perpetually powered wireless sensor network based on the ultra-low-power MSP430 microcontroller. The Solar Energy Harvester module includes a high-efficiency solar (2.25x2.25") panel optimized for operating indoors under low-intensity fluorescent lights, which provides enough power to run a wireless sensor application with no additional batteries. Inputs are also available for external energy harvesters such as thermal, piezoelectric, or another solar panel.

MOUSER STOCK NO.	Texas Instruments Part No.	Product Group	Price Each
595-EZ430-RF2500-SEH	EZ430-RF2500-SEH	2.4GHz	

The eZ430-RF2500T is an additional wireless target board for the eZ430-RF2500 wireless development tool. The eZ430-RF2500T uses the MSP430F2274 which combines 16-MIPS performance with a 200-ksps 10-bit ADC and 2op-amps and is paired with the CC2500 2.4GHz multi-channel RF transceiver designed for low-power wireless applications.

MOUSER STOCK NO.	Texas Instruments Part No.	Product Group	Price Each
595-EZ430-RF2500T	EZ430-RF2500T	2.4GHz	

CC85XXDK will let the user fully evaluate PurePath Wireless technology and the CC8520 for wireless audio applications. Audio interfaces available with the kit include S/PDIF optical + coax input/output, line input/output, headphone output and microphone input. A TLV320AIC3101 audio codec is mounted on the PurePath Wireless Audio Evaluation Board, which also has connectors compatible with other TI Codecs. CC85XXDK works with PurePath Wireless Configurator PC tool which helps designers configure and test PurePath Wireless Audio devices.

TRIQUINT SEMICONDUCTOR Evaluation Boards

TriQuint SEMICONDUCTOR

RoHS Compliant **This product is RoHS compliant.**

WJ Communications, Inc. is a leading provider of (RF) solutions serving multiple markets targeting wireless communications, RF identification (RFID), broadband cable, defense, and homeland security. WJ addresses the RF challenges in these multiple markets with its highly reliable amplifiers, mixers, RF integrated circuits (RFICs), RFID reader modules, chipsets, and multi-chip (MCM) modules.

WIRELESS PRODUCTS

W2SW0001 802.11 Module

The W2SW0001 System-in-Package (SiP) is a complete IEEE 802.11b/g radio solution. Unlike a typical module, the W2SW0001 includes all radio components, clocking and regulation for a complete WLAN radio subsystem. Integration of the W2SW0001 is a simple process of connecting our SiP to your product's interfaces, antenna port and single 3.3vdc power supply. Wi2Wi has developed SW drivers available for several processors and operating systems and other custom drivers can also be developed under a services agreement. Please check with Wi2Wi, Inc. Sales Representatives regarding pricing for SW Drivers.

Features:

- Small form factor SiP solution, 9.5mm x 9.5mm x 1.4mm, 81 Pin LGA, .75mm pitch
- Low power consumption and power save mode
- Full support for 802.11 e(QOS) and 802.11i (Security)
- Integrated RF-friendly LDO for single rail operation
- Integrated PA, EEPROM, Balun, and clocking
- Optimized front-end design for receive sensitivity
- Full driver support for popular OSs for processor family, Linux/WinCE support for many other ARM-9 based processors. Please check with Wi2Wi, Inc. Sales Representatives for pricing on SW Drivers
- Includes both an SDIO and GSPI interface

RoHS Compliant

For quantities greater than listed, call for quote.

WiFi and Bluetooth Modules

The W2CBW00x Series System-in-Package (SiP) is a complete IEEE 802.11b/g +Bluetooth™ radio solution. The W2CBW00x series includes all radio components, clocking and regulation for a complete WLAN radio subsystem. Also included in our solution is Wi2Wi's coexistence solution for simultaneous operation of Wi-Fi™ and Bluetooth™ Radios. By selecting the W2CBW00x series, a developer can significantly reduce their development costs and the technical risks associated with coexistence.

Features:

- Small form factor SiP solution
- Low power consumption and power save mode
- Full support for 802.11 e(QOS) and 802.11i (Security)
- Integrated RF-friendly LDO for single rail operation
- Integrated PA, EEPROM, Balun, and clocking
- Optimized front-end design for receive sensitivity, plus full coexistence support
- Full driver support for popular OSs for the Marvell PXA processor family, Linux support for many other ARM-9 based processors. Please check with Wi2Wi, Inc. Sales Representatives for pricing on SW Drivers.
- Includes both an SDIO and a GSPI interface for Wi-Fi, and a UBS and UART interface for BT

RoHS Compliant

For quantities greater than listed, call for quote.

NAVIGATION PRODUCTS

W2SG0084 GPS Module

This specification provides a general guideline on the performance and the integration of the Wi2Wi Inc. 48 Channel GPS Receiver Module Solution. The new solder-down module, based on SiRF Star IV Chipset is a drop in replacement for the W2SG0004, is targeted to assist companies to easily integrate GPS functionally into their products. This is accomplished by reducing their development times and cost by using a complete, small form factor, low power, ready to integrate GPS Receiver System Solution.

Features:

- Pin Compatible Replacement for W2SG0004
- GPS technology based upon by the CSR/SiRF™ SiRFStar IV™
- Compact design for easy integration: 11.2mm x 12mm x 2.5mm
- Ultra-low power consumption
- High sensitivity navigation engine (PVT) tracks as low as -163dBm
- 50Ω Antenna Launch
- 48 verification channel GPS receiver
- SBAS (WAAS or ENGOS) support

RoHS Compliant

For quantities greater than listed, call for quote.

MULTI-RADIO

The W2CBWG01 is a fully integrated 802.11b/g WLAN, Bluetooth™ and GPS solutions designed specifically for ultra-mobile portable electronics. It has been integrated with Intel's Atom processor based Menlow platform for UMPC/MID market.

Features:

- Uses half height Mini-Card form factor
- Certified Bluetooth™ and Wi-Fi™ radio solution with coexistence
- Integrated ultra low power consumption GPS
- INTEL McCaslin platform I/O Pin Definition

Interfaces:

- SDIO 1.1 interface for 802.11 Wi-Fi™
- USB 2.0 Interface for Bluetooth™
- UART NMEA for GPS
- 50Ω Antenna Launch for each Radio
- Please check with Wi2Wi, Inc. Sales Representatives for pricing on SW Drivers.

RoHS Compliant

WIZNET Network Internet and TCP/IP MCUs

INTERNET MCUS

Features:

- 10BaseT/100BaseTX Ethernet PHY embedded
- Power down mode supported for saving power consumption
- Hardwired TCP/IP Protocols: TCP, UDP, ICMP, IPv4 ARP, IGMP, PPPoE, Ethernet
- Auto Negotiation (Full-duplex and half duplex), Auto MDI/MDIX
- ADSL connection with PPPoE Protocol with PAP/CHAP Authentication mode support
- 8 independent sockets which are running simultaneously
- Full-duplex UART
- Programmable Watchdog Timer

PRODUCT NEW

MOUSER STOCK NO.	WIZnet Part No.	MCU Architecture	Package	SRAM (KB)	Code Memory (KB)	Timers/ Counters	Clock Frequency Max. (MHz)	Operating Supply Voltage (V)	Price Each

950-IMCU7100EVB	iMCU7100EVB	Evaluation Board for testing W7100A - Includes Character LCD, RS232 Port (D9), Ethernet Port, and DTAG Header	
950-IMCU7200EVB	iMCU7200EVB	Evaluation Board for W7200 (Cortex-M3 + W5200 core)	
950-IMCU7100DEBUGGER	iMCU7100Debugger	Debugger for W7100A - Includes USB Port, and DTAG Header	

TCP/IP CONTROLLERS

Features:

- Supports hardwired TCP/IP protocols: TCP,UDP,ICMP,IPv4,ARP,IGMPv2,PPPoE,Ethernet
- Supports 8 independent SOCKETs simultaneously
- Supports PPPoE connection (with PAP/CHAP Authentication mode)
- Embedded 10BaseT/100BaseTX Ethernet PHY
- Supports auto negotiation (Full-duplex and half duplex)

B&B ELECTRONICS Interface and Ethernet Modules

RoHS Compliant **This page of product is RoHS compliant.**

B&B Electronics Ethernet Data Communication Solutions offer a huge selection of rugged and reliable ethernet devices designed with your demanding applications and environments in mind. These solutions include ethernet switches, media converters, extenders and accessories. Typical applications include industrial automation, transportation, building automation, medical, health care and security.

Energy Harvesting Modules and Kits

Products may be RoHS compliant. Check mouser.com for RoHS status.

MICROCHIP XLP ENERGY HARVESTING KIT

The XLP 16-bit Energy Harvesting Development Kit is a true development platform for realizing energy harvesting applications. It is based on Microchip's PIC® MCUs with nanoWatt XLP Technology and Cymbet's EVAL-08 Solar Energy Harvester.

Included in the Evaluation Kit:

- Cymbet Eval-08 Solar Energy Harvesting Board and Cable
- XLP 16-bit Development Board
- PIC24F16KA102 Microcontroller
- PICkit 3 Programmer/Debugger
- USB Cables
- XLP 16-bit Energy Harvesting Development Kit user guide

For quantities greater than listed, call for quote.

CYMBET CORPORATION — ENERGY HARVESTING KITS AND MODULES

The EnerChip EH CBC5300 is a self-contained Energy Harvesting power module in a 24-pin DIP configuration. The CBC5300 module is designed to accept a wide range of energy transducer inputs, store the harvested power, and deliver managed power to the target system. The purpose of this module is to enable system designers to quickly develop Energy Harvesting applications.

For quantities greater than listed, call for quote.

TEXAS INSTRUMENTS — EZ430-RF2500-SEH DEVELOPMENT TOOL

The eZ430-RF2500 is a complete wireless development tool for the MSP430 and CC2500 that includes all the hardware and software required to develop an entire wireless project with the MSP430 in a convenient USB stick. The tool includes a USB-powered emulator to program and debug your application in-system and two 2.4-GHz wireless target boards featuring the highly integrated MSP430F2274 ultra-low-power MCU.

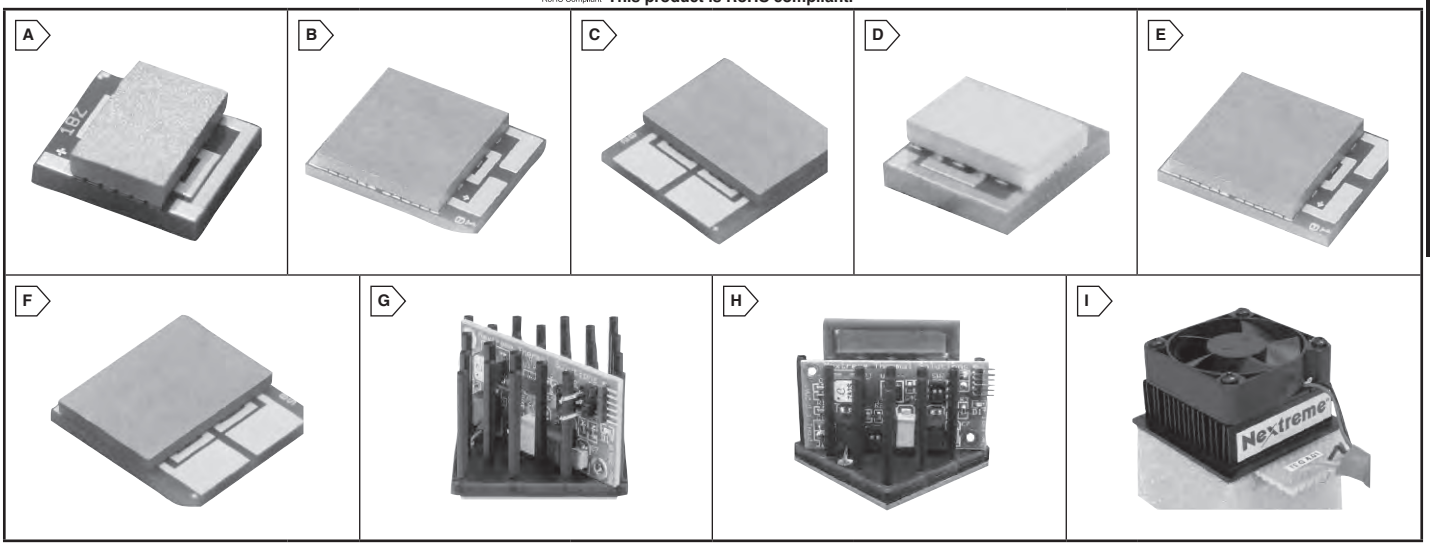
NEXTREME Energy Harvesting

RoHS Compliant **This product is RoHS compliant.**



THERMOELECTRIC COOLING

Nextreme HV Series Thermoelectric Coolers are part of a new line of thin-film, high voltage and high heat pumping thermoelectric coolers (TECs) that are designed for the cooling and temperature control of photonics and optoelectronic devices. Nextreme has developed the HV Series Thermoelectric Coolers to address electronics cooling applications with high heat flux and larger heat pumping requirements. The HV Series removes unique voltage and current requirements as barriers to the integration of thin-film thermoelectrics into electronics.

The size, input power requirements, and heat pumping capability of the OptoCooler™ HV14 make it particularly well suited for devices such as laser diodes and high brightness LEDs.

Applications:
- Semiconductor optical amplifiers (SOA)
- Laser Diodes
- High Brightness LEDs
- VCSELs
- Photo-detectors

RoHS Compliant

For quantities greater than listed, call for quote.

THERMOELECTRIC POWER GENERATION

Nextreme eTEG™ HV Thermoelectric Power Generators are the next generation of high voltage, thinfilm thermoelectric generators developed to address micro-power applications. The Nextreme eTEG™ HV Thermoelectric Power Generators can convert waste heat from thermal sources into usable electricity as an energy source. Manufactured using semiconductor fabrication techniques, the eTEG is scalable, cost-effective, and can be utilized in a broad range of markets and applications including automotive, government and aerospace, thermal batteries, medical implants, and wireless sensor networks.

At the core of the eTEG™ module is Nextreme's breakthrough Thermal Copper Pillar Bump, a structure made from thin-film thermoelectric material embedded into flip chip interconnects (in particular, copper pillar solder bumps) used in electronic and optoelectronic packaging. The device generates electricity via the Seebeck Effect, where electricity is produced from a temperature differential applied across the device.

Applications:
- Automotive
- Aerospace
- Thermal batteries
- Medical implants
- Wireless sensor networks

ARDUINO Development Boards and TinkerKits

Arduino provides open-source electronics prototyping platforms based on flexible, easy-to-use hardware and software. Arduino prototyping platforms are intended for artists, designers, hobbyists, and anyone interested in creating interactive objects or environments. Arduino's prototyping platforms can sense the environment by receiving input from a variety of sensors and can affect their surroundings by controlling lights, motors, and other actuators. Arduino projects can be stand-alone or they can communicate with software running on a computer.

TINKERKITS

TinkerKit simplifies electronic prototyping throughout a wide variety of sensors and actuators soldered on orange-colored boards you can hook up to the Arduino through the Sensor Shield and three-pin cables. A little signal amplifier helps to stabilize the signals running on the cables, ensuring clean analysis from the sensors even on long distances (1m-5m). TinkerKit has been conceived for school teaching and museum exhibitions, allowing the setup of interactive environments on the run, without using soldering iron or breadboard. TinkerKit is the result of years of award-winning experience in Interaction Design. For a long time it has been developed as an internal tool, improved bit by bit project by project, client by client.

CONNECT ONE WI-REACH™ CLASSIC MOBILE HOTSPOT

Wi-REACH™ Classic is a compact, battery-operated, mobile WiFi hotspot. Wi-REACH™ Classic combines the connectivity of WiFi with the excellent mobile coverage of 3G/4G cellular and transforms an existing 3G USB modem into a personal Wi-Fi cloud that can be shared between up to 10 Wi-Fi devices. Its built-in rechargeable battery delivers four to five hours in normal use and can be recharged using the built-in USB connector.

For quantities greater than listed, call for quote.

CONNECT ONE iCHIP

iChip™ updateable Internet Controller™ chips provide a cost-effective and reliable solution for embedding IP-based communication and other network services in low-cost, non-PC devices running M2M (machine-to-machine) applications. iChip mediates the connection between a host device and the Internet, operating as an embedded device server. It eliminates the need for Internet programming and avoids the hassle, risks and costs of a development project. Instead, you are assured a fast design-in, with predictable timing and budget. Typical design time is one man-month.

For quantities greater than listed, call for quote.

CONNECT ONE EMBEDDED WIFI MODULES

Connect One embedded WLAN modules enable devices to easily connect to IP Networks over an 802.11b/g Wireless LAN with no driver development or WiFi certifications. All modules include the Connect One iChip™, complete with full TCP/IP and SSL stacks and an 802.11b/g chipset. Modules have serial, SPI, USB and RMII interfaces. Nano WiReach WiFi is pin-compatible with the Nano LANReach LAN module. Nano socket iWiFi is pin compatible with the Nano SocketLAN LAN module. This allows customers to design a simple PCB for either LAN or WiFi connectivity.

For quantities greater than listed, call for quote.

CONNECT ONE EMBEDDED LAN MODULES

Connect One offers a line of secure embedded Ethernet modules that enable devices to easily connect to IP Networks over a 10/100Base T Ethernet LAN. Both modules include the iChip™ CO2144 complete with full TCP/IP and SSL stacks and a 10/100Base T Ethernet Phy with RJ45 connector. Nano LANReach is pin-compatible with the Nano WiReach WiFi module. Nano SocketLAN is pin compatible with the Nano SocketWiFi WiFi module. This allows customers to design a single PCB for either LAN or WiFi connectivity.

CONNECT ONE SECURE iLAN

Secure iWiFi™ and secute iLAN are serial-to-WiFi and serial-to-LAN device servers that enables installed serial devices to connect via their existing serial port to the internet over a wired or wireless LAN. They include a full TCP/IP stack, SSL, and multiple bundled applications such as email, FTP, web server, etc. Secure iLAN and iWiFi eliminates the need for any hardware modifications to the host device. Simply connect to a serial cable from Secure iLAN or iWiFi RS232 or RS485 connector to your device. Your device is ready to connect to the wired/wireless LAN.

DIGI INTERNATIONAL Development Tools

RoHS Compliant **This product is RoHS compliant.**

DEVELOPMENT KITS

Digi development kits are powerful, easy to use, affordable, and deliver a complete out-of-the-box solution. Plug-and-play firmware offers a rapid development platform without the need for additional programming. Professional embedded application development is available using NET+OS®, Digi Embedded Linux®, Microsoft® Windows® Embedded CE 6.0, Microsoft .NET Micro Framework and the royalty-free Digi development tools.

DIGI CONNECT ME® FAMILY WIRED AND WIRELESS EMBEDDED MODULES

The industry's first interchangeable secure wired and wireless embedded modules with plug-and-play functionality and comprehensive development tools make it easy to add embedded web-enabled wired and wireless network connectivity. Based on a unique common platform design approach, the Digi Connect® ME and Digi Connect® Wi-ME embedded modules offer complete "drop-in" integration. This allows you to build future-proof products based on a single design supporting secure wired 10/100Base-T and 802.11b wireless Ethernet connectivity. The family of Digi Connect® embedded modules makes all of this possible without the traditional complexities of hardware and software integration work, and at a fraction of the time and cost required to create custom solutions.

DIGI CONNECT WI-ME™

The Digi Connect Wi-ME (Wireless Micro Embedded) is a fully customizable and secure 802.11b wireless device server. It is based on the common platform design approach of the Digi Connect family of embedded products, which minimizes design risk and reduces time to market by allowing customers to easily accommodate both wired and wireless network functionality in a single future-proof product design.

For quantities greater than listed, call for quote.

CONNECTCORE 9P 9215

The ConnectCore 9P 9215 module delivers a powerful, secure, and compact network-enabled 150MHz NS9215 processor solution with ARM9 core, a rich set of peripherals and unique interface flexibility. With leading features like an on-chip AES encryption engine, two independent and fully programmable flexible interface modules and Digi's patented dynamic power management options, it is the ideal solution for today's networked embedded applications. ConnectCore Wi-9P 9215 is the industry's first 802.11a/b/g embedded core module for secure wireless networking and integrated application processing. The ConnectCore Wi-9P 9215 is pre-certified for 802.11a/b/g networking by the FCC in North America and other regulatory organizations in Europe and Japan. The ConnectCore Wi-9P 9215 features two Flexible Interface Modules (FIMs) built into Digi's ARM9 microprocessor that allow customers to use application-specific interfaces such as Secure Digital, Controller Area Network (CAN), 1-Wire, additional UARTs and others.

DIGI INTERNATIONAL External Device Servers

Products may be RoHS compliant. Check mouser.com for RoHS status.

DIGI ONE® SP

Efficient RS-232/422/485 serial-to-Ethernet connectivity for applications requiring simple and cost-effective data communications.
- Cost-effective serial-to-Ethernet connectivity
- 1 RS-232/422/485 switch selectable DB-9 serial port
- Compact form factor – only 3.7in. (9.4cm) in length

The Digi One SP device server easily allows any device with a serial port to be connected to Ethernet. The compact design of the Digi One SP delivers cost-effective performance and capability in one of the smallest form factors available. The Digi One SP delivers efficient serial-to-Ethernet connectivity and is ideal for applications where TCP Socket, UDP Socket, or UDP multicast functionality is needed.

For quantities greater than listed, call for quote.

MOUSER STOCK NO.	Digi Part No.	Description	Price Each
860-70001851	70001851	Digi One SP

DIGI PORTSERVER® TS

Standard multiport RS-232/422/485 serial-to-Ethernet connectivity that is ideal for applications requiring low port count and seamless integration into existing application.
- Standard, reliable serial-to-Ethernet connectivity
- 1/2/4 ports; RS-232 RJ-45 serial
- 9-30VDC power supply
- Easy configuration using installation CD

PortServer TS delivers standard serial-to-Ethernet connectivity simply and reliably. It easily addresses the growing need to connect individual devices to the network over industry standard Ethernet in many applications.
PortServer TS is ideal for applications requiring COM ports or where TCP/UDP Sockets, or UDP multicast functionality is required. It includes Digi's patented RealPort® COM port redirector technology which makes it possible to establish a connection between the host and networked serial device by creating a local COM or TTY port on the host computer, allowing existing software applications to work without modification.

For quantities greater than listed, call for quote.

MOUSER STOCK NO.	Digi Part No.	Description	Price Each
860-70002041	70002041	Digi PortServer TS 1 (1 Port)	

DIGI PORTSERVER® TS W MEI

Universal, high-performance RS-232/422/485 serial-to-wireless connectivity. Advanced features include WEP (64- and 128-bit), SSH, easy management and many more.
- Easily connect serial devices to an 802.11b wireless Ethernet network
- Switch selectable RS-232/422/485 serial RJ-45
- WEP encryption (64-/128-bit)
- 1/2/4 port models available

The PortServer TS W MEI family of device servers makes it easy to network-enable serial devices to a wireless 802.11b infrastructure. Users will appreciate the new external antenna and hidden wireless card offered by the versatile one-, two-, and four-port solutions.
PortServer TS W MEI also delivers easy installation through an auto-run wizard on the CD for Microsoft® and UNIX® platforms, RS-232/422/485 serial ports for connectivity to almost any serial interface, and many advanced networking features.

For quantities greater than listed, call for quote.

DIGI ONE® IA

The Digi One IA device server delivers easy and reliable serial-to-Ethernet and Modbus-to-Modbus/TCP connectivity solutions for industrial automation applications
- Switch selectable RS-232/422/485 for use with virtually any device with a serial port
- Extended input voltage of 9-30VDC with screw terminal connections
- 32ºF to 140ºF (0ºC to 60ºC) operating temperature to meet the demands of the factory floor
- An industrial strength, ergonomic enclosure designed to mount vertically on a standard 35mm DIN rail, saving valuable cabinet space
- Industry-leading low latency to meet the strict data throughput requirements for CNC/DNC equipment and other applications

For quantities greater than listed, call for quote.

DIGI CONNECT® WI-SP

The industry's first secure 802.11b wireless device server delivers leading network-to-serial connectivity and strong WPA2/802.11i security.
- Compact design with integrated mounting tabs
- Switch selectable RS-232/422/485 interface
- Enterprise-class WPA2/802.11i wireless security
- Product integration and customization flexibility

The Digi Connect Wi-SP is the industry's first wireless device server providing enterprise-class wireless security through a complete set of strong encryption and authentication services, which are compliant with the WPA2 and 802.11i standards.

For quantities greater than listed, call for quote.

MOUSER STOCK NO.	Digi Part No.	Description	Price Each
860-DC-WSP-01-S	DC-WSP-01-S	Digi Connect Wi-SP	

DIGI PORTSERVER® TS MEI

Universal, high-performance device servers for RS-232/422/485 serial-to-Ethernet connectivity. Advanced features include SSH v2, SNMP, PPP, port buffering and many more.
- Standard, reliable serial-to-Ethernet connectivity
- 1/2/4 serial port models available
- Switch selectable RS-232/422/485 RJ-45 serial

PortServer TS MEI (Multi-Electrical Interface, RS-232/422/485) makes it easy to connect any serial device to your network. Available in 1, 2 and 4 port models, it combines the inherent benefits of data networking with proven asynchronous connectivity to deliver powerful, yet simple Ethernet connectivity for all your serial devices.
PortServer TS MEI delivers universal and powerful features including data security via SSH v2, port buffering, and full SNMP management, making it ideal for applications like console management where device management and monitoring are critical.

860-70001805	70001805	Digi PortServer TS 1MEI (1 Port)	

DIGI PORTSERVER® TS M MEI MODEM

Device server with internal modem provides both IP networking and standard phone line dial-up connectivity for remote access to RS-232/422/485 serial devices.
- Device server with internal modem
- Modem connection can act as backup during network failure
- Access remote devices and IP networks via internal modem

The new PortServer TS M MEI family offers Ethernet and RS-232/422/485 serial connections, with the addition of an internal modem. The one-and three-port device servers are ideal for applications requiring both IP networking and standard phone line dial-up connectivity for remote access to serial devices.
The embedded modem adds another level of flexibility to the PortServer TS line. It allows remote hosts to dial in to a serial device attached to a device server, as well as the serial device to dial out to a remote location using a standard phone line. The modem helps to create a PPP connection so that applications and devices can communicate via an IP network, even when the primary LAN or WAN is not available.

For quantities greater than listed, call for quote.

DIGI PORTSERVER® TS P MEI

Designed for universal, high-performance RS-232/422/485 serial-to-Ethernet where traditional power alternatives such as powered Ethernet and powered serial are required.
- Supports powered Ethernet and powered serial
- One, two or four RS-232/422/485 ports

The PortServer TS P MEI family makes it easy to connect RS-232/422/485 serial devices to an IP network. By supporting versatile powering options like powered Ethernet and powered serial, PortServer TS P MEI can adapt to many applications where traditional power alternatives are required.
PortServer TS P MEI delivers universal, high performance multiport serial-to-Ethernet connectivity. It is ideal for applications requiring COM ports, serial tunneling, or where TCP/UDP Socket functionality is needed.

For quantities greater than listed, call for quote.

DIGI EASYPOWER™

The Digi EasyPower family provides simple, safe and efficient device power over existing LAN data cabling (Ethernet). It is ideal for applications where power outlets are not available at the optimal device location.
- Provides simple, safe and efficient device power over Ethernet
- 1/6 power and data ports
- IEEE 802.3af compliant

The Digi EasyPower provides one or six data/Ethernet ports for connecting powered Ethernet devices to the corporate hub/switch. The Digi EasyPower has two ports for each device. One port provides power and can transmit/receive data to the powered Ethernet device. The second port connects to the corporate hub/switch for Ethernet connectivity.
The Digi EasyPower makes powering device servers easy and cost-effective. There is no need to provide separate power supplies for the Digi One® IAP, PortServer® TS P MEI family and Digi Connect® 50. The Digi EasyPower is fully compatible with the IEEE 802.3af standard.

For quantities greater than listed, call for quote.

DLP DESIGN USB Interface Products

RoHS Compliant **This product is RoHS compliant.**

"Add USB to your next project--it's easier than you might think!"

DLP Design's USB Interface products provide a high-speed, hot-swappable, user-friendly connection between your electronic device and a host PC. The USB interface will provide up to 500mA at 5 volts of power for your electronics. These boards make the extremely complex USB Interface easy for just about anyone to start using, without requiring any in-depth prior knowledge.

DUAL CHANNEL USB ADAPTERS

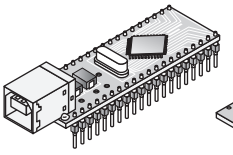
626-DLP2232M-G

The DLP-2232M uses FTDI's FT2232C 3RD generation Dual Channel USB-FIFO/UART and offers a simple solution for interfacing ASIC/MCU/FPGA/DSP based designs to a host computer via USB. Each channel can be configured for either USB-UART or USB-FIFO via the on-board setup EEPROM. Rev 3 silicon from FTDI. No in-depth knowledge of USB required!

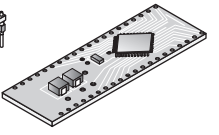
626-DLP2232ML-G

Same functional design as the DLP-2232M, the DLP-2232ML is perfect for space constrained designs.

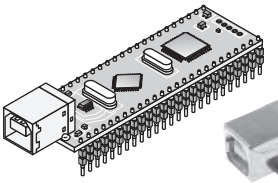
- Dual channel, each can be configured for USB-FIFO or USB-UART
- Up to 8 megabit per second data rate
- USB 1.1/2.0 Compatible



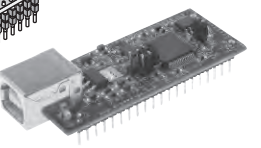
626-DLP2232M-G



626-DLP2232ML-G



626-DLP2232PB-G



626-DLP2232H

626-DLP2232PB-G/626-DLP2232PB-CCS

The DLP-2232PB uses FTDI's 3RD generation FT2232C USB IC and a PIC Microchip 16F877A to form a rapid prototyping development tool. On-board firmware uploader included - no device programmer required!

626-DLP-2232H

The DLP-2232H is DLP Design's premier USB-to-UART/FIFO interface module based on FTDI's 5th generation USB 2.0 High Speed (480Mb/s) silicon. The DLP-2232H is manufactured in a lead-free, RoHS-compliant, compact 40-pin, 0.1-inch spaced standard 0.6 inch wide DIP footprint.

USB ADAPTER BOARDS

DLP-USB245M-G

- Add USB connectivity to your next project
- Up to 8 megabit per second data rate
- USB 1.1 compliant
- Simple FIFO interface to MCU, FPGA, CPU, etc.
- Rev 2 silicon from FTDI
- No in-depth knowledge of USB required
- RoHS Compliant

The DLP-USB245M USB-FIFO adapter offers a simple straight-forward solution for interfacing ASIC or MCU based designs to USB. It comes complete with royalty-free drivers for most common operating systems. Features include an easy to use FIFO-like interface, a data transfer rate of up to 8 megabits per second and a standard .6 inch, 24-pin DIP footprint.

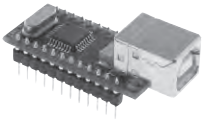
DLP-USB232M-G

- Easily convert legacy RS-232 devices to USB
- Up to 3 megabaud data rate
- USB 1.1 compliant
- Full handshaking and modem interface signals
- Rev 2 silicon from FTDI
- No in-depth knowledge of USB required
- RoHS Compliant

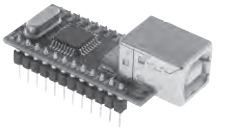
The DLP-USB232M USB-UART Adapter PCB is the ideal solution for upgrading legacy RS232 designs to USB. It comes complete with royalty-free drivers for most common operating systems. Features include data transfer rates of up to 3 million baud, a full set of modem handshaking controls and a standard .6 inch, 24-pin DIP footprint.

626-DLP-USB232R

The DLP-USB232R is DLP Design's smallest USB-to-serial UART interface module, and it utilizes the popular FT232R IC with the FTDIChip-ID™ feature from FTDI. In addition to enabling standard USB-to-serial designs, both asynchronous and synchronous bit-bang interface modes are available.



626-DLP-USB232M-G



626-DLP-USB245M-G

626-DLP-USB1232H

The DLP-USB1232H is DLP Design's premier USB-to-UART/FIFO interface module based upon FTDI's fifth-generation USB 2.0 High Speed (480Mb/s) silicon. The DLP-USB1232H is available in a lead-free, RoHS-compliant, compact, 18-pin, 0.1-inch spaced standard DIP footprint.

USB TO SERIAL ADAPTER

This USB-to-serial adapter is designed to easily connect a microcontroller/DSP/FPGA/etc to a host PC or upgrade a legacy RS232 device to USB with minimal design effort. Virtual Com Port (VCP) drivers are provided royalty-free that make the DLP-TXRX look like a standard Windows/Linux/Mac RS232 port to the users host program. An attractive quantity discount structure makes this module suitable for incorporation into low- and medium-volume finished products.

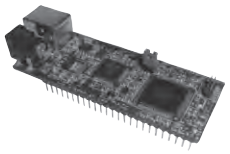
"Add USB to your next project-it's easier than you might think!"

DLP Design's USB Interface products provide a high-speed, hot-swappable, user-friendly connection between your electronic device and a host PC. The USB interface will provide up to 500mA at 5 volts of power for your electronics. These boards make the extremely complex USB Interface easy for just about anyone to start using, without requiring any in-depth prior knowledge.

USB MICROCONTROLLER DEVELOPMENT BOARDS

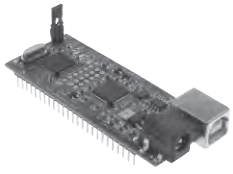
DLP-2232H-PSOC5

- Cypress CY8C5588 Programmable System-on-Chip (PSoC®) 5 containing:
  - 32-bit ARM Cortex-M3 CPU Core
  - Up to 67MHz Operation
  - 256KBytes Flash Program Memory
  - 64KBytes SRAM Memory
  - Internal Non-Volatile Configuration Memory for All Programmable Features
  - One Configurable Delta-Sigma ADC with 8- to 20-Bit Resolution
  - Two Configurable SAR ADC's with 8- to 12-bit Resolution
  - Four 8-bit DAC's Configurable for Current or Voltage Mode Operation
  - Four Comparators and Four OpAmps
  - Four Configurable Multifunction Analog Blocks
  - 24 Programmable Logic Device (PLD-Based) Universal Digital Blocks (UDB)
- High-Speed USB 2.0 Interface Featuring FTDI FT2232H Silicon- Both Parallel and Serial Interfaces are Supported
- 40 User I/O Channels plus 2 Output/Dedicated Peripheral Usage Pins
- USB Port Powered or 5V External Power Barrel Jack
- USB 1.1- and 2.0-Compatible Interface
- Small Footprint: 3.0 x 1.2-inch PCB and Standard 50-Pin, 0.9-inch DIP Interface



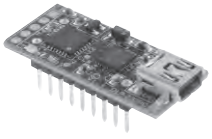
DLP-2232MSP

The DLP-2232MSP combines the same USB interface used in the DLP-2232H and the DLP-1232H modules with a Texas Instruments microcontroller to form a rapid development tool. The MSP430F2618 microcontroller is preprogrammed with basic functionality for accessing the port pins and can be reprogrammed with user firmware via a 10-pin header using a device programmer (purchased separately).



DLP-232PC

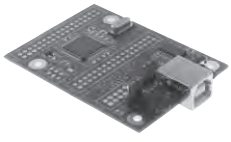
- Single byte commands to all functions
- Designed to fit into a standard 18 pin, 0.3-inch wide DIP footprint providing 14 I/O channels
- PIC18F2410 Microcontroller can be reprogrammed with user firmware
- Microcontroller communicates with host PC at up to 460,800 baud data rate
- USB 1.1/2.0 Compatible
- Rev 3 silicon from FTDI
- No in-depth knowledge of USB required



Measuring in at only 1.375x0.6 inches, this new module is our lowest cost and smallest USB to Microcontroller module to date. The DLP-232PC uses single byte commands and FTDI's Virtual COM Port (VCP) drivers to provide an easy to use USB interface to a PIC 18F2410 microcontroller. Features include 14 I/O channels (8 can be used for analog inputs measuring 0-5 volts), a standard 0.3 inch wide DIP footprint and preprogrammed firmware for easy access to the I/Os and external digital temperature sensors (purchased separately).

DLP-245PL-G

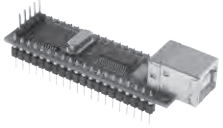
- Simple USB-FIFO interface to PIC Microchip 18F8722 microcontroller
- 50 I/O pins (including A/D inputs) plus 8-bit data bus
- Example source code provided for Token firmware feature
- Up to 2 megabit per second data rate to host computer
- USB 1.1/2.0 compatible
- Rev 2 silicon from FTDI
- No in-depth knowledge of USB required
- RoHS Compliant



The DLP-245PL is a powerful integrated module based on the DLP-USB245M USB-FIFO adapter coupled with a PIC 18F8722 MPU and royalty free USB drivers. The 18F8722 microcontroller is preprogrammed with basic functionality for accessing the port pins and can be reprogrammed with user hex code via a 5-pin header that is compatible with Microchip's MPLAB ICD2 device programmer/ debugger (purchased separately). Refer to the datasheet for full details.

DLP-245PB-G

- Simple USB-FIFO interface to PIC Microchip 16F877A microcontroller
- Plugs into a standard 40-pin, 0.6in. wide DIP socket
- Example source code provided for Token firmware feature
- Up to 2 megabit per second data rate to host computer
- USB 1.1/2.0 Compatible
- Rev 2 silicon from FTDI
- No in-depth knowledge of USB required



The DLP-245-PB-G is a powerful integrated module based on the DLP-USB245M USB-FIFO adapter coupled with a PIC 16F877 MPU and royalty free USB drivers. It plugs into a standard 40 pin 0.6in wide DIP socket and is ideal for rapid prototyping and development of USB / PIC based designs. Token I/O code pre-programmed into the 16F877's ROM for basic port pin input/output capability including access to the A/D, EEPROM, and external digital temperature sensors. The 16F877's Flash ROM can be easily erased and reprogrammed if required using the optional DLP-Flash Programmer. Refer to the datasheet for full details.

MAVRK DEVELOPMENT KIT MODULES

The DLP-MAV-LCD1 combines a 2x16 character LCD module with a 5 switch joystick. Demonstration firmware that runs on the MAVRK main processor will be made available for developers wishing to incorporate this module into their project. The firmware will adhere to the communications requirements imposed by the MAVRK main processor and is completely compatible with the MAVRK (purchased separately) platform.

FPGA MODULES

Features:

- Micron 32M x 8 DDR2 SDRAM Memory
- Built-In Configuration Loader; Writes the Bit File Directly to SPI Flash via High-Speed USB 2.0 Interface
- 63 User I/O Channels: 24 Differential Pairs and 8 Global Clocks
- 66MHz Oscillator
- 133MHz DDR2 Interface Reference Design Provided
- USB Port Powered or 5V External Power Barrel Jack
- USB 1.1 and 2.0 Compatible Interface
- Small Footprint: 3.0 x 1.2-inch PCB and Standard 50-Pin, 0.9-inch DIP Interface

DLP-D USB BASED SECURITY DONGLE

The DLP-D Security Dongle is pre-programmed with a unique identification number (Serial Number) that is readable over USB but cannot be altered by any means. Since each serial number is unique, this device provides a way of linking application software to a specific hardware dongle with a high level of security.

Features:

- Hard-coded, unique serial number
- USB 1.1 and 2.0 compatible interface
- Small size; easily fits on key chain
- 3rd-Party support for application development

Applications:

- Access control
- Copy protection

FTDI USB-UART AND USB INTERFACE IC'S

FTDI X-CHIP SERIES IC'S - Full Speed USB IC Devices (FT200X, FT201X, FT220X, FT221X, FT230X, FT231X, FT240X):

Made up of 13 different package options, the X-Chip series complements FTDI's existing FT-R and FT-H offerings. The series supports a broad selection of interface types such as basic UART, full UART, FIFO and I²C, as well as FTDI's proprietary FT1248 I/O (including provisions for enhanced SPI). Devices in this series are capable of data rates of up to 3.4 Mbits/s, while maintaining low power consumption, <8mA (typical) when fully active and <125uA (typical) while in suspend mode. In addition, this series can detect a charging port and cause logic to switch from data transfer to charging mode. As with all FTDI IC's these devices are offered with a range of Royalty free FTDI developed drivers for 32 and 64-bit OS including Windows (2000, XP, VISTA, 7), Linux, Mac OS, Android and WinCE.

FTDI FT232 - Full Speed USB to Serial UART IC Devices:

The FT232 USB to UART device includes an internal 3V3 regulator and USB Transceiver that provides USB 1.1/2.0 full speed physical interface. The UART will operate from 300Baud to 3MBaud. The FT232RL/RQ also include an internal EEPROM and clock circuitry plus the FTDI Chip-ID security mode. The devices are offered with a range of Royalty free FTDI developed drivers for 32 and 64 bit OS including Windows (2000, XP, VISTA, 7), Linux, Mac OS, Android and WinCE.

FTDI FT2232D - Full Speed Dual UART/FIFO IC Devices:

The FT2232D device features two multi-purpose UART/FIFO controllers which can be configured individually in several different modes. As well as a UART interface, a FIFO interface and the Bit-Bang IO mode of the FT232 and FT245 devices, the FT2232D offers a variety of additional new modes of operation including a Multi-Protocol Synchronous Serial Engine (MPSSE) interface which is designed specifically for synchronous serial protocols such as I²C, JTAG and SPI bus. The FT2232D has an extended temperature range (-40ºC to +85ºC) and adds CPU FIFO mode.

FTDI Hi-Speed Single/Dual/Quad USB IC Devices (FT232H, FT2232H, FT4232H):

FTDI's Hi-Speed IC's are USB 2.0 Hi-Speed devices operating at 480Mbps. In addition to the standard UART mode, each of these devices supports FTDI's bit-bang modes and contains our multi-protocol synchronous serial engine(s) (MPSSEs) to allow communication using JTAG, I²C and SPI protocols. The FT2232H and FT2232H also include standard FIFO and the FT232H supports FTDI's FT1248 mode.

FTDI DB9-USB RETROFIT ADAPTERS

The DB9-USB range of modules provide a simple and fast method of migrating existing DB9 based connector UART interfaces to USB 2.0. The modules feature a USB 2.0 mini-B connector within a module which fits a standard 9-pin DB9 connector footprint. The DB9-USB family consist of 6 modules. Two of these operate at RS232 voltage levels while four of them operate at digital voltage levels (a choice of 5V or 3.3V).

FTDI USB-COM-PLUS MODULES

The USB-COM-PLUS modules provide a simple method of adapting legacy serial devices with RS232, RS422, RS485 interfaces to modern USB ports. The USB-COM-PLUS modules provide either single, dual or quad port options. Single port modules feature a USB 2.0 Full Speed (12Mb/s) interface while all multiport modules feature a USB 2.0 Hi-Speed (480Mb/s) interface. All modules are powered from the USB port. Maximum baud rates for RS232 versions are 1MBaud and for the RS422/485 versions are 3MBaud (single channel) and 10MBaud (multi-channel). The modules operating temperature range is -40°C to +85°C and are CE/FCC approved.

FTDI FT4232H USB HI-SPEED SERIAL/HUB MODULE

The FT4232H based USB Hi-Speed Serial/Hub Module is a USB interface expansion module targeted at connecting to the FTDI V2DIPx modules to expand the number of interfaces. However, it is not limited to this application. It can also be used as a hub device or an FT4232H evaluation module. The module has a USB 2.0 Hi-Speed hub chip which supports up to three external downstream USB ports: 2 via dual USB connector and 1 via the DIL connector pins.

FTDI MORPH-IC-II FPGA DEVELOPMENT MODULE

The Morph-IC-II is a USB based FPGA development module featuring the Altera Cyclone-II FPGA with the FTDI FT2232H USB to UART/FIFO/JTAG/SPI/I2C converter IC. The module provides integration of Hi-Speed USB capability (480Mbit/s) with an FPGA, to enable ultra-fast software based FPGA configuration/reconfiguration and communication using the FTDI royalty free drivers.

FTDI USB CABLE ASSEMBLIES WITH EMBEDDED ELECTRONICS

FTDI offers a wide range of USB based converter cables offering a variety of connectivity options. Connectivity options include conversion from USB to RS232, RS422, or RS485 and TTL based signaling interfaces. The cables feature integrated electronic assemblies featuring FTDI IC's simple easy-to-use connectivity for many USB conversion applications.

992-DB15F-VGA-TERM	DB15F-VGA-TERM	DB15 Female Breakout Board		
992-DB25F-TERM	DB25F-TERM	DB25 Female Breakout Board		
992-DB25M-TERM	DB25M-TERM	DB25 Male Breakout Board		
992-FT232RL-BO	FT232RL-BO	FT232RL USB to UART Breakout Board		
992-RJ11-TERM	RJ11-TERM	RJ11 Breakout Board		
992-RJ45-TERM	RJ45-TERM	RJ45 Breakout Board		
992-USB-TERM	USB-TERM	USB Breakout Board		

PICAXE BOARD

For quantities greater than listed, call for quote.

MOUSER STOCK NO.	Gravitech Part No.	Description	Price Each 1	Price Each 25
992-MICRO-101	MICRO-101	USB Powered MICRO-101 Kit		

CONVERTER BOARDS

For quantities greater than listed, call for quote.

MOUSER STOCK NO. Mfr.	Mfr. Part No.	Description	Price Each 1	Price Each 25
992	USB-SER	USB to UART Converter		
992	USB-SER-NANO-3V3	Nano Small +3.3V USB to UART Converter		
992	USB-SER-NANO-5	Nano Small +5V USB to RS-232 Converter		
992	RS232-ADP	Serial RS-232 UART Adapter		
992	XBEE-ADP3	XBee Adapter 3.3V		
992	XBEE-ADP5	XBee Adapter 5V		
992	XBEE-USB	XBee to USB Adapter		
992	VS1011-TH	VS1011 MP3 Decoder Module		

MICRO INTERFACE BOARDS

For quantities greater than listed, call for quote.

MOUSER STOCK NO. Mfr.	Mfr. Part No.	Description	Price Each 1	Price Each 25
I2C Series				
992	I2C-16IO	I2C 16-Bit GPIO Expander		
992	I2C-ADC	I2C 12-Bit, 8-CH Analog-To-Digital Converter		
992	I2C-ACC	I2C ±2.0g Dual Axis Accelerometer		
992	I2C-7SEG	I2C 4-DIGIT 7-Segment Display		
992	I2C-DAC	I2C 8-Bit DAC Digital-Analog Converter		
992	I2C-OSC	I2C 1KHZ to 68MHz Programmable Oscillator		
992	I2C-RTC	I2C Real-Time Clock		
992	I2C-TMP	I2C 12-Bit Digital Temperature Sensor		
992	I2C-TRN	Dual Bidirectional I2C Voltage-Level Translator		
BusIO Series				
992	MR-BUSIO-MAIN	BusIO Main Board		
992	MR-BUSIO-RELAY	BusIO Relay Board		

MICRO INTERFACE BOARDS (CONT.)

For quantities greater than listed, call for quote.

MOUSER STOCK NO. Mfr.	Mfr. Part No.	Description	Price Each 1	Price Each 25
BusIO Series (Cont.)				
992	MR-BUSIO-DCIN	BusIO DC Input Board		
992	MR-BUSIO-SW	BusIO Push Button Switch Input Board		
992	MRBUSIOPHOTORELY	BusIO Photo-Relay Board		
992	MR-BUSIO-DCOUT	BusIO DC Output Board		
992	MR-BUSIO-BUZZER	BusIO Buzzer Output Board		
992	MR-BUSIO-ACIN	BusIO AC Input Board		
992	MR-BUSIO-SSRAC	BusIO SSRAC Board		
Mini Series				
992	MR-MINI-4X4KEY	4x4 Matrix Keyboard Board		
992	MR-MINI-7SEG-CA	Mini 7-Segment Common Anode		
992	MR-MINI-7SEG-CC	Mini 7-Segment Common Cathode		
992	MR-MINI12BITDAC	Mini 12-BIT Digital-to-Analog Converter		
992	MR-MINI-AUDIO	Mini Audio Output Board		
992	MR-MINI-DC-MOTOR	Mini DC Motor		
992	MR-MINI-DUALPWR5	Mini +/- 5V Power Supply Board		
992	MR-MINIDUALPWR12	Mini +/- 12V Power Supply Board		
992	MR-MINILVLSHIFTR	Mini +5V <=> +3.3V Level Shifter		
992	MR-MINI-PWR5	Mini +5V Switching Power Supply Board		
992	MR-MINI-RTC	Mini I2C Real Time Clock (RTC)		
992	MR-MINISTEPMOTOR	Mini Stepping Motor Board		
Debug Series				
992	MR-TEST10P4RELAY	10PIN MRconnect 4-CH Relay Card		
992	MR-TEST10P8DIPSW	10 PIN MRconnect 8-DIP Switch		
992	MR-TEST-10P-8LED	10PIN Mrconnect 8-LED		
992	MR-TEST10P8PBSW	10PIN MRconnect 8-Push Button Switch		
992	MR-TEST-10P-8POT	10PIN Mrconnect 8-Potentiometer		
992	MR-TEST10PSWLED	10PIN Mrconnect 8-Slide Switch		

COMPONENTS

NEW PRODUCT

For quantities greater than listed, call for quote.

MOUSER STOCK NO.	Gravitech Part No.	Description	Price Each 1	Price Each 25
Adapters				
992-JACK21-M-TERM	JACK21-M-TERM	2.1mm Power Jack Breakout Adapter - M		
992-JACK21-F-TERM	JACK21-F-TERM	2.1mm Power Barrel Jack Breakout Adapter - F		
Cables				
992-JACK35-TERM	JACK35-TERM	3.5mm Stereo Jack		
992-JST-21MM	JST-21mm	JST to 2.1mm Barrel Jack		
992-JST-RB	JST-RB	JST Red/Black Cable 130mm		
992-USB-21MM	USB-21MM	USB to 2.1mm Power Jack Cable		
Relay				
992-QUICK-RELAY2	QUICK-RELAY2	Quick2 Relay Voltage Current Controller		
Sensors and Switches				
992-PIR-SEN	PIR-SEN	PIR Motion Sensor		
992-BUTT-12-5	BUTT-12-5	Momentary Push Button Switches - 12mm Square 6 colors		
992-JOY-ARC	JOY-ARC	Arcade Joystick - Short Handle		
Sockets				
992-15FX1-254MM	15Fx1-254mm	2.54mm (0.1") 15-pin Female header Arduino Nano Socket		
992-4FX2-254MM	4Fx2-254mm	2.54mm (0.1") 4-pin Dual Row Female Header		
992-20MX2-254MM	20Mx2-254mm	2.54mm (0.1") 20-pin Dual Row Male Header		
992-20MX1RA-254MM	20Mx1RA-254mm	2.54mm (0.1") 20-pin Break Away Male Header Right Angle		
Terminal Block				
992-BB-TERM3	BB-TERM3	3-Position Terminal Block Breakout

INTEL Chipsets

RoHS Compliant **This page of product is RoHS compliant.**

EXPRESS CHIPSETS

Intel Mobile and Desktop Express Chipsets deliver a platform controller hub with extensive I/O support. Intel's platform controller hub (PCH) connects Intel Core series processors with a motherboard via the Flexible Display Interface (FDI) and Direct Media Interface (DMI). The PCH Display Interface integrates the latest display technologies such as HDMI, DisplayPort, Embedded DisplayPort, Intel SDVO, and DVI, along with legacy display technologies.

INTEL Embedded Modules

RoHS Compliant **This page of product is RoHS compliant.**

NEXT UNIT OF COMPUTING (NUC)

Intel NUC is an intelligent device for small spaces or anywhere else you can imagine. A flexible, customizable engine, Intel NUC works for businesses and consumers, driving digital signage such as menus, news, weather, and corporate messaging, as well as powering home entertainment systems.

With either 3rd generation Intel Core processors or Intel Celeron processors on a 4x4-inch motherboard, you'll be amazed that such a tiny device can offer so much power. The only thing more amazing than Intel technology is what you can do with it. This next-generation device is available as a kit or a board that you can customize with the exact features and components you need.

For quantities greater than listed, call for quote.

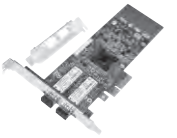
ADAPTERS

Intel's Ethernet Network Adapters Series includes Gigabit and 10 Gigabit server adapters that allow for an easy upgrade of server systems to connections designed to meet the throughput and latency requirements of bandwidth-hungry applications. Gigabit desktop adapters maximize system performance for PCs with PCI Express slots. Intel's Ethernet Converged Network Adapters deliver 10 Gigabit Ethernet on the latest server platforms. PRO/1000 Gigabit Server Adapters bring cost-effective Gigabit performance to desktop or network environments.

Features:
- Intelligent Offloads
- Low Profile and Full Height

Single Port Adapter



Dual Port Adapter

LANTRONIX Embedded Device Servers

RoHS Compliant **This page of product is compliant.**

Lantronix offers Ethernet and 802.11 wireless networking solutions for end users and manufacturers alike. Their embedded modules enable OEMs to add full Ethernet and/or wireless connectivity to their products so they can be managed over a network or the Internet – at a fraction of the time and expense required to develop an in-house solution. And Lantronix products offer the highest levels of data security available today.

XPICO DEVICE SERVER MODULE

The chip-sized xPico is an extremely compact networking solution that enables Ethernet connectivity on virtually any device with a serial interface. The included Lantronix device server application and full IP stack allow seamless remote access to device data simplifying design integration while providing robust connectivity. As the smallest embedded device server in the world, xPico can be utilized in designs typically intended for chip solutions.

Features:
- Chip-sized footprint: 24mm x 16.5mm
- Complete device server application with full IP stack and web server
- Serial data rate of up to 921Kbps
- Security: 256-bit AES Encryption
- Internal storage capacity: 384KB for web pages

Development Kit Contents:
- xPico Module
- xPico Evaluation Board
- 3.6V-wall-mount power supply AC/DC, 1A
- RS-232, DB9F/F, 10ft, null modem cable
- Ethernet cable 10ft

XPORT® PRO™

The thumb-sized XPort® Pro™ is Lantronix' most powerful, self-contained embedded networking module. Footprint compatible with the popular XPort® and running either Linux or Evolution OS™ operating systems, the XPort Pro eliminates the complexity of designing network connectivity into a product and allows you to deploy advanced applications on the edge device itself.

✻ XPort® Pro™ Module Sold Separately. ✻ ✻ Sold Separately for Development Kits.

XPORT®/XPORT® AR - EMBEDDED DEVICE SERVERS

XPort® is the most compact, integrated solution available to web-enable any device with a serial interface. By simply adding XPort to a product design, device manufacturers can now offer Ethernet connectivity as a standard feature within weeks—instantly increasing product value, enhancing end-user experience and facilitating new service delivery options.

XPort® Features:
- Remote command and control of edge devices
- Real-time edge device status via e-mail alerts
- 256-bit AES encryption for secure communications
- EMC/EMI-compliant; RoHS-compliant

XPort® AR Features:
- A fully programmable device computing platform based on corporate IT standards – Cisco®-like CLI, XML, RSS
- Provide robust "data center grade" security, including SSL and SSH, for networked devices
- Offer true IEEE 802.3af compliant pass-through Power over Ethernet (PoE)

MATCHPORT® AR LINUX SOFTWARE DEVELOPER'S KIT

The MatchPort® AR Linux Software Developer's Kit (SDK) is a highly-integrated embedded hardware and software suite that allows Linux developers to easily create value-added applications on Lantronix' small yet powerful embedded networking module. Built on the stable 2.6 Linux kernel, the SDK includes all the components required for building secure network enabled products using the Linux OS.

✻ Must be ordered separately for the MPDK1000-LNX-02 kit.

For quantities greater than listed, call for quote.

MATCHPORT™ - EMBEDDED WIRED AND WIRELESS DEVICE SERVERS

MatchPort b/g Features:
- Extremely affordable embedded 802.11 b/g wireless networking
- Bulletproof security with IEEE 802.11i-PSK, WPA-PSK, TKIP and optional 256-bit AES end-to-end encryption
- Full TCP/IP stack, web server and Windows deployment software
- Up to 230Kbps data rate
- FCC Class B, UL and EN EMC and safety-compliant

MatchPort® b/g Pro Features:
- Adds WiFi to devices with the highest WPA2/802.11i enterprise-grade security and authentication protocols
- Lantronix SmartRoam™ technology provides seamless mobile connectivity and improved reliability
- Includes full TCP/IP stack, CGI, AJAX web server and Windows deployment software
- Powerful applications customization platform with 32 Bit 159 MIPS (Dhrystone 2.1) Processor, 8MB Flash/8 MB SDRAM
- Built-in Ethernet to wireless bridging

MatchPort AR Features:
- Application-ready, secure SSL/SSH networking module for high-volume applications
- Built-in CGI and AJAX web server
- Pin compatible family includes 802.1 b/g wireless
- Ethernet MAC/PHY; add only RJ45 jack and magnetics to device's PCB

MatchPort NR Features:
- Interface: CMOS (Asynchronous) 3.3V-level signals, rate is software selectable (300 bps to 921,000 bps)
- Serial Line Formats: 7 or 8 data bits, 1-2 Stop bits
- Modem Control: DTR, DCD
- Flow Control: XON/XOFF (software), CTS/RTS (hardware), none

MatchPort b/g Shown

Products may be RoHS compliant. Check mouser.com for RoHS status.

PREMIERWAVE EN

PremierWave™ EN delivers a new dimension of WiFi networking with the highest levels of security to virtually any device or electronic product. It provides affordable connectivity in a compact form factor, enabling OEMs to add WiFi or wired Ethernet networking to their products on a single PCB design.

Features:

- 802.11 abgn solution with Dual Band Radio (2.4GHZ and 5GHz)
- Linux Operating System with IPV6
- Includes full TCP/IP stack, web server
- Powerful applications customization platform with 32 Bit ARM9 Processor
- Virtual IP (VIP) Access™ for gaining remote connectivity even behind firewalls
- Low power consumption modes
- Robust set of interfaces which include Ethernet, Serial, USB, I2C, and SPI

RoHS Compliant

EMBEDDED DEVICE SERVERS

XPort® Direct+™ Features:

- Delivers high-performace Ethernet connectivity and web server capabilities
- Powerful and affordable networking for any device with a serial interface on its microcontroller
- Integrated module with RJ45 and dedicated networking SoC
- Web server, TCP/IP protocol stack and Windows deployment software
- Up to 921Kbps data rate
- Compact low profile (<12mm)
- 2 x 12 pin, 2mm headers
- Three GPIO pins
- RS-232/RS-485 ready
- 256-bit AES encryption for secure communications

EXTERNAL DEVICE SERVERS

PREMIERWAVE® XC GSM/GPRS DEVICE SERVER

Lantronix PremierWave® XC GSM/GPRS Device Server is a high performance, multi-port secure device server that offers Ethernet or GSM/GPRS connectivity for remote access and easy management of machines and equipment over the network and across the Internet. This device server provides bullet-proof security by offering a variety of robust data encryption and authentication options.

Features:

- Provide network connectivity to virtually any device with a serial port
- Standard and customizable serial data rates from 300 to 921 Kbps
- Quad-band: 850/900/1800/1900 MHz
- Modes: Software selectable RS-232/422/485
- SSL v3, SSH v2 Client & Server, Supports up to 1024-bit certificates
- Antenna: 2dBi, 50 Ohm, SMA Connector

XSENSO™ ANALOG DEVICE SERVER

xSenso™ is a compact DIN-rail or wall mount solution that enables sensors with analog outputs (voltage or current) to easily and transparently send real-time data to any node on the network or over the Internet.

Features:

- Channels: (2) Differential inputs (screw terminal connections)
- Authentication, up to 256-bit encryption, SSL, SSH
- Dynamic web based monitoring, charting, and data logging
- Email and text message alert notification

WiBox® - Wireless External Device Servers

WiBox® dual-port device servers enable you to connect serial devices to 802.11b/g wireless networks, quickly and easily. By merging wireless communications and Lantronix device server technology, WiBox simplifies connectivity to devices in applications where mobility is required or cabling is impractical.

Features:

- Enables access to remote devices while minimizing costly cabling
- Provides network mobility for untethered communication
- Two DB9 DTE serial ports supporting RS-232, RS-422 or RS-485 communication
- Compact size enables it to fit almost anywhere
- Industry standard 802.11b/802.11g wireless interface
- Secure wireless communication: IEEE 802.11i-PSK, WPA-PSK, TKIP
- 256-bit AES – end-to-end encryption
- Ethernet-or-wireless bridging

MIDE TECHNOLOGY Energy Harvesting

RoHS Compliant **This product is RoHS compliant.**

ENERGY HARVESTING CONDITIONING CIRCUIT

Features:
- Converts the AC output from a piezoelectric energy harvester to a regulated DC output
- Simple and Easy Charge Management for Vibration Energy Harvesting
- Integrates directly with all Volture™ Energy Harvesters
- Parallel or Series Piezoelectric Connection– Improved Efficiency
- User Selectable DC Output (1.8 V, 2.5 V, 3.3 V, 3.6 V)

Applications:
- Industrial Health Monitoring Network Sensors
- Condition Based Maintenance Sensors
- All Air, Land, and Sea Vehicle Sensors
- Battery and Hard Wired Power Replacement
- Mobile Asset Tracking
- Tire Pressure Sensors
- Oil and Gas Sensors
- Wireless HVAC Sensors

For quantities greater than listed, call for quote.

SLAM STICK™ VIBRATION RECORDER

Features:
- Simple and Easy to Use
- Small and Lightweight
- High Speed - 3.2 KHz Sampling Rate
- Rechargeable
- Characterizes Vibration Profile for Energy Harvesting Applications
- Dust Proof Enclosure
- Simple Analysis & Configuration Software (Included)

Applications:
- Industrial Health Monitoring Network Sensors
- Characterizing Energy Harvesting Vibrations
- Equipment Installation Verification
- Vibration Characterization for Damping Purposes
- Equipment Monitoring
- Bearing Monitoring

For quantities greater than listed, call for quote.

PIEZOELECTRIC SENSOR AND ACTUATORS

Features:
- Packaged Piezos
- Robust Packaging
- Easy Connection
- Increased Life-Time
- Hermetically Sealed

Applications:
- Vibration and Strain Sensing
- Passive Vibration/Strain Detection
- Precise Actuation
- Electronics Cooling

For quantities greater than listed, call for quote.

RJMODEM™

The Multi-Tech Serial Data RJModem creates communication-ready devices by integrating modem functionality into the most compact, integrated device. The first-of-its kind RJ11 form factor includes the controller, data pump, DAA and RJ-11 connector providing device manufacturers with the ability to integrate dial-up connectivity into any product design.

NETBURNER Embedded Modules

Products may be RoHS compliant. Check mouser.com for RoHS status.

32-BIT 10/100 ETHERNET CORE PROCESSOR MODULES

NetBurner core modules allow you to quickly and easily create an embedded product, create a network-enabled product, or add network connectivity to an existing product. These modules can be used as the main processor or as a secondary network co-processor. Features include: 10/100 Ethernet, digital, analog and serial control.

32 BIT MOD5213 HIGH PERFORMANCE EMBEDDED PROCESSOR MODULE

Process Specifications:
- 32-bit Freescale ColdFire 5213 running at 66MHz

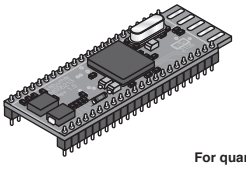
Hardware Specification:
- 32KB SRAM
- 256KB Flash
- MAC Module and HW Divide
- Low-power optimization
- Four 32-bit timer channels with DMA capability
- Four 16-bit timer channels with capture/compare/PWM
- 4-channel 16-bit/8-channel 8-bit PWM generator
- Two periodic interrupt timers (PITs)
- 4-channel DMA controller
- 8-channel 12-bit ADC
- Up to 33 general-purpose I/O
- System integration (PLL, SW watchdog)
- CAN 2.0B controller with 16 message buffers
- Three UARTs with DMA capability

Software Development:
- NetBurner Development Kit includes: Mod5213 Development Board, Real-Time OS, C/C++ Compiler, Integrated Development Environment (IDE), Graphical Debugger, configuration and deployment tools.

Connectors:
- Two standard single row 20-pin 0.1" headers
- PIN Dimensions: 1.9" x 0.6"

Physical Characteristics:
- Industry Standard 40-pin DIP
- Dimensions: 2.0" x 2.6"

Power Requirements:
- DC Input Voltage: 4V - 7V, or 3.3V Regulated
- Operating current: 120mA Environmental
- Operating Temperature: -40°C ~ +85°C



RoHS Compliant

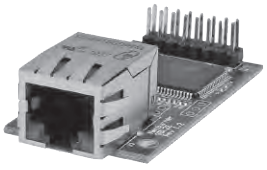
SBL2E SERIAL TO ETHERNET MODULE

Features:
- 32-bit Freescale Coldfire 52236 @ 50MHz
- Two TTL serial ports
- RS-232, RS422/485 ready (require external level shifter)
- Four 12-bit analog to digital inputs
- Up to 10 General Purpose I/O Signals
- 10/100 Ethernet
- Serial to Ethernet over TCP or UDP
- DHCP/Static IP Support
- Baud rates up to 115,200 bps
- Custom serial packetization options
- Hardware and software flow control
- Web Based Configuration

Development Kit Contents:
- SBL2e-200IR
- SBL2e-ADPT-100CR evaluation board



For quantities greater than listed, call for quote.

SB7X 32-BIT SERIAL-TO-ETHERNET PROCESSOR BOARDS

SB70 Processor Board Features:
- Processor: 32-bit Freescale ColdFire 5270 with integrated 10/100 Ethernet MAC
- Speed: 145MPS @ 150MHz
- Network Interface: 10/100BaseT with RJ-45 Jack
- Flash Memory: 512KB
- SDRAM: 2MB
- Power Requirements: 480mA @ 5V
- LEDs: Link, Speed/Data, Power
- Network Protocols: ARP, DHCP, BOOTP, TCP, UDP, ICMP, Telnet, HTTP, SNMP
- Dimensions: 3.25" x 2"

SB72 Processor Board Features:
- Speed: 63MPS @ 66MHz
- Network Interface: 10/100BaseT with RJ-45 Jack
- Serial Ports Supported: RS-232, RS-422, RS-485, TTL
- Flash Memory: 512KB
- SDRAM: 8MB
- Power Requirements: 480mA @ 5V
- LEDs: Link, Speed/Data, Power
- Network Protocols: ARP, DHCP, BOOTP, TCP, UDP, ICMP, Telnet, HTTP, SNMP
- Dimensions: 3.25" x 2"

Development Kit Contents:
- SBXX Processor Board
- Adapter board to assist in development. It is not required to operate. The adapter board includes a switching power supply, RS-232 level shifters and two DB-9 connectors
- CD-ROM containing source code, development tools, manuals and documentation
- Cross-wired and straight-through twisted pair network cables
- Serial cable
- 12 VDC power supply (US and Canada only)

RoHS Compliant

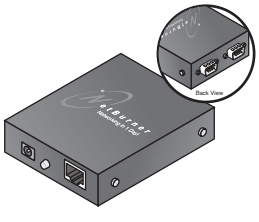
SB72-EX DUAL PORT SERIAL-TO-ETHERNET EXTERNAL DEVICE

SB72-EX to Network-Enable Existing Applications:
The SB72-EX network-enables serial devices right out of the box. No programming or development is required; the SB72-EX is pre-programmed to convert RS-232, RS-422, RS-485, and TTL data to Ethernet, enabling communication with the serial device over a network or the Internet. The onboard web server provides easy device configuration using a standard web server.

Hardware Specifications:
- 10/100BaseT with RJ-45 connector
- 32-bit Motorola ColdFire 5272 with integrated 10/100 Ethernet
- 2MBytes flash, 8MBytes of SDRAM
- Power: 12V, 500mA
- Operating Temperature: 0°C to 70°C
- Dimensions: 4.2" x 3.0"
- Weight 5 oz
- UL and CUL approvals
- LEDs: Link, Speed/Data, Power
- The 2 UARTS can be configured:
  Two RS-232 ports
  One RS-232 port, one RS-485/422 port (full or half duplex)

Network Protocols Supported:
- ARP, DHCP, BOOTP, TCP, UDP, ICMP, Telnet, HTTP, SNMP

Note: additional protocols supported with development kit.



RoHS Compliant

For quantities greater than listed, call for quote.

Nurve Networks CHAMELEON SYSTEM

The Chameleon is a credit card sized computer with 2 microprocessors.
The Chameleon has numerous I/O interfaces, including composite video for NTSC/PAL generation, VGA, audio out, and PS/2 .
The dual processor design of the Chameleon allows for video, audio, and I/O tasks to be offloaded to the Propeller chip via a high speed SPI interface.
Alternatively, both processors can be independently programmed and used.

Package includes:
- Mini solderless breadboard 1.25" x 2" (affixes to right hand side of Chameleon)
- 150+ page electronic manual covering hardware, software, and numerous programming tutorials
- DVD-ROM including all tools, and numerous examples with complete driver

Chameleon AVR 8-Bit System
- Chameleon AVR 8-Bit is 100% code compatible with the Arduino board
- Chameleon comes with the Arduino bootloader pre-loaded, so development can be done with the Arduino tool, and programs loaded directly to the Chameleon

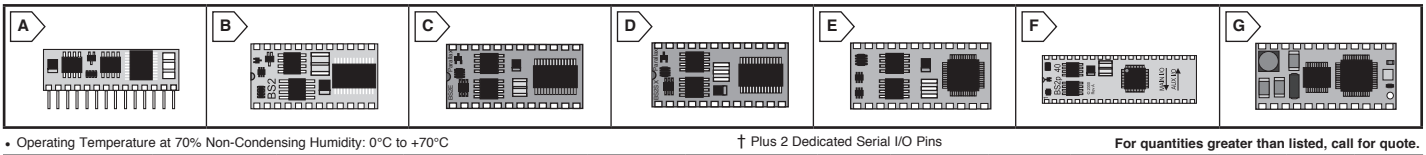
PARALLAX BASIC Stamp Modules and Accessories

Products may be RoHS compliant. Check mouser.com for RoHS status.

BASIC STAMP MODULES

BASIC Stamps are small computers with 8 or 16 I/O lines that can be connected to TTL level devices and also, with a few extra components, solenoids, relays, and RS232 networks. Their simple language and easy interfacing make BASIC Stamps ideal for many applications for industrial, educational, and hobbyist customers. BASIC Stamps require only editor software, a prototype area, and cable to get started. Each BASIC Stamp has on board it's own non-volatile EEPROM, voltage regulator, resonator, and microcontroller.



• Operating Temperature at 70% Non-Condensing Humidity: 0°C to +70°C

† Plus 2 Dedicated Serial I/O Pins

For quantities greater than listed, call for quote.

BASIC STAMP DISCOVERY KIT - SERIAL (WITH USB ADAPTER AND CABLE)

Our most popular BASIC Stamp microcontroller is the BS2-IC module. Widely used in education, hobby, and industry, this module has enough program space, execution speed, and I/O pins for many applications. Now featured with the What's a Microcontroller curriculum and parts kit, this Starter Kit has our highest recommendation. The Discovery Kit is an incredible value!

Build over 40 Hands On Projects

With the latest edition of this kit, you will receive the What's a Microcontroller? (WAM) parts and text making the Discovery Kit a bona fide "Getting Started" kit. With the WAM kit you'll get your feet wet through a series of over 40 activities designed to provide you with the best possible introduction to the world of BASIC Stamp modules. The text contains clear explanations, defines electronics terms in a friendly manner, and most importantly builds your confidence so you can start building your own electronics inventions.

For quantities greater than listed, call for quote.

UNDERSTANDING SIGNALS PARTS AND TEXT/PARALLAX OSCILLOSCOPE

The Understanding Signals Parts and Text Kit adds a 144-page student guide and many electronic components to the Parallax USB Oscilloscope. Learn how to generate, view, and measure a variety of wave forms. Each activity includes a BASIC Stamp®-controlled example circuit and code, directions for configuring the oscilloscope and placing the probes, and screen-captures of the Parallax USB Software interface displaying the signal.

A Board of Education with a BASIC Stamp 2 or a HomeWork Board is needed to run the experiments in this kit.

STAMPWORKS EXPERIMENT KIT

It's easy to get started micro-controlling your world with StampWorks. The StampWorks manual includes 35 experiments based on the BASIC Stamp® 2 microcontroller and the Professional Development Board (included). StampWorks gives you the hardware, the electrical components and, most importantly, the know-how to become a confident embedded programmer. Working your way through StampWorks you will learn about efficient embedded design, connecting circuits and "smart" sensors to the BASIC Stamp, adding computer control to your projects, and "Power PBASIC" programming techniques.

After you've worked your way through StampWorks you'll be able to: flash LEDs, use 7-segment and LCD displays, monitor one or several push-buttons or switches, add sounds and sound effects to your projects, build a simple light-controlled Theremin, control servos and stepper motors, measure temperature, voltage, and so much more! When you are finished, you will be able to write your own BASIC Stamp programs to control your hobby, engineering, and student projects using a variety of electronic circuits - and you'll be able to do it with the confidence.

SX TECH TOOL KIT/SX CHIPS/PROGRAMMERS AND PROTO BOARDS

The popular SX Tech Tool Kit is an excellent starting point to get you developing SX projects with Parallax's SX-Key programming tool. Upon receiving the kit, you will be able to program SX chips within the hour. A power supply is not included.

The SX-Key is Parallax's primary development tool for the SX line of microcontrollers, supporting every chip that is commercially available. Using the free SX-Key software, the SX-Key programming tool can program SX chips in-system and perform in-circuit source-level debugging. Also at the user's fingertips is an on-board programmable clock. The frequency output of this clock is adjusted from the software with a slider bar between 400kHz and 100MHz. The software operates on Win98/NT/2K/XP platforms.

RABBIT Core Modules and Development Kits

Products may be RoHS compliant. Check mouser.com for RoHS status.

RCM2XXX RABBITCORE MICROPROCESSOR MODULES

The RabbitCore family of microprocessor core modules is designed to facilitate rapid development and implementation of embedded systems. The RabbitCore mounts on a user-designed motherboard and acts as the controlling microprocessor for the user's system. Small in size but packed with powerful features, these core modules give designers a complete package for control and communication.

RCM3000 AND RCM3010 RABBITCORE

The RCM3000 RabbitCore is our powerful and feature-packed 10Base-T Ethernet microprocessor core module. Powered by the new Rabbit 3000™ - the "EMI-Free microprocessor"—the RCM3000 is the ideal option for designers who want to rapidly develop and implement embedded systems with fully integrated Ethernet connectivity. Measuring only 2.73" x 1.85" (69 x 47mm), the RCM3000 operates at 3.3V (with 5 V-tolerant I/O) and features 6 serial ports. Built-in low-EMI features, including a clock spectrum spreader, help designers eliminate the kind of emissions-related problems that frequently derail tight development schedules.

For quantities greater than listed, call for quote.

RCM3200 RABBITCORE MODULES

The RCM3200 RabbitCore microprocessor core module is the ideal option for designers who want to rapidly develop and implement embedded systems with fully integrated 10/100Base-T Ethernet connectivity. Measuring only 2.73" x 1.85" (69 x 47mm), the RCM3200 operates at 3.3V (with 5 V-tolerant I/O), runs at up to 44.2MHz, and features 6 serial ports. Built-in low-EMI features, including a clock spectrum spreader, practically eliminate EMI problems, helping OEMs pass CE and regulatory RF emissions tests.

For quantities greater than listed, call for quote.

RCM3365 AND RCM3375 RABBITCORE MODULES

The RCM3365 and RCM3375 RabbitCore modules present a new form of embedded flexibility with removable "hot-swappable" memory cards. Supporting on-board 16MB NAND Flash as well as memory cards of up to 128 MB (sold separately), these RabbitCore modules are ideal for data intensive applications requiring low-power operation.

RoHS Compliant

RCM3400 AND RCM3410 RABBITCORE MODULES

The RCM3400 analog RabbitCore provides a known-good processor and analog input subsystem for OEMs to quickly integrate into custom designs. The RCM3400 features a low-EMI Rabbit 3000-based CPU subsystem running at 29.4 MHz, with 512K Flash / 512K SRAM or 256K Flash / 256K SRAM, 5 serial ports, and 8 channels of programmable gain analog input in an extremely small footprint (1.37" x 1.16" / 34 x 29mm).

For quantities greater than listed, call for quote.

RCM3600 AND RCM3610 RABBITCORE MODULES

The RCM3600 RabbitCore is the lowest priced Rabbit 3000 microprocessor based core module designed for a wide variety of applications.

Design Advantages:
- Ready-made platform for fast time-to-market, up to 3 months design integration time savings
- Compact size
- Dynamic C® development environment for real-time development and debugging
- Exceptionally fast performance for math, logic, I/O

Applications:
- Handheld devices and Instrumentation
- Remote Data Logging

RoHS Compliant

RCM3750 RABBITCORE MODULE

The RCM3750 features 10/100Base-T connectivity, 512K Flash / 512K SRAM, 4 serial ports, and an extremely small footprint (2.95" x 1.20" / 75 x 30mm). Extensive demo programs, application templates, and optional software modules enable rapid development of secure network embedded systems. Built-in low EMI features, including a clock spectrum spreader, practically eliminate EMI problems, helping OEMs pass European CE and other regulatory RF emissions tests.

Applications:
- Remote Date Logging
- OEM Serial to Ethernet products
- Network-Enabling Security
- Acess Systems
- Building Automation
- Industrial Controls

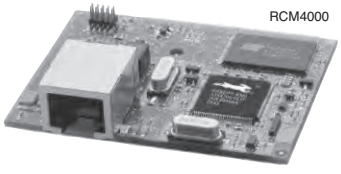
RCM4000 RABBITCORES – EMBEDDED NETWORKING AND CONTROL

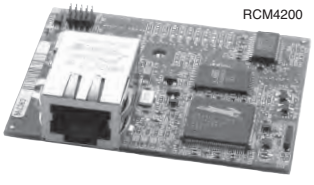
The new Rabbit 4000 is a high-performance, low-EMI microprocessor designed specifically for embedded control, communications, and Ethernet connectivity. The Rabbit 4000 outperforms most 16–bit processors without losing the efficiency of an 8–bit architecture. Extensive integrated features, glueless architecture and 10Base-T Ethernet facilitate rapid hardware design, while a new C-friendly instruction set promotes efficient development of even the most complex applications.

The Rabbit RCM4XXX series of RabbitCore modules enable powerful embedded networking and control in a small package. RabbitCores mount directly onto a user designed motherboard, and can interface with CMOS-compatible digital devices via the user's motherboard. Programs are developed with our industry-proven Dynamic C development system that includes an editor, compiler, and in-circuit debugger.

RCM4000



RCM4200



Application Possibilities:
- Wireless device/data management
- Serial-to-Ethernet applications
- Remote monitoring and communications
- Web-enabling devices
- Device/data management and control
- Device-level control
- Remote data logging
- Asset management
- Security Access Systems

RCM5600W - MINI-MICROPROCESSOR WI-FI CORE MODULE

The MiniCore RCM5600W module offers 802.11b/g Wi-Fi connectivity which includes WPA2, WPA and WEP security standards, allowing easy integration and interoperability within Wi-Fi networks. With six serial ports, four configurable as SPI, the RCM5600W can easily embed into any existing or new design and is pin compatible with current and future MiniCore products.

A Development Kit offers the essential hardware tools and includes the Dynamic C® software development system. The Kit contains a prototyping and interface board with USB connections that will allow you to evaluate and debug the RCM5600W.

RCM6700 SERIES MINICORE DEV KITS

The ultra-compact MiniCore RCM6700 is ideal for today's smart energy initiatives as well as other applications that require a cost effective web-enabled device server. The RCM6700 series provides up to 6 serial ports, configurable I/O and control features such as PWM. Furthermore, the RCM 6700 series offers a much greater feature set then comparable device servers, while at a lower cost.

For quantities greater than listed, call for quote.

RCM6700 SERIES MINICORE

The RCM6700 series is fully programmable, taking advantage of processor peripherals. The programming environment, Dynamic C, is an ANSI C compatible development environment that provides a royalty free TCP/IP stack and Wi-Fi support. Various protocol support such as ZigBee, Modbus and BACnet are also available to help reduce development costs and time-to-market.

SILEX TECHNOLOGY Device Servers & Embedded Modules

Silex Technology Inc. provides networking and wireless solutions for virtually any printer, USB device, Serial device, as well as Embedded Wireless and Embedded Ethernet solutions. Silex products provide secure wireless and wired connectivity for a wide range of devices in a number of different applications, including medical, weights and measures, printers, enterprise and home networking, transportation, and much more.

WIRELESS/WIRED SERIAL DEVICE SERVER

Silex serial device servers allow you to connect any RS-232 or UART-compatible serial device. They include a comprehensive TCP/IP protocol stack plus extensive management tools to make it easy to connect and manage multiple serial device servers over a network. For maximum flexibility, Silex offers both wireless serial device servers and serial to Ethernet (wired) device servers with external or embedded form factors.

SX-500

The SX-500 is an external 802.11b/g wireless or 10base-T/100base-T wired serial server with advantages such that include:

- Industry-leading security including WPA, WPA2, and WEP, plus 802.1x authentication with the most commonly used EAP types
- Easiest way to connect an existing RS-232 device to a wireless or wired network
- Rugged pre-plated galvanized steel enclosure with IP40 industrial grade rating

For quantities greater than listed, call for quote.

MOUSER STOCK NO.	Silex Part No.	Description	Price Each 1	10	50	100
702-SX-500-1031	SX-500-1031	External 802.11b/g Serial Server, Single Port, US Power Supply				

EMBEDDED WIRELESS MODULES

Silex offers both intelligent and radio-only embedded wireless modules to meet almost any wireless application. Their intelligent embedded wireless modules feature a complete TCP/IP networking stack plus the industry's most extensive wireless security, while their radio modules offer full 802.11a/b/g connectivity in mini PCI or SDIO form factors.

SX-10WAG/WG

Designed specifically for embedded applications, the Silex SX-10WAG and SX-10WG are Mini PCI radio modules that provide superior features such as:

- FCC Limited Modular Approval for simplification of OEM FCC testing requirements
- Meets a wide range of global regulatory certifications/standards
- Includes antenna with cable (no need to source separate antenna) and supports diversity antenna configurations

SX-560

Features the most extensive wireless security in the industry, including 802.1x Extensible Authentication Protocol (EAP) with all major EAP types and WPA2, WPA2-PSK, WPA, WPA-PSK, and WEP wireless security. The SX-560 is a powerful programmable 802.11a/b/g wireless embedded module with major competitive advantages like:

- Very low power consumption for applications like battery operated devices
- Linux operating system with user programmability

PRINT AND USB DEVICE SERVER

Silex MFP/AIO print servers are the only print servers designed specifically to handle all types of USB printers, including virtually any inkjet, multifunction peripheral, or all-in-one printer. This capability is made possible by Silex's SX Virtual Link software, which exactly emulates a hardwired USB port and thereby ensures compatibility with virtually any printer driver.

The SX-2000WG features 802.11b/g wireless capabilities to allow you to locate your high-speed USB printer anywhere in your home or office. Its advantages include:

- Virtual Link software for compatibility with almost any Inkjet /MFP/AIO USB printer
- Transparent operation with your Windows and MacOS X applications
- Can connect up to 14 additional USB devices (scanners, network storage, etc) to the network

For quantities greater than listed, call for quote.

ETHERNET CONVERTERS

Silex's Ethernet converters make it easy for you to migrate your existing Ethernet devices into new environments. Simply plug the converter into your device, and you're up and running on your new network in minutes with no software modifications required.

SX-2600CV

The SX-2600CV is an IPv4 to IPv6 converter that ensures that your Ethernet devices will be compatible with current and future TCP/IP networks. Its advantages include:

- Makes existing network devices operable in IPv6 environments
- Works in environments that support both IPv4 and IPv6
- Easy to install and use with software transparent operation devices will be compatible with current and future TCP/IP networks.

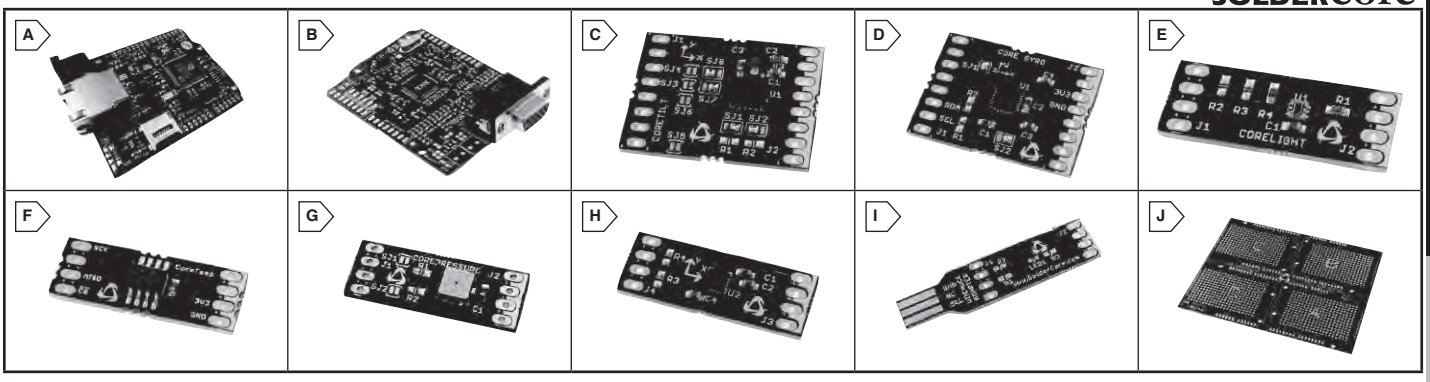
SOLDERCORE Development Boards



SOLDERCORE MAIN BOARD

SC-CPU SolderCore Main Board is a complete development platform consisting of an Arduino form-factor microcontroller "CPU" board with a new and exciting software development environment called CoreBASIC. The SC-CPU SolderCore Main Board features a TI LM359D92 Cortex-M3 processor capable of running at clock speeds of up to 80MHz and provides a compact, flexible solution for rapid product development. SolderCore is compatible with a large range of third party plug-in PCBs to expand its capabilities.

Features:

- 80MHz ARM Cortex-M3 processor
- 512kB of flash
- 20 user-programmable I/O pins + 6 power pins; can be programmed to perform alternative functions including I2C, SPI, UART, PWM, CCP, ADC, QEI, and CAN
- Micro-AB USB On-The-Go connector
- Spring-loaded microSD card holder
- 2.2mm barrel jack for power supply, 6 - 9V; reverse polarity protected
- Standard Cortex 10-pin JTAG connector
- Two power indicator LEDs
- Five user programmable LEDs
- Reset button

For quantities greater than listed, call for quote.

PROTEUS SHIELD

SolderCore SC-TRANS Proteus Shield - Arduino Form-Factor Translator Board can be used to reliably and safely connect 3.3V and 5.0V Arduino form factor development modules. This allows SolderCore to be used with the huge array of existing Arduino shields, without the worry of damaging the shield or the SolderCore. Furthermore, it allows the SolderCore range of shields to be used with 5.0V Arduino processor modules. SolderCore SC-TRANS Proteus Shield - Arduino Form-Factor Translator Board uses a 22-bit bidirectional voltage translator IC to bridge the 3V3/5V gap. The device is predominantly designed for digital signal conversion, however, a basic buffered signal conversion for analog signals is also provided.

Features:

- Bi-directional 3.3V to 5.0V translation
- Supports open drain/collector and standard push pull CMOS I/O
- Support for analog signals

For quantities greater than listed, call for quote.

SENSE-CORE MODULE ADAPTER BOARD

SolderCore SC-SENSE SenseCore Adapter Board is a SolderCore shield developed for rapid sensor integration. SenseCore features 4 Sensor Expansion Interface (SExI) compliant sockets, for connection to 4 full or 8 half non stacked sensor boards. SolderCore SC-SENSE SenseCore Adapter Board provides a neat and rapid test platform for an array of plug-in digital (UART, I2C, and SPI) and analog sensors.

Features:

- Neat and rapid test platform for plug-in digital (UART, I2C, and SPI) and analog sensors
- 4 full-width SExI-compliant interfaces
- I2C sensors can be stacked on top of one another
- Bus expander for implementation of SPI device select and UARTs; thus only
- Two lines and power required to interface to four full-width SExI-compliant sensor boards
- Optional IRQ line for interrupt driven communication to bus expander
- Flexible power supply, for compatibility with 3.3V and 5V systems

For quantities greater than listed, call for quote.

RABBIT Single Board Computers

LP3500 FOX

The LP3500 Fox is a low-power single-board computer designed to operate reliably virtually any place it is deployed, especially where power is limited, such as in portable, hand-held, battery-powered, and remote monitoring systems. The LP3500 features built-in analog and digital I/O and consumes less than 20mA when fully operational and less than 100µA in power-save mode.

BL4S100 & BL4S200 SINGLE BOARD COMPUTERS

The BL4S100 is a low-cost Rabbit® 4000 microprocessor based single-board computer series that delivers ZigBee and Ethernet capability. On-board ZigBee RF modules offer mesh networking functionality to make networking easy to deploy and simple to maintain. With both Ethernet and ZigBee connectivity integrated onto the BL4S100, the series delivers a low-cost platform to design a ZigBee enabled Ethernet network.

Rabbit's BL4S200 series of single-board computers deliver the features and wireless connectivity to support networking for industrial control applications. In addition to the Ethernet and Fast Ethernet versions, the BL4S200 offers a choice of Wi-Fi and ZigBee enabled wireless networking options. The BL4S200 provides reliable hardware that has been certified by the FCC and other international agencies.

BL1800 JACKRABBIT

The Jackrabbit is RABBIT's most compact and lowest cost C-programmable single-board computer. The Jackrabbit is the perfect solution for applications that have significant cost and size constraints but need a dependable SBC. Fast number crunching is provided by a Rabbit 2000 microprocessor operating at up to 29.5MHz.

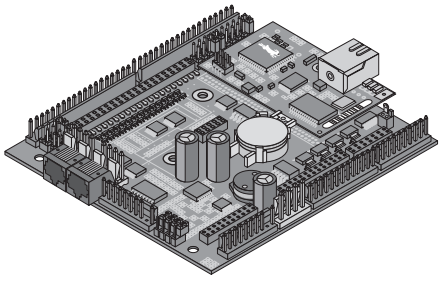
RABBIT Single Board Computers and Software

BL2600 WOLF - MODELS BL2600, BL2610

The BL2600 Wolf single-board computer provides embedded systems engineers a complete and expandable performance package. Two standard models-one with 10/100 Ethernet and one without 10/100 Ethernet - feature the Rabbit 3000® microprocessor at 44.2 and 29.4 MHz respectively, with at least 512K Flash and 512K SRAM (standard).

Programming the BL2600
Programs are developed and debugged using industry-proven Dynamic C® software, which runs on a Windows PC. The programming device is connected via a serial cable, a USB cable, or Ethernet. Comprehensive debugging support includes break points, watch expressions and many other extensive features oriented toward real-time embedded systems programming. An extensive library of drivers and sample programs is provided, including a royalty-free TCP/IP stack for network and Internet communications. Full source code is provided for most library routines.



For quantities greater than listed, call for quote.

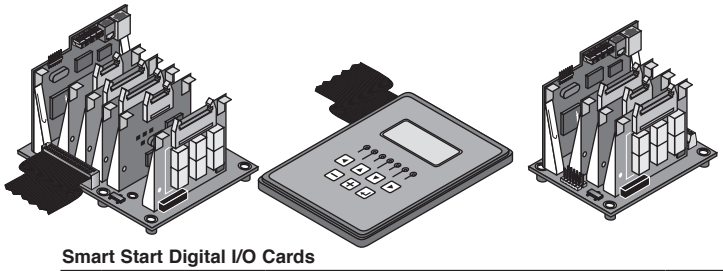
SR9000 SMART START SYSTEM

The Smart Start is a modular and expandable embedded control system designed for demanding real-time control and data acquisition applications. Multiple I/O card options-including digital, A/D, D/A, and relays-allow users to closely match their specific I/O needs. The Smart Star CPU card comes in both Ethernet and non-Ethernet versions, and a cost-effective keypad/display is also available.



Ethernet connectivity - CPU card with or without Ethernet
Flexible functionality - modular configuration to easily interchange or replace individual I/O cards
Multiple I/O card options - digital I/O, A/D, D/A, relay
Expandable - up to 168 I/O
Cost-effective - low cost per I/O
Optional keyboard/display - backlit 122 x 32 pixel graphic LCD with 7 user-relegendable keys, 7 LEDs

4D SYSTEMS Display Modules and Controllers

RoHS Compliant **This product is RoHS compliant.**

4D Systems designs and manufactures intelligent, cost effective modules for any embedded microprocessor based system or as an independent stand alone system.
Our All-in-One smart display modules offer a simple 2 wire interface to any host processor and the command set is easy to use and understand.

EMBEDDED GRAPHICS PROCESSORS AND CONTROLLERS

For quantities greater than listed, call for quote.

MOUSER STOCK NO.	4D Systems Part No.	Description	Price Each 1	5	10
971-DIABLO-16	DIABLO-16	16 Bit Embedded Graphics Controller			
971-GOLDELOX	GOLDELOX	QFN28 Package, Supports OLED and LCD displays with an 80-Series 8 bit wide CPU Interface			
971-PICASO	PICASO	4DGL Controller, Supports OLED and LCD displays with an 80-Series 16 bit wide CPU Interface			
971-UVGA-III	µVGA-III	Tiny VGA Graphics Controller for QVGA, VGA, WVGA			

ARDUINO SHIELDS

Features:

- Powered by the 4D-Labs GOLDELOX-SGC processor
- On-board micro-SD memory card adaptor for storing of icons, images, animations, etc. Supports standard and high capacity (HC-SD) memory cards
- Easy 5 pin interface to any host device: VCC, TX, RX, GND, RESET
- 5-Way multifunction Joystick switch directly connected to Arduino D2, D3, D4, D5 and D6 pins

For quantities greater than listed, call for quote.

AMULET TECHNOLOGIES Graphical Display Solutions

Amulet Technologies
Empowering Flat Panel Displays

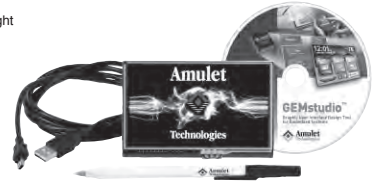
Products may be RoHS compliant. Check mouser.com for RoHS status.

Amulet Technologies offers graphical display solutions that include chips and LCD modules. All feature the solutions patented Amulet Graphical Operating System (OS). All offer easy hardware integration path from prototype to production. The chips include a dedicated GUI microprocessor, LCD controller, and graphical library. The GUI is visually created with HTML based development tools for rapidly creating good looking and feature-rich graphical user interfaces (GUI's). Amulet's expertise is graphical LCD integration and control.

GRAPHICAL OS LCD STARTER KIT - The fastest path for integrating a graphical user interface (GUI) into embedded products

Kits Include:

- Integrated TFT LCD display with white LED backlight
- Integrated touch panel and controller board
- USB PC Interface Cable
- 30-Day Trial of GEMstudio™ GUI, Amulet's embedded graphical user interface (GUI) design tool.



671-STK-480272C
Shown

Use this starter kit to evaluate the GRAPHICAL OS hardware and software, and to create the user-interface for your end product. Then use the module kit, and Graphical OS controller chip to go from prototype-to-production.

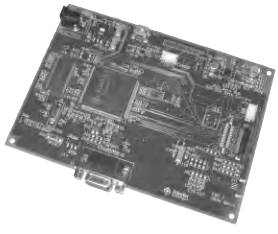
MOUSER STOCK NO.	Description	Price Each
671-STK-CY-043	4.3" Capacitive GEMstarter-kit	
671-STK-480272C	4.3" Resistive GEMstarter-kit	
671-STK-070R	7" Resistive GEMstater-kit	

GEMBOARD DISPLAY DRIVER BOARD

GEMboard can support a wide variety and growing list of 5.7" TFT panels. This board includes those unique electro-mechanical features to accommodate the FPC, touch panel and LED backlight for many popular 5.7" displays. The GEMboard also includes the Amulet Graphical Chip, a 32 megabit serial flash for storing GUI pages, a 64 megabit SDRAM, two touch panel connectors as well as two LED backlight connectors to accommodate a variety of 5.7" displays.

Features:

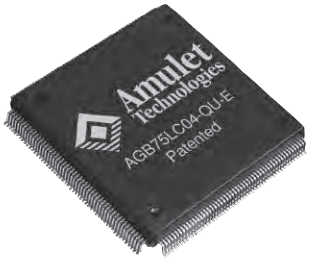
- Amulet AGB75LC04-QU-E 208 PQFP Graphical OS ChipTM
- Integrated resistive 4 or 5 wire touch pane; decoder with two touch panel connectors
- Supports LCDs with LED backlight 75mA or 200mA and two backlight connectors locate on backside of PCBA
- Storage Capacity-32megabit Serial Flash (GUI page storage)
- 64megabit SDRAM (frame buffer)
- Serial Interfaces-3.3v UART, USB, RS232
- Kit includes 33 pin conductor flat panel cable
- Auxiliary FPC pad can support a variety of larger panels that use 31 pin conductors.



MOUSER STOCK NO.	Description	Price Each
671-CBC-2	Display Driver Board	

GRAPHICAL OS CONTROLLER CHIPS

Combination LCD Controller and user-interface engine makes it easy to integrate LCD's into embedded products that use 8/16/32-bit micros and DSP's. Replaces traditional LCD controller chip. Eliminates need for complex code to draw each pixel on LCD. Chips render graphical user interface (GUI) pages containing graphic images, widgets, and other UI objects directly to LCD. Works with monochrome, and color displays. Rapidly create GUI using HTML-based development platform. Development software can be purchased separately or comes bundled with the Graphical OS Starter Kit (left).



MOUSER STOCK NO.	Description	Price Each
671-AGB75LC04-QU-E	LCD Controller Chip - Color 208 PQFP	
671-AGB64LV01-QC-E	LCD Controller Chip - Monochrome	

GRAPHICAL OS LCD MODULE KITS - The most complete LCD solution for production

Amulet color modules are production ready GUI solutions that can significantly reduce time-to-market and initial project resource requirements for embedded product manufacturers. Compatible with GEMstudio™, Amulet modules can be easily programed with smartphone-like Graphical User Interfaces which can be effortlessly updated and modified.

GEMmodules™ Include:

- Integrated TFT LCD display with white LED backlight
- Integrated touch panel
- Controller board with Amulet Color Graphical OS Chip™
- On-board memory -64Mb Serial Flash for storing GUI pages

Features:

- Royalty-free Graphical Operating System™
- Supports foreign language character sets (Unicode)
- Built-in font converter
- Color Depth - up to 24bit + 8bit alpha; for best performance, 8-bit palette is recommended
- Graphics supported include: GIF, JPEG, PNG, and more

DISPLAYTECH COG Graphic Displays & RGB Backlights

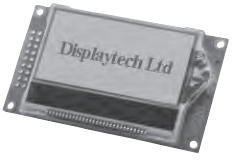
Displaytech AMERICAS a seacomp company

RoHS Compliant **This product is RoHS compliant.**

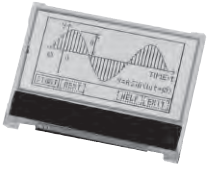
A

B

C



D



Chip On Glass (COG) Graphic Displays: By attaching the driver directly to the LCD glass it is possible to improve dot density over conventional heat seal or zebra technology. This results in the user's ability to achieve a more compact design saving space, weight, and cost. Displaytech, Ltd. is continuously expanding the range of its standard COG graphic modules, with resolution from 128 x 32 to 240 x 128 dots. These displays are offered with White LED backlight or an industry first RGB Backlight.

DISPLAYTECH COG RGB LED BACKLIGHT

RGB Backlights:
Displaytech Ltd. introduces its new line of RGB backlights, with composite red, green, and blue LED's. The three colors can be connected to be turned on individually or in combination to achieve a variety of backlight colors. For example, users can offer a product with green backlight for good conditions and red for alerts or alarms.

INTEGRATED TFT DRIVER BOARDS

NEW! TECHNOLOGY

Recognizing the difficulty some customers face with products going EOL too soon, Displaytech presents its line of Integrated TFT Driver Boards. These capable embedded boards simplify design and development, provide faster time to market, and offer long term continuity of supply.

For quantities greater than listed, call for quote.

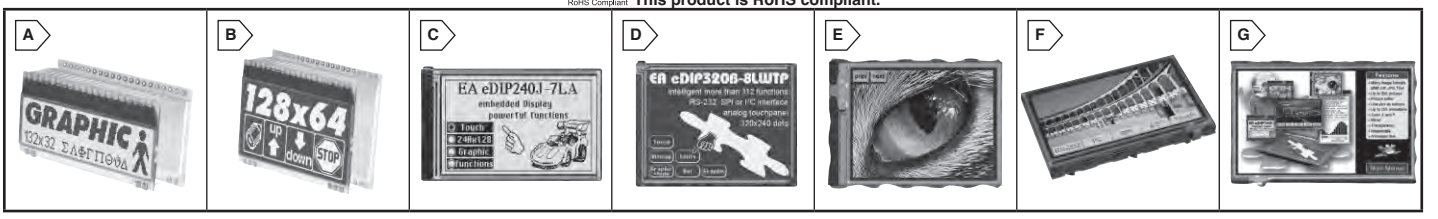
ELECTRONIC ASSEMBLY Modules and Accessories

ELECTRONIC ASSEMBLY

RoHS Compliant **This product is RoHS compliant.**



DOG M MODULES

- Runs on 3.3V systems without auxiliary power
- Also used on traditional 5V systems (character type only).
- 4-bit, 8-bit and SPI interface (4-wire)
- 4-bit, 8-bit and SPI interface (4-wire)
- Ultra-flat at 2.0 mm without backlight or 5.8 mm including LED backlight
- Typical power consumption of only 250µA in full operation
- Easy installation by simply soldering into the board
- Graphic: SPI interface only
- Graphic: 150uA (DOGM132-5) 250uA (DOGM128-6)

For quantities greater than listed, call for quote.

E DIP INTELLIGENT GRAPHIC DISPLAYS

- Power Supply: +5V@Typical 75mA/210mA
- Up to 256 images storable internally
- Up to 256 macros programmable
- Analog Touch Panel: Variable Grid
- Freely definable keys and switches
- Communication via RS-232, SPI and I²C
- 8 Built in soft fonts

For quantities greater than listed, call for quote.

HANTRONIX LCD Display Modules

Products may be RoHS compliant. Check mouser.com for RoHS status.

HANTRONIX DISPLAY MODULES

The Hantronix Advantage is the ability to add value and provide a competitive-edge for their customers in the global market. As a partner-supplier, they are committed to delivering additional value to your business. All Hantronix production facilities are ISO9001 certified and utilize the most modern production equipment to produce the highest quality displays. Hantronix offers one of the largest selection of standard LCD's in the industry. Power Supply Voltage (VDD) is +5.0V.

Our TFT displays deliver amazingly high contrast ratio, crisp color-saturation, exceptional viewing angles, and super bright WLED backlight performance. Additionally, most of our displays are available with integrated touch panel options. Some ideal applications for our TFT displays include instrumentation, industrial controls, handhelds, medical, control/home automation, and POSITIVE/retail applications.

INFOVUE™ HIGH/LOW TEMPERATURE LCD DISPLAYS

Features:
- -40°C to +85°C
- High-resolution, high-duty daylight visibility
- Available from 8 x 1 character display up to a 320 x 240 graphic display
- Available in either positive or negative image display
- Wide variety of color choices when paired with LED backlights

Applications:
- Appliances
- Industrial controls
- Medical equipment
- Military applications

For quantities greater than listed, call for quote.

QUASARBRITE™ HIGH TEMP LED DISPLAYS

Features:
- Bright, crisp display performance in market-leading temp ranges up to 105°C
- Available in sizes from 0.28 to 4 inch character height
- Compatible with standard drivers
- Available in any standard color

Applications:
- Aircraft, ground vehicles and GPS
- Heavy motor control technologies
- Oil field and gas flow metering
- Displays on ovens, microwaves, etc.

Markets:
- Industrial controls
- Military
- Appliances

NEWHAVEN COG, VFD and LCD Displays

NEWHAVEN DISPLAY INTERNATIONAL

RoHS Compliant **This page of product is RoHS compliant.**

CHIP ON GLASS DISPLAYS

COG (Chip-On-Glass) displays are monochromatic passive or active matrix LCD displays that can display information as text or in a dot matrix pattern. Unlike typical LCD displays, COG displays don't have a built-in PCB board and instead have the IC directly mounted on the glass of the display. This type of technology is perfect for less demanding applications since they require less power than VFDs, are smaller in size and are typically less expensive than other display technologies.

Features:
- Monochrome graphic with custom icons
- Low power, high brightness backlight
- Positive or negative image options
- Cost effective over COB because less ICs are required
- Space saving; COG LCDs can be as thin as 2mm
- 4 font tables available for character LCD modules
- Wide operating temperature

LCD TFT DISPLAYS

TFT (Thin-Film Transistor) Displays are active-matrix LCDs with full RGB color screens. These screens feature bright, vivid colors and have the ability to show fast animations, complex graphics and crisp custom fonts.

NEW! TECHNOLOGY

Features:
- 8, 16 or 24 bit digital interfaces
- Wide viewing angle
- Available with and without touch screens
- Wide operating temperature
- High brightness LED backlights
- Available with or without controllers

For quantities greater than listed, call for quote.

VFD CHARACTER MODULES, DOT MATRIX

VFDs (Vacuum Fluorescent Displays) are high contrast displays that can display 7-segment numerals, multi-segment alphanumeric characters or a dot matrix pattern. These display types are typically colored green, bright and perform well in both dark and full sunlight environments. VFDs use a self-emitting fluorescent light allowing them to operate in extreme cold and hot temperatures.

Features:
- LCD compatible
- Wide operating temperatures (-40°C to +85°C)
- Self-emitting
- User definable fonts
- +5V power supply
- Colored filters available

For quantities greater than listed, call for quote.

LED GRAPHIC DISPLAYS

These are an LED replacement for the popular APD-128G032 plasma display module. It is designed to offer high brightness and superior viewing characteristics in a slim package. This display is ideal for low to medium level information content and is ideal for applications such as arcade games, process control, POS terminals, medical equipment, message centers and ATM machines.

For quantities greater than listed, call for quote.

LITE-ON LED Displays

RoHS Compliant **This product is RoHS compliant.**

Providing high contrast, high brightness and wide viewing angle, Lite-On LED displays are available in a wide range of sizes, brightness and orientations. Displays can be stacked vertically or horizontally and are designed for numeric indication on applications requiring low current or low power consumption.

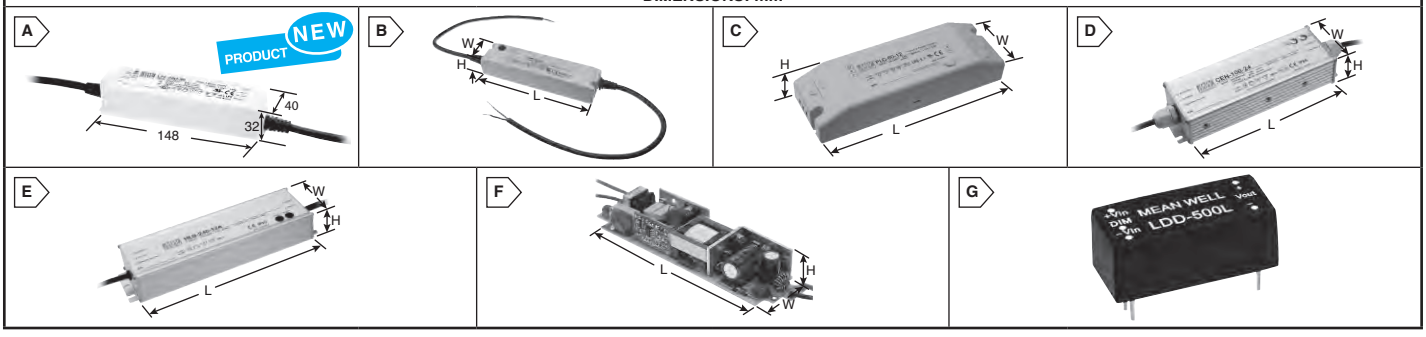
MEAN WELL Switching Power Supplies

RoHS Compliant **This product is RoHS compliant.**

DIMENSIONS: mm



MEAN WELL 16W SINGLE OUTPUT SWITCHING POWER SUPPLY

Features:
- Protections: Short circuit, Over current, Over voltage, Over temperature
- Built-in active PFC function
- Class II power unit, no FG
- Class 2 power unit
- Suitable for LED lighting and moving sign applications
- Compliance to worldwide safety regulations for lighting

For quantities greater than listed, call for quote.

MEANWELL LDD-L /LDD-H SERIES DC-DC CONSTANT CURRENT LED DRIVER

Features:
- Built-in PWM and remote ON/OFF control
- Protections: Short circuit, Over temperature
- Cooling by free air convection
- Compact size
- Low cost, high reliability
- Suitable for driving illumination LED
- 3 years warranty
- Fully encapsulated with IP67 level

For quantities greater than listed, call for quote.

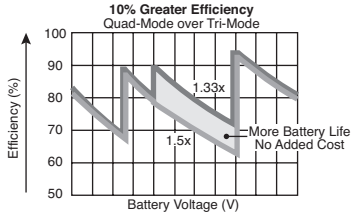
CATALYST QUAD-MODE™ CHARGE PUMP/PARALLEL CONFIGURATION

Fractional charge pumps with regulated output current

Catalyst Semiconductor's innovative, patented Quad-Mode™ charge pump switching architecture delivers high efficiency levels normally associated with inductive-based LED drivers, which eliminating the high-profile inductors and unwanted EMI. Most charge pump LED drivers today offer three modes of operation corresponding to the ratio of the output voltage to the input voltage: 1x, 1.5x and 2x. Catalyst's Quad-Mode™ architecture incorporates a fourth mode of operation, 1.33x, without the need for the additional capacitor required by all existing four-mode charge pumps. The 1.33x fractional operating mode also reduces the input switching currents seen at the battery, minimizing the oversupply noise - a critical parameter in devices such as cell phones. Catalyst Quad-Mode™ LED Drivers deliver 10% greater efficiency compared to traditional charge pumps, extending battery life with no added cost or components.



♦ Surface Mount Device

CALIFIA LIGHTING LED Light Fixtures and Kits

P3000 PENINSULA'S SERIES

The Peninsula's durable plastic construction makes it an economical lightweight luminaire delivering a wide range of semi-diffused light output.

Features:
- Semi Diffused
- Directional Efficiency
- Low Profile
- Long Life
- Instant On
- Mercury Free
- Lead Free
- No UV

For quantities greater than listed, call for quote.

MOUSER STOCK NO.	Bivar Part No.	Fig.	Color Temp.	Lumen Output	Efficacy (lm/W)	Color Rendering Index (CRI)	Power (W)	Input Voltage	Price Each 1	Price Each 10

C5000/C5400 COASTLINE SERIES

The Coastline series delivers high brightness performance in a very low-profile aluminum housing, making concealed placement a breeze. Suitable for all commercial and industrial applications, specifically banks, restaurants, retail, enclosures, and medical test labs.

Features:
- HB LEDs
- Low Profile
- Narrow Beam
- Built-in Dimmer
- Instant On
- Mercury Free
- Lead Free
- No UV

For quantities greater than listed, call for quote.

MOUSER STOCK NO.	Bivar Part No.	Fig.	Color Temp.	Lumen Output	Efficacy (lm/W)	Color Rendering Index (CRI)	Power (W)	Input Voltage	Price Each 1	Price Each 10

B7000 BAYFRONT SERIES

The Bayfront features a sturdy aluminum housing for greater durability and a diffused lens to maximize light output uniformity.

Features:
- Diffused Lens
- Directional Efficiency
- Low Profile
- Long Life
- Instant On
- Mercury Free
- Lead Free
- No UV

For quantities greater than listed, call for quote.

CREE High Power LEDs

XLAMP MC-E SERIES

Features:

- Forward Current (Max.): 700mA per LED die
- Forward Voltage (white die) @ 700mA: 3.4V
- Forward Voltage (color die) @ 700mA: 2.3-3.7V
- Individually addressable LEDs

For quantities greater than listed, call for quote.

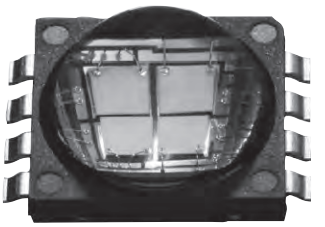
A



XLAMP MT-G SERIES EASYWHITE™ LEDS

NEW SUPPLIER

The XLamp MT-G EasyWhite LED is optimized for high-output, small-form-factor, directional-lighting applications.

Features:

- Max. Operating Power: 25W
- Voltage Options: 6V, 36V
- Effective Thermal Resistance: 1.5°C/W
- High lumen density: 1550 lumens @ 25W @ 85°C
- Viewing Angle: 120°
- Minimum 80CRI @ 2700K and 3000K CCT

Applications:

- Directional retrofit lamps
- Accent and track
- Retail display
- Down lights
- Hospitality
- Museums and art galleries

For quantities greater than listed, call for quote.

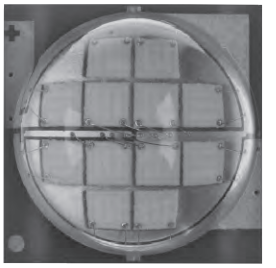
B



XLAMP MP-L SERIES EASYWHITE™ LEDS

NEW SUPPLIER

The XLamp MP-L EasyWhite LED offers the performance, color consistency and lumen density to displace conventional light sources, in a breakthrough 12mm x 13mm package design. Combining Cree EasyWhite technology with up to 1500 lumens of light at 250mA, the MP-L EasyWhite LED simplifies system design and increases color consistency enabling new applications
previously achievable only through the use of multiple LED components

Features:

- High lumen density
- Wide Viewing Angle: 125°
- Color: Easywhite™

Applications:

- Commercial/residential directional lighting
- LED retrofit bulbs
- General indoor/outdoor illumination

For quantities greater than listed, call for quote.

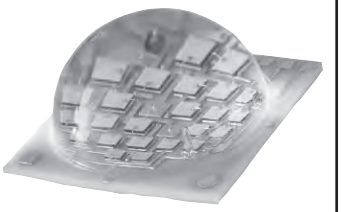
C



XLAMP CXA2011 SERIES

NEW SUPPLIER

High-lumen, non-directional LED Arrays

Features:

- Forward Voltage: 40V
- Forward Current (Max.): 1000mA
- Reverse Current: 0.1mA
- Temperature coefficient of voltage: -35mV/°C
- Viewing Angle: 120°
- Top side solder connections
- Thermocouple attachment point

Applications:

- Surface-mount downlights
- Recessed can lights
- Pendant lights
- A19 replacement bulbs
- Exterior area lights
- Commercial wall pack

For quantities greater than listed, call for quote.

CREE High Power LEDs

XLAMP MX-3 SERIES

Enhanced light uniformity and LED-to-LED color consistency

Features:
- Forward Current (max.): 400mA
- Forward Voltage @ 350mA: 3.7
- Viewing Angle: 120°

Applications:
- LED light bulbs
- Cove lighting and wall washing
- Under-cabinet lighting
- Retail and refrigerated display
- Fluorescent replacement

For quantities greater than listed, call for quote.

XLAMP MX-3S SERIES

Enhanced light uniformity and LED-to-LED color consistency

Features:
- Forward Current (max.): 150mA
- Forward Voltage @ 115mA: 10.7VDC
- Viewing Angle: 120°

Applications:
- LED light bulbs
- Cove lighting and wall washing
- Under-cabinet lighting
- Retail and refrigerated display
- Fluorescent replacement

For quantities greater than listed, call for quote.

XLAMP MX-6S SERIES

Designed for indoor LED lighting, with better color consistency and higher reliability than incumbent solutions.

Features:
- Forward Current (Max.): 175mA
- Forward Voltage @ 60mA: 20
- Viewing Angle: 120°

Applications:
- Indoor commercial
- Kitchen under-cabinet
- Refrigerated display
- Fluorescent replacement
- LED light bulbs

For quantities greater than listed, call for quote.

XLAMP ML-B SERIES

Features:
- Forward Current (Max.): 175mA
- Forward Voltage @ 80mA: 3.5V
- Viewing Angle: 120°

Applications:
- T5/T8 bulbs; fluorescent replacement
- Under-cabinet lighting
- Retail and refrigerated display
- Panel lights

For quantities greater than listed, call for quote.

XLAMP ML-E SERIES

Lighting-class performance in a 1/2-watt LED

Features:
- Forward Current (max.): 500mA
- Viewing Angle: 120°

Applications:
- T5/T8 bulbs; fluorescent replacement
- Under-cabinet lighting
- Retail and refrigerated display
- Panel lights

XLAMP XB-D SERIES

48% Smaller footprint than XLamp XP Series

Features:
- Cree's smallest lighting class LED: 2.45 x 2.45mm
- 1 A maximum drive current
- Low thermal resistance: 6.5 °C/W
- Wide viewing angle: 115°
- Reflow solderable - JEDEC J-STD-020C compatible

PRODUCT NEW

XLAMP XP-C SERIES

Combines the proven lighting-class performance and reliability of the XLamp XR-E LED in a package with 80% smaller footprint.

Features:
- Viewing Angle: 110-125°

Applications:
- Portable
- Backlighting
- Signage
- Retail display

For quantities greater than listed, call for quote.

XLAMP XP-E SERIES

80% smaller footprint than the X-Lamp XR-E.

Features:
- Viewing Angle: White - 115°
- Viewing Angle: Colored LEDs - 130°

Applications:
- Portable
- LED light bulbs
- Architectural
- Signage
- Retail display
- Transportation
- Emergency vehicle

For quantities greater than listed, call for quote.

XLAMP XT-E SERIES

XLamp XT-E is Cree's highest performing silicon carbide-based LED technology

Features:

- Wide viewing angle: 115-140°
- Thermal resistance: 5°C/W
- Maximum drive current: 1.5A
- Reflow solderable - JEDEC J-STD-020C Compatible

NEW PRODUCT

For quantities greater than listed, call for quote.

XLAMP XT-E SERIES ROYAL BLUE LEDS

Features:

- Available in 2.5nm wavelength bins
- High lumen density
- Characterized and binned at 85°C
- Exceptionally wide viewing angle (140°)
- Electrically isolated thermal path

For quantities greater than listed, call for quote.

XLAMP CXA2530 SERIES

Features:
- Forward Voltage: 37V
- Max. Drive Current: 1500mA
- Viewing Angle: 115°
- Top-side solder connections
- Thermocouple attach point
- NEMA SSL-3 2011 standard flux bins

XLAMP CXA2540 SERIES

Features:
- Forward Voltage: 37V
- Maximum drive current: 2100mA
- Viewing Angle: 115°

Applications:
- Directional/Non-directional
- Downlights
- Low and high-bay

LEDENGIN High-Power LEDs

RoHS Compliant **This page of product is RoHS compliant.**

VIVILUX™ SERIES LEDS

LED Engin ViviLux™ LEDs with Lens deliver bold, vivid, and energy-efficient Lux-on-Target™ directional lighting for retail and commercial lighting. These high-efficiency, CRI 90 emitter-plus-lens combinations offer superior performance, leveraging LED Engin's high density LuxiGen™ LED emitters and optics with high quality light, beam control, and the energy-efficiency demanded in today's green environment.

LZP SERIES 90 WATT LEDS

LedEngin LZP Series 90W LED emitters generate up to 5500 lumen (CCT of 5500K) and 3000lm (CCT of 3100K) in an unprecedented compact 12mm x 12mm x 6.7mm (LxWxH) package. LedEngin LZP Series high performance LED emitters replace 35W metal halide (MH) bulbs or 50W high pressure sodium (HID) bulbs achieving the high flux required in applications such as high bay lighting, architectural lighting, street/area lighting, and stage and studio moving heads.

For quantities greater than listed, call for quote.

HELIEON™ SUSTAINABLE LIGHT MODULES

Features:

- Integrated solid state lighting solution for OEM fixture manufacturers, lighting designers and architects
- Multiple product options compatible with a single thermal and electronic driver system design
- Separable socketed plug-and-play solution(socket and module) with a turn-and-click installation process
- Uniform high-quality illumination with beam control optics (24, 32 and 50 degree options)
- High system efficacy enables luminaires with operating efficiencies of >50 lm/W
- Color controlled to a single 3-step MacAdams ellipse
- UL recognized (pending)
- Three year limited warranty
- Recyclable components, Pb and Mercury free, RoHS compliant

Benefits:

- Simplifies the design integration effort and accelerates time to market
- Enables flexibility to change the lighting experience after installation
- Enables separation of source and fixture,emulating traditional lighting with a familiar turn-and-click installation process
- Delivers clean white light without pixilation for precision lighting effects
- Meets or exceeds global regulatory requirements such as Energy Star, Title 24, Part L and others
- Uniform consistent white light between luminaires in the lighting installation
- Streamlines the UL-listing process for the luminaire
- Enables luminaire manufacturers to design with confidence
- Reduces environmental and disposal issues, delivering a sustainable solution

Applications:

- Down lights
- Task and accent lighting
- Spot and track lights
- Troffers and interior-area lighting
- Retail and display lighting
- Hospitality lighting
- Architectural lighting
- Decorative lighting
- Museum lighting

Notes:

1. Driving these high-current devices at low currents can result in variations in performance. For low-current operation, pulse width modulation is recommended.
2. A maximum duty cycle of 10% is recommended when operating the Helieon module at the maximum peak pulsed current specified.
3. LEDs are not designed to be driven with a reverse voltage. TYPICAL PRODUCT PERFORMANCE Helieon™ Sustainable Light Module

MAXIMUM PRODUCT RATINGS

Parameter	Maximum Rating
Maximum DC Forward Current	2000mA
Minimum DC Forward Current(1)	600mA
Maximum Peak Pulsed Current(2)	2800mA
Maximum Reverse Voltage(3)	-20V
Operating Temperature	-40°C to +95°C
Storage Temperature	-40°C to +105°C

For quantities greater than listed, call for quote.

PHILIPS LUMILEDS High Power LEDs

RoHS Compliant **This product is RoHS compliant.**

Philips Lumileds is a leading provider of LEDs for illumination solutions. Their LUXEON products deliver high light output, high efficacy and a more environmentally friendly light source, demonstrating its commitment to innovation. Philips Lumileds is a pioneer in the use of LED lighting solutions for everyday purposes including automotive lighting, indoor lighting, outdoor lighting, signage and signaling and general lighting. Philips Lumileds Lighting Company is a fully integrated manufacturer of LED dice, packaged LEDs, and high-brightness LEDs—LUXEON®—designed for integration into general lighting products.

PHILIPS LUMILEDS High Power LEDs

PHILIPS LUMILEDS

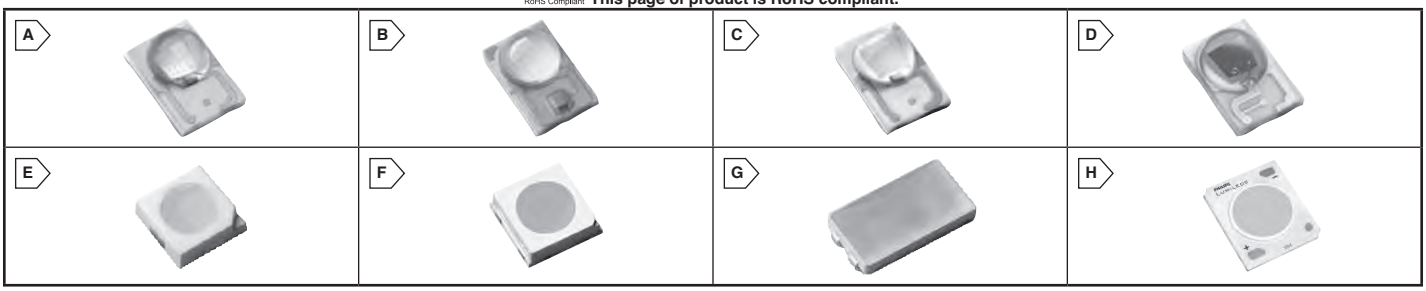
RoHS Compliant **This page of product is RoHS compliant.**



Philips Lumileds is a leading provider of LEDs for illumination solutions. Their LUXEON products deliver high light output, high efficacy and a more environmentally friendly light source, demonstrating its commitment to innovation. Philips Lumileds is a pioneer in the use of LED lighting solutions for everyday purposes including automotive lighting, indoor lighting, outdoor lighting, signage and signaling and general lighting. Philips Lumileds Lighting Company is a fully integrated manufacturer of LED dice, packaged LEDs, and high-brightness LEDs—LUXEON®—designed for integration into general lighting products.

BIVAR LED Panel Mount Indicators and LEDs

RoHS Compliant **This product is RoHS compliant.**

NYLON HOUSING PANEL MOUNT INDICATORS

The Nylon Panel Mount Indicators feature fast press-fit, simple installation for general signal indication that does not require additional water, dust, or moisture proofing from the operating area.

For quantities greater than listed, call for quote.

METAL HOUSING PANEL MOUNT INDICATORS

The Metal Panel Mount Indicators offer a threaded metallic housing that provides positive locking for constant vibration, ideal for a robust environment. The durable metallic housing can sustain extreme heat, cold, and harsh environments, and does not require any additional water and/or moisture protection.

For quantities greater than listed, call for quote.

QUICK MOUNT NYLON PANEL MOUNT INDICATORS

The Quick Mount Nylon Panel Mount Indicator Series features a unique, quick locking mechanism, called "Quick Nut," to provide instant panel hook-up that does not require water or moisture protection. The housing and lens are made of ESD-protected material. A diffused lens provides uniform illumination and wide angle viewing capability.

For quantities greater than listed, call for quote.

IP67-RATED PANEL MOUNT INDICATORS

The IP67-Rated Panel Mount Indicators feature a forward voltage of 8-48V VAC/VDC, and a watertight seal from the front panel, ideal for waterproof and moisture protection. The housing and lens are made of ESD-protected material and the threaded housing provides positive locking for constant vibration, making these indicators ideal for use in a robust environment. A diffused lens provides uniform illumination and wide angle viewing capability.

For quantities greater than listed, call for quote.

FLEXIBLE LIGHT PIPE LENSES

BIVAR Flexible Light Pipe Lenses are designed for light pipes that return flexibility to the designer and eliminate components and costly assembly steps. The result is a practical and economical indication solution. Light pipes are the perfect solution for moving light from the source to the destination. Bivar's light pipes act as a conduit for the light allowing for distances of a few millimeters up to 100 meters.

For quantities greater than listed, call for quote.

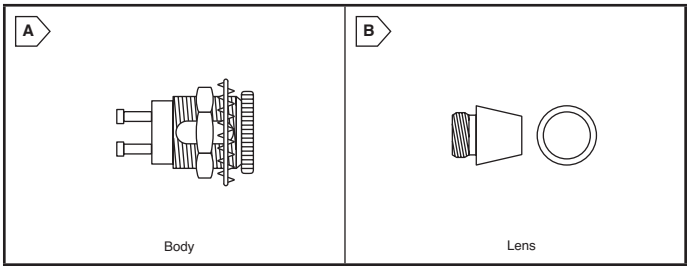
CHICAGO MINIATURE Indicators and Lamp Holders

Chicago Miniature Lighting, LLC
Lighting the world since 1910

Products may be RoHS compliant. Check mouser.com for RoHS status.

GEMLITE SUBMIDGET INDICATORS



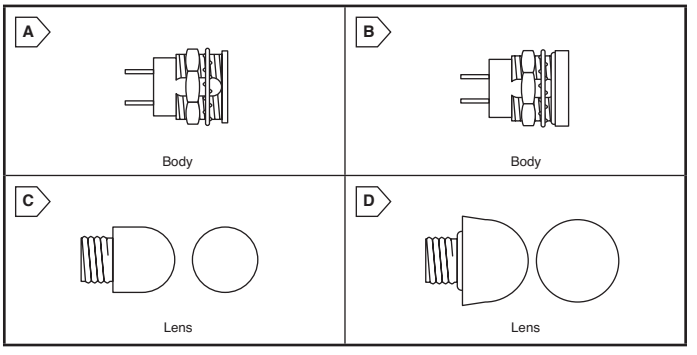
Specifications:

- Mounting hole: .313"
- Mounting centers: .469" min.
- Panel thickness: .218" max.
- Lock washer: nickel plated bronze
- Hex nut: nickel plated brass
- Lens: high temperature lexan
- Lens shank: nickel plated brass
- Housing material: black nickel plated brass
- Electrical rating: up to 30V, up to 1W

For quantities greater than listed, call for quote.

MOUSER STOCK NO.	Fig.	Description	Price Each 1	10	100
606-5160-458	A	T-1 sub-midget flange base indicator, body			
606-160A-604R	B	Translucent red lens for 5160-48, lens			
606-160A-604G	B	Translucent green lens for 5160-48, lens			
606-160A-604Y	B	Translucent yellow lens for 5160-48, lens			
606-160A-604W	B	Translucent white lens for 5160-48, lens			

MIDGET FLANGE RELAMPABLE INDICATORS



Specifications:

- Mounting hole: .484"
- Mounting centers: .750" min.
- Panel thickness: standard=.265" watertight=.188"
- Terminals: tin plated brass
- Housing material: black anodized aluminum
- Hex nut/lock washer: chrome treated steel
- O-rings (5139 only): neoprene
- Electrical rating: up to 30V, up to 2W
- Lens: high temperature lexan

For quantities greater than listed, call for quote.

MOUSER STOCK NO.	Fig.	Description	Price Each 1	10	100

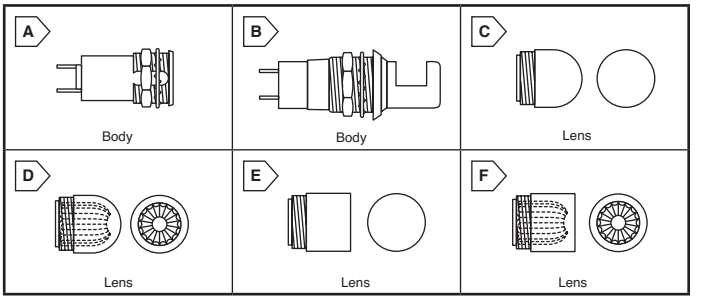
T-2 AND T-3 1/4 MINIATURE RELAMPABLE INDICATORS

(For use with Bayonet Incandescent and Neon Lamps)



Specifications:

- Mounting hole: .688"
- Mounting centers: .960" min.
- Panel thickness: .406" max.
- Lock washer: chromate treated steel
- Housing material: 5100 Series - glass filled polyester
  5200 Series - phenolic
  900-200 Series - black anodized aluminum
- Hex nut: zinc plated steel
- Lens (5100 and 5200 Series): high temperature lexan

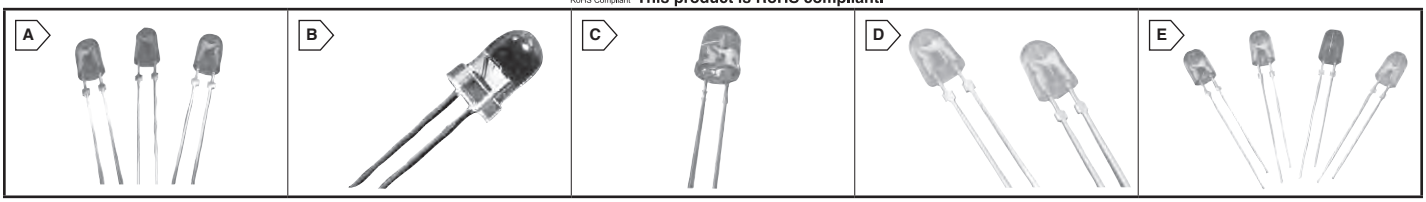
CREE Thru-Hole LEDs

RoHS Compliant **This product is RoHS compliant.**



HIGH BRIGHTNESS 4MM OVAL LEDS

Features:

- C4SMF: Matched 105x50-degree radiation pattern
- C4SMK: Matched 115x65-degree radiation pattern

Applications:

- Full-color digital signs

For quantities greater than listed, call for quote.

DIALIGHT IP67/NEMA 4X Panel Mount LED Indicators

Dialight
A Rabbon Group Company

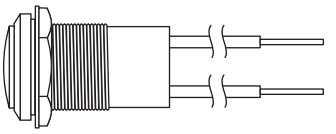
657 SERIES PANEL MOUNT INDICATORS

RoHS Compliant **This product is RoHS compliant.**

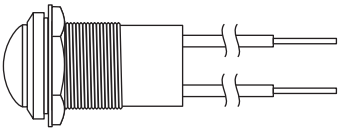
Features/Benefits:

- IP67/NEMA 4X
- Cool-to-the-touch Operation
- Daylight Viewable
- Resistant to shock and vibration
- Anti-Caplillary Wire
- LED Technology engineered for up to 100k hours of operation

A **Flat Lens**



B **Domed Lens**



For quantities greater than listed, call for quote.

INSPIRED LED Arrays, Modules and Light Bars

inspired LED

UNDER CABINET LIGHT PANELS

Light Panels are ideally suited for under the counter task lighting applications, kitchen lighting, jewelry lighting, decorative lighting and reading lighting. Light Panels are brushed aluminum in color to blend with today's kitchen styles. Components are sold as a kit and can be also purchased individually to create a system.

Features:

- Easy Installation
- Low Cost Modular Design
- Highly Efficient Power Supply
- Both Warm and Cool Color Light Options
- Low Energy Consumption
- Built in On-Off Switch for 1 Watt Light Panel
- Long Life:
  1 Watt - 80,000HRs
  2 Watt - 100,000HRs
- UV and IR free

RoHS Compliant

LED Backlighting Kit

A TV Back Light from Inspired LED can reduce eye strain by providing bias lighting in the form of an easy to install adhesive backed LED Light Strip. Bias Lighting serves to moderate or bias the range of motion in the iris muscles in the eye, which limits the size of the pupil. The frequent and sometimes dramatic variation in picture brightness from scene to scene in video programs can cause eyestrain and fatigue in an otherwise dark display environment.
Our TV Back Light will provide enough light for your eyes to get their color reference, and you'll find that pictures seem a little crisper and colors more vivid.

INSPIRED LED Length Flexible Light Strips

RoHS Compliant **This product is RoHS compliant.**

FLEX STRIPS WITHOUT CONNECTORS

Series:

Bright Flex Strips - Ideal For Long Runs
Super Bright Flex Strips - Designed For More Light
Ultra Bright Flex Strips - High density light strip

Luminous Flux:

- Warm White - 2.5lm
- Cool White - 4.1lm
- Red - 1.2lm
- Green - 1.2lm
- Blue - 1lm

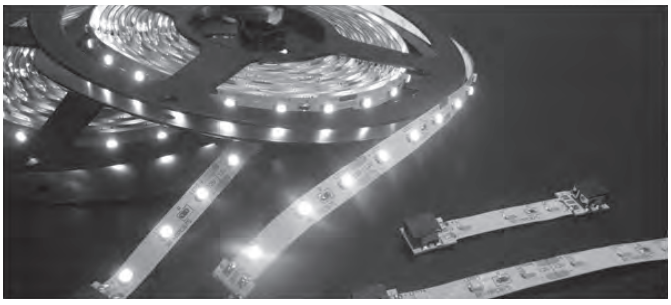
NEW PRODUCT

Features:

- Warm White, Cool White, Monochrome
- 100,000 Hours
- UV and IR Free
- 12 Volts DC, Standardized Connectivity
- Adhesive Tape Backing

Applications:

- Under Cabinet Lighting
- Kitchen Lighting
- Display Case Lighting
- Decorative Lighting
- Enclosure Lighting



For quantities greater than listed, call for quote.

LITE-ON LED Arrays and Light Bars

RoHS Compliant **This product is RoHS compliant.**

LED ARRAYS

Features:

- Rectangular light bar
- Large, bright, uniform light emitting areas
- Low power requirement
- Excellent ON-OFF contrast
- Can be used with panel and legend mount
- Easy mounting on P.C. Board
- Categorized for light output

For quantities greater than listed, call for quote.

LIGHT BARS

Features:

- Rectangular light bar
- Large, bright, uniform light emitting areas
- Low power requirement
- High brightness and high contrast
- Solid state reliability
- Easy mounting
- Categorized for luminous intensity

For quantities greater than listed, call for quote.

LEDENGIN HIGH-POWER UV LEDs

Features:

- Surface mount ceramic package with integrated glass lens
- Very low Thermal Resistance (3°C/W)
- JEDEC Level 1 for Moisture Sensitivity Level
- Reflow solderable (up to 6 cycles)

LUMINUS DEVICES HIGH-POWER UV LEDS

Applications:

- Curing Inks, Coatings, and Adhesives
- Inspection
- Machine Vision
- Fiber-coupled Illumination
- Specialty Projection Systems for Maskless Lithography - Optically matched to TI0.95"DMD
- Rapid Prototyping and 3D Printing
- Medical and Scientific Instrumentation

BIVAR Nylon Hardware

RoHS Compliant **This product is RoHS compliant.**

NYLON TUBULAR SPACERS

Universal Spacers give users an extremely wide selection of tubular spaces for mounting PCS discrete devices in any lead pattern and elevation. Seventeen basic I.D./O.D. combinations with heights ranging from .030" (.76) through 1.250" (31.8), in .005" (.13) increments are available from factory stock or within two weeks. Such a broad selection permits the user to choose the most suitable sizes for strength, elevation and ease of assembly, as well as providing for proper filleting and cleaning.

KEYSTONE LED Holders and Spacer Mounts

KEYSTONE ELECTRONICS CORP.

RoHS Compliant **This product is RoHS compliant.**

"SNAP-IN" T-1 AND T-1 3/4 LED HOLDERS

- Material: Nylon 6/6, Black

For quantities greater than listed, call for quote.

MOUSER STOCK NO. Mfr.	Mfr. Part No.	Fig.	LED Size	Color	Mounting Hole Size (in.)	Min. Mounting Center (in.)	Panel Thickness (in.)	Price Each 1	100	500	1000

"UNIVERSAL" SPACER MOUNTS FOR TRI-LEAD T-1 (3MM) AND T-1 3/4 (5MM)

- Unique design separate leads and retains Tri-Lead (and/or Bi-Lead) components
- Designed for PC board mounting of Tri-Lead (and/or Bi-Lead) T-1 and T-1 3/4 LEDs
- Provides height control, lead retention and stability
- Also suitable for mounting lamps, resistors, transistors, diodes, capacitors, etc.
- Material: Black PVC, UL Rated 94V-0

"SELF-ALIGNING" SPACER MOUNTS FOR BI-LEAD T-1 (3MM) AND T-1 3/4 (5MM)

The spacer features an internally tapered barrier which guides the leads and eliminates the possibility of crimping and shorting. The internal configuration also assures positive self-alignment on .100 centers.

- No special tools required
- Cost and labor saving
- Material: Natural Nylon
- UL Rated 94V-2

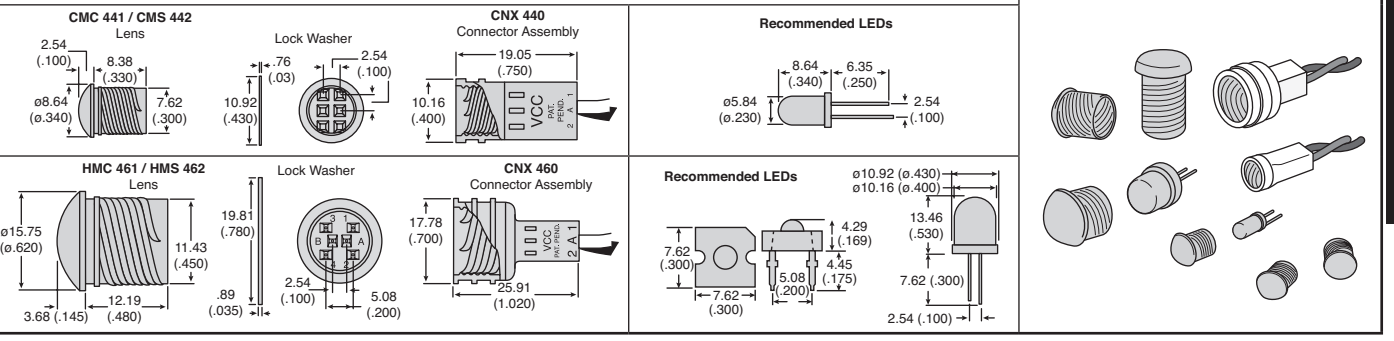
VCC LED Assemblies and Mounting Components

VCC OPTOELECTRONICS

RoHS Compliant **This product is RoHS compliant.**

DIMENSIONS: mm (in.)



CABLE ASSEMBLIES FOR 5MM AND 10MM LED LIGHTS

Features:
- 180° viewing angle for LED that have 20 to 20K mcd
- Lens threads into holder for easy assembly
- Sealed style exceeds NEMA 4 for dust, water, and ice

Additional Options:
- Can be made with 3 or 4 wire configuration
- 24AWG stranded wire

Pre-wired Solderless LED Holders - Twist Fit

For quantities greater than listed, call for quote.

CABLE ASSEMBLIES FOR 5MM LED LIGHTS WITH BUILT-IN RESISTOR

Features:
- Made for CMC441 and CMC442 Lenses
- Lens threads into holder for easy assembly
- Sealed style exceeds NEMA 4 for dust, water, and ice
- Internal Resistor to make LED to power source easy

Additional Options:
- Other resistance available
- Lead lengths from 4 to 24 inches
- 2 or 3 Position Headers available
- Custom Color wire available

For quantities greater than listed, call for quote.

VCC LED Assemblies and Mounting Components

VCC OPTOELECTRONICS

RoHS Compliant **This product is RoHS compliant.**

PRE-WIRED SOLDERLESS LED INTERCONNECTIONS

Material Specifications:
- Panel connector socket and ring: thermoplastic
- Header connector: thermoplastic (UL Listed materials)
- Terminals: phosphor bronze, tin plated
- Wire: 24AWG, 7 strand copper, insulated
- For **Locking Header** use Mouser Stock No.: 538-22-23-2021
- For **Plain Header** use Mouser Stock No.: 538-22-03-2021

Electrical Specifications:
- Terminal: 3A continuous service
- Unique three-finger design mates to round, square, or rectangular leads .017" to .025"

Insert LED into connector. Install lens in panel opening. Press connector and lens together.

MOISTURE SEALED LENSES & LIGHTPIPES

VCC LSS Series Moisture-Sealed Litepipes® provide a display panel moisture seal and 180° viewing angle with VCC's SMS 172 Series panel lens. Panel assembly is easily accomplished by slipping the unit through a .171" panel opening, sliding the retaining ring over the Litepipe® barrel, and pressing the ring on while holding the lens surface tightly against the panel. The gasket is compressed as the ring is forced into place against the rear of the panel.

Features:
- LED Size: 3mm
- Mounting Hole: 0.171in.
- Diameter: 4.91mm

VCC OPTOELECTRONICS

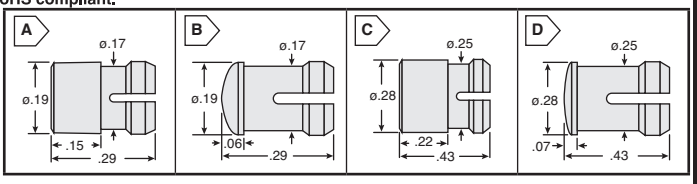
RoHS Compliant This product is RoHS compliant.

CLIPLITE® ROUND LENS MOUNTS FOR T1 AND T1-3/4 LEDS

Features:
- Provides 180° viewing angles for LEDs
- Easy snap-mount method for front panel assembly
- ESD protection for LED and internal components to 16K volts
- Lens utilize striated lines and fresnel rings to increase apparent brightness up to 125%

Specifications:
- Lens material: Polycarbonate

DIMENSIONS: in.



T1 (3mm)

LITEPIPES

Material Specifications:
- Litepipe: acrylic (optical grade)

Mounting Specifications:
- **T1 (3mm)**: mates with lens SMB 200. Panel mounting hole .171 (4.3mm) on 1/4" centers. Panel thickness 1/32" to 1/8". Litepipe lengths from .200" to 1.200".
- **T1-3/4 (5mm)**: mate with lens CLB 300 and SQB 400. Panel mounting hole .250 (6.35mm) on 3/8" centers. Panel thickness 1/32" to 1/4". Lengths from .360" to 1.360". For panels less than 3/16" use SPC 125 spacer.

Standoff Specifications:
- Use VCC's standoff to adjust the height of a standard LED above the PCB and maintain a maximum .050" clearance between litepipe and LED

DIMENSIONS: in.

VCC LED Litepipes® and Mounting Components

VCC OPTOELECTRONICS

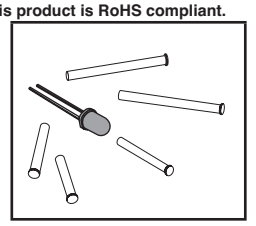
RoHS Compliant This product is RoHS compliant.

2.5MM "MICRO" LITEPIPE® ASSEMBLIES

Material Specifications:
- Litepipe®: Acrylic (optical grade)
- Grommet: Polyethylene (black)

Mounting Specifications:
- Panel hole: Round .102" Dia. (2.59mm)
- Panel thickness: 1/32" to 1/8"
- Use grommet retainer (RTN100)

Standoff Recommendation:
- Use standoff to adjust height of standard LED above PCB in order to maintain a maximum .050" clearance between LITEPIPE and LED



Surface Mount LED Application	Through-Hole LED Application

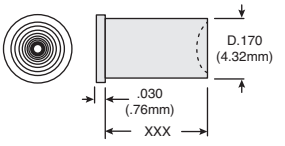
LITEPIPES® FOR SURFACE MOUNT LEDS

Material Specifications:
- Litepipe®: Acrylic (optical grade)
- Grommet: Polyethylene (black)
- Spring Clip: Spring steel, Nickel plated

Mounting Specifications:
- Panel hole: Round .171" Dia. (4.32mm)
- Panel thickness: .062" min. (1.57mm)
- Litepipes® from .200" to .500" use grommet retainer
- Litepipes® from .500" to 2.00" the spring clip is recommended for rigidity

Features:
- Surface mount, vertical and horizontal 3mm LEDs, litepipes for blending multicolor LEDs are available on special request



DIMENSIONS: in. (mm)

FLEXIBLE LIGHTPIPE FOR SMD AND THRU-HOLE LEDS

Features:
- Immune to electromagnetic interference (EMI)
- Graceful degradation under "extreme" bending conditions
- Diffused light output pattern—no hot spots or narrow field of view
- Works with CLB300, CLF280, CLR301 and SQB400 panel lenses

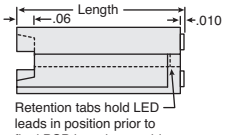
PCB STANDOFFS FOR BI AND TRI-LEAD COMPONENTS

Standoffs are designed for printed circuit board mounting of multi-lead devices ie. LEDs. They cope with various problems in mounting passive components. They include height control, lateral stability, lead retention, lead shorting, and solder flux removal. Device height control is simplified with mounts ranging in lengths from .12" to 1.0"

- Material: thermoplastic (black) UL 94V-0

DIMENSIONS: in.



Retention tabs hold LED leads in position prior to final PCB board assembly.

PCB MOUNTS FOR BI & TRI-LEAD LEDS

Allows the right angle mounting of 5mm LEDs used as diagnostic and logic indicator lights of PC boards. Permits the right angle mounting of the bi-lead as well as both configurations of the tri-lead LED.

For quantities greater than listed, call for quote.

MOUSER STOCK NO.	Price Each 1	10	100
593-PCH175			

TWO POSITION PCB MOUNTS

Specifically made for VCC's header post that are used on cable assemblies. This allows a proper lock of the two parts to resist disconnecting under normal use.

For quantities greater than listed, call for quote.

AVAGO FIBER OPTICS

Avago Technologies is the world's leading provider of fiber optic transmitters, receivers and transceivers for Networking and Storage solutions. Avago Technologies offers unmatched quality with high-volume, low-cost manufacturing techniques.

Fiber Optic Components for Industrial, Automotive and Consumer Applications

Optical Transmitters

Optical transmitters use either a light emitting diode (LED) or the laser diode as the light source. These devices are packaged in plastic housings and support various common connector types.

For quantities greater than listed, call for quote.

Optical Receivers

The PIN optical receiver converts the modulated light coming from the optical fiber back into a replica of the original signal applied to the transmitter.

For quantities greater than listed, call for quote.

AFBR-54 Series

Avago Technologies is the world's leading provider of fiber optic transmitters, receivers and transceivers for Networking and Storage solutions.
Avago Technologies offers unmatched quality with high-volume, low-cost manufacturing techniques.

DIGITAL PROXIMITY AND ANALOG AMBIENT LIGHT SENSOR

Features:

- Integrated module with built-in IR LED, IR Detector, Digital Signal Conditioning ASIC and Analog ALS
- Package size: L 6.1mm x W 3.9mm x H 1.75mm
- Sensor power supply voltage range: 1.7V to 2.5V
- I2C Bus power supply voltage range: 1.7V to 3.6V
- Broad VLED range for PS: 2.5V to 5V
- PS Shutdown Current 1µA Typical
- ALS approximate the Human Eye response
- Low sensitivity variation across various light sources
- ALS Output linearity up-to 5k Lux range
- Operational under sunlight (PS)
- Artificial light Immunity
- Low crosstalk between Emitter and Detector
- Programmable LED driving current and burst pulse control (PS)
- Interrupt logic with Programmable Threshold
- Lead-free and ROHS Compliant

Applications:

- PDA and mobile phones
- Portable and Handheld devices
- Personal Computers/Notebooks
- Amusement/Games/Vending Machines
- Contactless Switches

RoHS Compliant

For quantities greater than listed, call for quote.

SIGNAL CONDITIONING IC OPTICAL PROXIMITY SENSORS WITH DIGITAL I²C INTERFACE

Features:

- Low power consumption
- Complete shutdown mode
- Supply voltage : 2.4V to 3.6V
- Operational in sunlight conditions up to 100klux (with HSDL-9100)
- Artificial light immunity
- Analog and Digital output available
- Wide bandwidth Trans-impedance amplifier
- External capacitor and resistor for integration and gain controls
- Flexibility to enhance detection distance up to 200mm with HSDL-9100 or further with external discrete pair
- Small 2mm x 2mm QFN 8-pin package
- Design flexibility to pair with Avago Proximity Sensors or discrete pair solution

Applications:

- PDA and mobile phones
- Digital Camera
- Portable and Handheld devices
- Personal Computers/Notebooks
- Amusement/Games/Vending Machines
- Industrial Automation
- Contactless Switches
- Sanitary Automation

RoHS Compliant

FIBER OPTIC TRANSCEIVERS

Avago Technologies portfolio of optical transceivers include ATM/SONET, Ethernet, Storage, Parallel and WDM Transceivers

Avago Technologies is the leading supplier of fiber optic transceivers, with manufacturing and testing procedures that produce the industry's most reliable devices. Avago's broad portfolio of Ethernet, SONET and Fibre Channel transceivers supports all speeds and includes transmitters and receivers for industrial and automotive applications. The company's support and order fulfillment organizations provide unmatched service and delivery worldwide.

RENESAS/CEL Optocouplers

RoHS Compliant This product is RoHS compliant.

California Eastern Laboratories

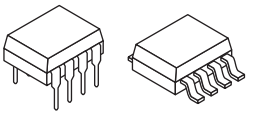
RENESAS/CEL SINGLE TRANSISTOR OPTOCOUPLERS

Applications:
Can be used as an interface circuit for various instrumentations and control equipment in the following:
- AC line/digital logic
- Twisted pair line receiver
- Digital logic/digital logic
- Telephone/telegraph line receiver

Features:
- High isolation voltage
- High current transfer ratio
- Low cost
- High speed switching

Safety Standards:
UL = UL Recognized (UL File No: E72422(S))
UL/BSI = UL Recognized and BSI Approved
UL File No.: E72422(S)/BSI Approved No.: 7112/7420

LEAD-FREE RoHS Compliant



DC Optocouplers, Low Speed Logic Applications

RENESAS/CEL Optocouplers

RoHS Compliant **This product is RoHS compliant.**

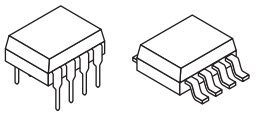
CEL
California Eastern Laboratories

Applications:
Can be used as an interface circuit for various instrumentations and control equipment in the following:
- AC line/digital logic
- Twisted pair line receiver
- Digital logic/digital logic
- Telephone/telegraph line receiver

Features:
- High isolation voltage
- High current transfer ratio
- Low cost
- High speed switching

Safety Standards:
UL = UL Recognized [UL File No: E72422(S)]
UL/CSA = UL Recognized and CSA Approved
UL File No.: E72422(S)/CSA File No.: CA101391
UL/BSI = UL Recognized and BSI Approved
UL File No.: E72422(S)/BSI Approved No.: 7112/7420

LEAD-FREE RoHS Compliant



DARLINGTON TRANSISTOR OPTOCOUPLERS

LASER DIODES

NX7338BF-AA-Features:
- High output power
  P_f = 110mW @ I_{FP} = 400mA*1
- Long wavelength
  λ_c = 1 310nm

*1 Pulse Conditions: Pulse width (PW) = 10μs, Duty = 1%

NX7538BF-AA-Features:
- High output power
  P_f = 80mW @ I_{FP} = 400mA*1
- Long wavelength
  λ_c = 1 550nm

*1 Pulse Conditions: Pulse width (PW) =10μs, Duty = 1%

RoHS Compliant

***Multiple Quantum Well structured Fabry-Perot Laser Diode Coaxial Module**

PHOTO DIODES

Features:
- **Small Dark Current:** I_D = 500nA
- **Small Terminal Capacitance:** C_T = 0.35pF at 0.9V_{BR}
- **High Quantum Efficiency:** I_D = 500nA
- **Small Terminal Capacitance:** C_T = 0.35pF at 0.9V_{BR}
- **High Quantum Efficiency:** μ = 90% at λ = 1310nm, M = 1 μ = 77% at λ = 1550nm, M = 1
- **High Speed Responder:** f_C = 2.5GHz at 0.9V_{BR}
- **Detecting Area Size:** ø30μm
- **Coaxial Module with Single Mode Fiber (SM-9/125)**

RoHS Compliant

FULLY INTEGRATED PROXIMITY AND AMBIENT LIGHT SENSOR WITH INFRARED EMITTER AND I²C INTERFACE

◆Surface Mount Devices

Features:

- Built in infrared LED and photo pin diode for proximity function
- Built in ambient light photo pin diode with close to human eye sensitivity characteristics.

Applications:

- Proximity sensor for mobile devices (e.g. smart phones, touch phones, PDA, GPS) for touch screen locking, power saving, etc
- Integrated ambient light function for display/keypad contrast control and dimming of mobile devices
- Proximity/optical switch for consumer, computing and industrial devices and displays
- Dimming control for consumer, computing and industrial displays

VISHAY Opto Components

RoHS Compliant **This product is RoHS compliant.**

IR RECEIVERS FOR 3D TV

Vishay Intertechnology has developed two infrared receivers specifically for the LCD shutter glasses used with 3D-ready TV sets. These receivers are designed to be assembled into active 3D glasses, where they received infrared signals from the TV set and ensure the glasses' LCD shutters open and close in proper synchronization to create the 3D effect.

Features:
- Eliminates possible interference from TV and set-top box remote control signals
- Eliminates interference with remote control emitters and receivers
- Enables more streamlined designs for 3D glasses

RECEIVERS

Features:
- High sensitivity for a large transmission range (35m/120ft)
- Available for carrier frequencies from 30kHz up to 56kHz
- No external components necessary
- Output compatible for use with a micro-controller
- Relevant quality certifications ISO 9001, QS9000VDA6.1

Applications:
- TV sets
- Video recorders
- Satellite receivers
- DVD players
- Slide projectors
- Air-conditioners
- Sensors and Light barrier systems for long distances

AMBIENT LIGHT SENSOR

Features:
- Adapted to human eye responsivity
- High photo sensitivity
- Suppression filter for near infrared radiation
- Floor life: 168 h, MSL 3, acc. J-STD-020
- AEC-Q101 qualified

Applications:
- Automotive sensors
- Ambient light sensors
- Mobile phones
- Notebooks
- Computers
- Cameras
- PDA's

For quantities greater than listed, call for quote.

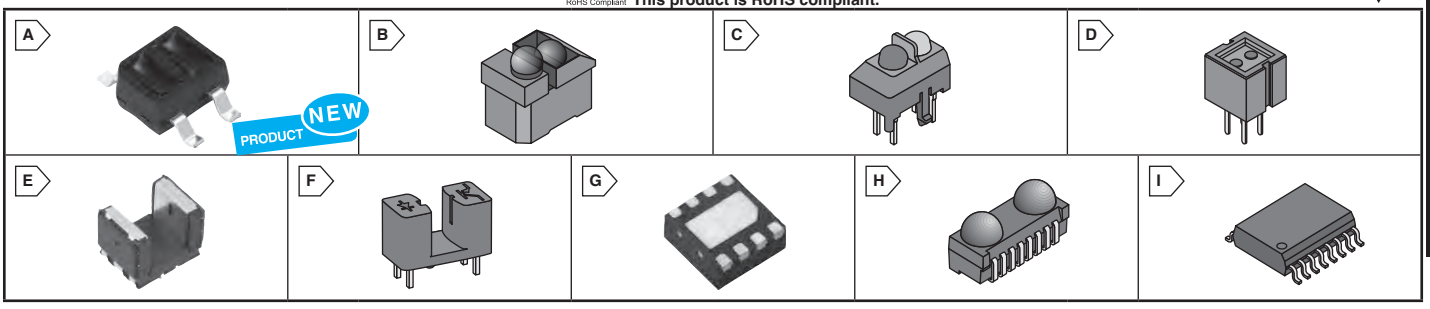
VISHAY Opto Components

RoHS Compliant **This product is RoHS compliant.**



Vishay is a leading manufacturer of optical sensors. These sensors integrate an infrared emitter and photo detector in a single package. The most common types of optical sensors are transmissive and reflective sensors. Both types detect the presence of an object without any mechanical or electrical contact. The output signal of the sensor is used to control various functions of an application.

REFLECTIVE SENSORS

Reflective sensors incorporate an infrared emitter and photo detector adjacent to each other. When an object is in the sensing area, the emitted light is reflected back towards the photo detector, the amount of light energy reaching the detector increases. This change in light energy or photo current is similarly used an input signal in the application.

TCND3000 is a reflective optical sensor for applications using the HALIOS® (High Ambient Light Independent Optical System) principle. It consists of an infrared emitter and a photodetector forming the optical sensing path. According to the HALIOS principle a second infrared emitter is used for compensation of disturbing ambient light.

Features:

- Detector type: pin photodiode
- Dimensions (L x W x H in mm): 4.83 x 2.54 x 2.21
- Peak operating distance: 20mm
- Peak operating range: 10mm to 20mm
- Typical output current under test: IC > 5.6µA
- Daylight blocking filter
- Touch distance: 10mm (1)
- Proximity distance: 20mm (1)
- High ambient light suppression for sunlight: ≥200klx
- High ambient light suppression for CIE standard illuminant A: ≥100klx

For quantities greater than listed, call for quote.

782—TCND3000	B	5	10	±20	0.01	5.6	885	----				

Applications:

- Position sensor for shaft encoder
- Detection of reflective material such as paper, IBM cards, magnetic tapes etc.
- Limit switch for mechanical motions in VCR
- General purpose - wherever the space is limited
- Optoelectronic scanning and switching devices i.e., index sensing, coded disk scanning etc. (optoelectronic encoder assemblies).

For quantities greater than listed, call for quote.

TRANSMISSIVE SENSORS

Transmissive sensors, also called interrupter sensors, incorporate an infrared emitter and photo detector that face each other as shown. When an object is located between the emitter and detector in the sensing path, it interrupts or breaks the optical beam of the emitter. The light energy reaching the detector changes. This change in light energy or photo current is used to affect an event in the application.

Applications (TCPT1300):

- Automotive optical sensors
- Accurate position sensor for encoder
- Detection of motion speed

Applications (TCST1230):

- Optical switch
- Shaft encoder

For quantities greater than listed, call for quote.

IR CODE LEARNING IC

Vishay Semiconductors' VSOP98260 Preamplifier Circuit is designed for use in an IR learning application together with a photo PIN diode or IR LED as optical detector. Compatible with all data formats for IR remote controls and immune to current caused by light sources such as tungsten bulbs or fluorescent lamps. This IC takes the signal from the IR detector and then shapes and amplifies the signal. This will modulate any signal from 20 - 60kHz, and could replace up to 17 discrete components, and the output will accurately correspond to the carrier frequency and data burst length of the input signal.

IrDA - TRANSCEIVERS

Vishay's infrared data transceivers enable short-distance wireless communication. Design engineers in the growing handheld market trust in their performance and rely on the application engineering support that only Vishay provides. Vishay offers a transceiver for every application.

Applications:

- Mobile Phone
- PDAs
- Notebook Computers
- Digital still and video cameras
- Printers, fax machines, photo copiers, screen projectors
- Data Loggers
- GPS
- Medical data collection
- Kiosks, POS, point and pay devices including IrFM - applications
- Internet TV boxes, video conferencing systems

For quantities greater than listed, call for quote.

IrDA - ENCODER/DECODER

The TOIM4232 Endec IC provides proper pulse shaping for the SIR IrDA front end infrared transceivers as of the 4000-series. For transmitting the TOIM4232 shortens the RS232 output signal to IrDA compatible electrical pulses to drive the infrared transmitter. In the receive mode the TOIM4232 stretches the received infrared pulse to the proper bit width depending on the operating bit rate. The IrDA bit rate varies from 2.4 kbit/s to 115.2 kbit/s. The TOIM4232 is using a crystal clock 3.6864 MHz for its pulse stretching and shortening. The clock can be generated by the internal oscillator. An external oscillator can be used too. The TOIM4232 is programmable to operate from 1200 bit/s to 115.2 kbit/s by the communication software through the RS232 port. The output pulses are software programmable as either 1,627 us or 3/16 of bit time. The typical power consumption is very low with about 10 mW in operational state and in the order of a few microwatts in standby mode.

Features:

- Pulse shaping function (shortening and stretching) used in SIR IrDA applications
- Directly interfaces the SIR transceiver TFD..- and TFB..- series to an RS232 port
- Programmable baud clock generator (1200Hz to 115.2kHz), 13 baud rates
- 3/16 bit pulse duration or 1.627µs pulse selectable
- Low operating current

For quantities greater than listed, call for quote.

USB MICROCONTROLLERS

Cypress offers the industry's broadest line of USB microcontrollers, as well as a full set of development tools, supporting cost-driven applications such as keyboards and mice, as well as high-performance applications like printers, scanners, xDSL modems, and digital cameras. Cypress has a wide range of solutions for Low-Speed USB applications, Full-Speed USB applications and USB Hub applications.

- Temperature range: commercial (0°F ~ 70°F)

CYPRESS Controllers, PHYs and CPLDs

RoHS Compliant **This product is RoHS compliant.**

USB MICROCONTROLLERS (CONT.)

Cypress offers the industry's broadest line of USB microcontrollers, as well as a full set of development tools, supporting cost-driven applications such as keyboards and mice, as well as high-performance applications like printers, scanners, xDSL modems, and digital cameras. Cypress has a wide range of solutions for Low-Speed USB applications, Full-Speed USB applications and USB Hub applications.

CAPSENSE CONTROLLERS

CapSense is available in three families. CapSense Express solutions (CY8C201xx) support simple button/slider designs with up to 10 capacitive buttons and 1 slider. CapSense solutions (CY8C20x34) are a fully-programmable platform supporting up to 25 capacitive buttons and 5 sliders. In addition, 2-dimensional trackpad solutions are also supported. The CapSensePLUS family is the most full-featured family in the CapSense portfolio. It can support up to 44 capacitive buttons and 8 sliders. CapSensePLUS also provides suppor for advanced functionalities such as proximity detection, 2-dimensional trackpads and analog/digital design integration. The newest 8C20xx6 family adds 1.8V and best in class current consumption with up to 33CS buttons.

TRUETOUCH™ TOUCHSCREEN SOLUTIONS

Cypress, the leader in capacitive touch sensing solutions, is revolutionizing the touchscreen market. Cypress' TrueTouch™ Touchscreen Solutions, powered by PSoC® Programmable-System-on-Chip technology, offer unmatched flexibility and the broadest portfolio available. The projected capacitive TrueTouch Solutions give designers a choice between different usage models, different touchscreen vendors and different LCD vendors. They also enable designers to accommodate last minute changes - something no other touchscreen product can deliver.

FREESCALE Kinetis Cortex M-4 MCUs

freescale™

RoHS Compliant **This product is RoHS compliant.**

FREEDOM DEVELOPMENT PLATFORM

Features:

- KL25Z128VLK4—Cortex-M0+ MCU with: 128KB flash, 16KB SRAM
  Up to 48MHz operation
  USB full-speed controller
- OpenSDA—sophisticated USB debug interface
- I2S interface for direct audio interfacing with an external ADC/DAC
- Tri-color LED
- Capacitive touch "slider"
- Freescale MMA8451QR1 accelerometer
- Flexible power supply options
- Power from either on-board USB connector
- 5-12V Vin from IO header
- 5V provided to IO header
- 3.3V to or from IO header
- Reset button
- Expansion IO compatible with the Arduino Uno form factor

841-FREEDOM-KL25Z	FRDM-KL25Z	Kinetis L Series Arm Cortex M0+ Development Board	

KINETIS K SERIES ARM CORTEX-M4 MICROCONTROLLERS

The Kinetis portfolio of microcontrollers pairs the efficient ARM® Cortex™ -M4 core with cutting–edge, low–power design techniques. The result is the industry's lowest power Cortex–M4 based MCU solutions.

- New Cortex–M4 core with single cycle DSP instructions paired with Freescale's efficient platform
- 90nm Thin Film Storage (TFS) process technology allows dynamic power to be reduced to as low as 200μA/MHz
- Special design techniques used to reduce leakage allowing lower power standby modes
- Flexible mode controller enables 10 different modes of operation which allows power reduction based on the application requirements
- MCU and many peripherals are able to operate down to 1.71V with full analog and flash capabilities
- MCU architecture supports adjustable clocking for peripherals and the core enabling quick changes to MCU clocks and different clock speeds
- Separate power supply for the Real Time Clock (RTC) allows low power time keeping with less than 1μA power consumption

Kinetis K10 - Baseline MCUs

- Serial Interface Type: UART, SPI, I2C, I2S, CAN
- Touch Sensing Interface
- Memory Protection Unit (MPU)
- Watchdog OSC/Timer
- Real-Time Clock
- Analog Comparator
- Supply Voltage: 1.71 to 3.6V

For quantities greater than listed, call for quote.

KINETIS SERIES ARM CORTEX-M4 MICROCONTROLLERS

Kinetis K60 - Ethernet Crypto MCUs

- Serial Interface Type: UART, SPI, I2C, I2S, CAN, USB, Ethernet
- Touch Sensing Interface
- Memory Protection Unit (MPU)
- Watchdog OSC/Timer
- Real-Time Clock
- Analog Comparator
- Supply Voltage: 1.71 to 3.6V
- Core Operating Freq. Max: 100MHz
- D/A Converter: 12-bits

For quantities greater than listed, call for quote.

Freescale's Flexis Series Microcontrollers provide the industry's first roadmap for 8- and 32-bit compatible architectures. From the S08 controllers to the full-featured ColdFire® devices,the Flexis Series is a range of compatible MCUs sharing tools and peripherals to ease your design process and accelerate your time to market. This means that you can move from one device to the next compatible device, from the low end to the high end.

FLEXIS AC FAMILY - S08AC 8-BIT LARGE APPLIANCE/INDUSTRIAL MCUS

FLEXIS JM FAMILY

The S08JM family extends Freescale's 8-bit embedded USB controller family with up to 60K-bytes of Flash memory, a full speed USB 2.0 device controller and a 12-channel, 12-bit analog-to-digital converter. The S08 JM family also has several system protection features, such as low voltage detect and a Computer Operating Properly (COP) module. The S08JM family devices, are supported by the Freescale USB-LITE Stack by CMX, providing a direct migration path to high performing USB microcontrollers.

For quantities greater than listed, call for quote.

FLEXIS QE FAMILY

The Flexis QE series hosts Freescale's new ultra-low-power technology that reduces power consumption while meeting your target performance needs. The Flexis devices also share common sets of peripherals and development tools to deliver the ultimate in migration flexibility. The MC9S08QE128 (8-bit) and MCF51QE128 (32-bit) devices are available to maximize your performance while minimizing your power and allowing easy migration and development. The QE family, comprised of a pin-compatible 8-bit and 32-bit device duo, is the first family in the Flexis series.

RoHS Compliant

RS08 - REDUCED INSTRUCTION SET S08 CORE MICROCONTROLLERS

The RS08 core is a reduced version of the S08 central processing unit (CPU) that has been specifically designed for small pin-count devices with under 16KB memory. Thirty percent smaller than the S08 CPU, it is more efficient and cost-effective for simple electro-mechanical devices that are migrating to fully solid-state electronic operation or portable devices that have evolved into smaller or even disposable versions.

RoHS Compliant

HCS08 - CORE MICROCONTROLLERS

High-performance and low power, the HCS08 does not sacrifice performance to provide low power 1.8V operation.
HCS08 Features - Multiple power management modes, including a 20 nanoamp (nA) power-down mode

- A zero-component auto-wakeup from "stop" to help reduce costs and reduce power to 0.7 microamp (μA) - Up to 40MHz CPU/20MHz bus at 2.1V and 16MHz CPU/8MHz bus at 1.8V
- A programmable internal clock generator with temperature and voltage compensation (typical drift < 2%) designed for reliable communications, fast start up and reduced system cost
- In-application reprogramming and data storage via third-generation 0.25μ flash technology
- High integration including four serial communication ports, up to 8 timer/PWMs, and an 8-channel 10-bit analog-to-digital converter specified down to 1.8V

RoHS Compliant

S08JS Family - Full-Speed 2.0 USB Device Controller and Integrated USB Transceiver

The JS16 extends Freescale's entry-level 8-bit embedded USB controller family with up to 16KB of flash memory and a full-speed USB 2.0 device controller. The JS16 also has several features for system protection, such as low voltage detection and a Computer Operating Properly (COP) module. The JS16 device is ideal for a variety of industrial control applications and consumer devices, including PC peripherals and remote controls.

For quantities greater than listed, call for quote.

S08LL Ultra Low-Power MCU with Integrated LCD Driver

Freescale introduces the first S08 ultra-low-power MCU with LCD driver. The MC9S08LL16/8 helps you reach your target performance levels while minimizing power consumption in your design, demonstrating extreme energy efficiency for ultra-long operation in battery-powered applications.

For quantities greater than listed, call for quote.

S08EL/S08SL with Enbedded Slave LIN Controller (SLIC)

Freescale's S08EL andS08SL 8-bit microcontrollers with embedded slave Local Interconnect Network (LIN) interface controller (SLIC) and EEPROM help to increase LIN slave performance and reduce development time. Freescale Semiconductor's 8-bit EL and SL families of microcontrollers (MCUs) are designed for LIN slave and general market applications. The EL family is positioned as higher end, offering higher memory and more peripherals, while the SL family is intended for more cost-sensitive applications.

For quantities greater than listed, call for quote.

HC08 CORE MICROCONTROLLERS

Free's HC08 Family of 8-bit microcontrollers are small, general purpose, low-power and feature rich. The HC08 Core products are highly integrated, general purpose devices with ADC, analog comparator, multiple communications options, timers, and on-chip ICE.

From a basic bare-bones controllers in a tiny 8-pin quad flat non-leaded (QFN) package to feature-rich silicon in a 64-lead quad flat package (QFP), the HC08 MCU is an industry workhorse that can flaunt an impressive array of peripherals.

- 8 or 10-bit analog-to-digital converters (ADCs)
- Multichannel timers
- A wide variety of communications protocol support, inculding universal serial bus (USB), controller area network (CAN), local interconnect network (LIN), J1850 and radio frequency (RF)

HC08EY Family - Low Cost, High-Performance M68HC08 8-Bit MCU

COLDFIRE® MCF51CN128 FAMILY - 32-BIT ETHERNET MCUS

Freescale's new MCF51CN128 Ethernet MCUs are low-cost, low-power, high-performance devices designed for developers who want to add Ethernet connectivity to their commercial and industrial applications.

For quantities greater than listed, call for quote.

MOUSER STOCK NO.	Freescale Part No.	Package	Internal RAM (Byte)	Internal Flash (Byte)	Serial Interface Type	Bus Freq. (MHz) (Max.)	ADC	Timer Channels	I/O Pins	Price Each 1	25	100
841-MCF51CN128CGT	MCF51CN128CGT	QFN-48	24	128	SCI,SPI,I2C	25	12-bit/12-ch	3	38			
841-MCF51CN128CLH	MCF51CN128CLH	LQFP-64	24	128	SCI,SPI,I2C	25	12-bit/12-ch	3	54			

COLDFIRE® MCF51EM FAMILY - 32-BIT RISC MICROCONTROLLERS

The MCF51EM256/128 devices offer a flexible LCD controller, RTC with tamper detection, and dual 128K/64K blocks of FLASH for robust field firmware updates. Combine this with an accessible Poly-Phase Reference Design and a fully functional DEMOEM board and you have all the ingredients of a turnkey electrical metering solution with customized silicon designed specifically for the electrical metering market.

For quantities greater than listed, call for quote.

COLDFIRE® MCF5225X EXPANDED CONNECTIVITY MCUS

The MCF5225x family consists of highly integrated devices with on-chip USB, Ethernet, CAN and encryption functions, featuring the complete Freescale MQX RTOS software at no additional cost. This solution is ideal for factory automation, building control, and medical applications.

For quantities greater than listed, call for quote.

COLDFIRE® 32-BIT MICROCONTROLLERS

The ColdFire® product portfolio offers a wide mix of performance, price, integration and debugging capabilities for embedded designers. Its integration possibilities are limited only by imagination, and its 20-year history of 68K legacy is something no other competitor can offer. With these features to work with, the ColdFire® architecture is in a leadership position in the 32-bit embedded space.

MPC5125 - LOW POWER, HIGH PERFORMANCE MICROPROCESSOR

Features:

- Robust high-performance Power Architecture™ display solution at a low-cost/power-efficient point with full OS and middleware support.
- Dual 10/100BT Ethernet for bridging solutions
- Display interface supporting WXGA/720p, 24-bit color
- Rich set of connectivity:
  - 10x Flexible PSC (SPI, UART, AC'97, I2S, Multi-Ch TDM)
  - 4x CAN2.0 A/B , data rates in excess of 1Mbs
  - 2x High Speed USB 2.0 Host/Device/On-The-Go
  - 2x SDHC (MMC, SD, SDIO expansion)

MC56F800x DIGITAL SIGNAL CONTROLLERS

The entry-level MC56F8006/2 DSC provides the most cost-optimized solution for mathematically-intensive, power-sensitive real-time control applications. The MC56F8006/2 series uses the 56800E core, which is based on a dual Harvard-style architecture consisting of three execution units operating in parallel. This allows as many as six operations per instruction cycle. The MCU-style programming model and optimized instruction set allow straightforward generation of efficient, compact DSP and control code.

For quantities greater than listed, call for quote.

FREESCALE Tower System Development Tools

RoHS Compliant **This product is RoHS compliant.**

FREESCALE TOWER SYSTEM MCU MODULES

Freescale's Tower System is a modular development platform designed to save you months of development time now and in the future through rapid prototyping and tool re-use. The Tower System consists of interchangeable and reusable modules along with open source design files make it easy to customize your design and reduce low level design giving you more time to focus on differentiated solutions.

FTDI USB Host Controllers & Interface Adapters

RoHS Compliant **This product is RoHS compliant.**

FTDI FT311D USB ANDROID HOST

The FT311D provides a bridge between peripheral hardware and an Android platform with a USB device port. The FT311D will enumerate the Android platform and provide an interface to either, GPIO, UART, PWM, I2C Master, SPI Slave or SPI Master.

Features:

- Entire USB protocol handled on the chip. No USB specific firmware programming required.
- Interface options selectable via 3 mode select pins
- 7 GPIO lines interface option
- Basic UART interface with RXD, TXD, RTS, CTS pins option
- 4 PWM channels option
- I2C master interface option
- PI Slave/Master interface option supporting modes 0, 1, 2 and 3 with MSB/LSB options
- Suitable for use on any Android platform supporting Android Open Accessory Mode

FTDI VINCULUM AND VINCULUM-II USB HOST CONTROLLER DEVICES

FTDI VNC2 USB Host Controller IC

Vinculum-II (VNC2) is the second generation of FTDI's Vinculum family of dual USB Host Controllers. VNC2 expands on the abilities of the VNC1L devices with more memory and a faster processor. The VNC2 features a powerful 16/32-bit width (instruction/data) MCU core, with embedded 256KB Flash and 16KB RAM memory. The device supports a range of flexible interfaces including UART, SPI, FIFO and PWM. The complete USB protocol data processing is handled entirely by hardware resources within the device freeing up processing resources for user developed applications.

For quantities greater than listed, call for quote.

FTDI VINCULUM AND VINCULUM-II DEVELOPMENT TOOLS

FTDI V2-EVAL Evaluation and Development Kit for VNC2

The V2-EVAL is a hardware platform designed to support easy evaluation of FTDI's Vinculum-II (VNC2) series of embedded USB host controller devices. TheVNC2 is accessed via an onboard daughterboard module enabling support for 32, 48 and 64-pin QFN package types. Daughterboard modules are sold separately.

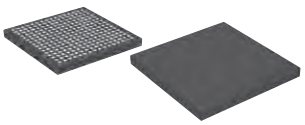
INTEL Ethernet ICs

RoHS Compliant **This page of product is RoHS compliant.**

GIGABIT ETHERNET CONTROLLERS

Intel's Ethernet Network Controllers are single, compact controllers with an integrated Gigabit Ethernet Media Access Control (MAC) and physical layer (PHY) or a physical layer (PHY) designed to connect to appropriate Intel chipsets with an integrated Media Access Controller (MAC). These devices are all designed for desktop, workstation and mobile PC Network designs with critical space constraints. Each devices allows for a Gigabit Ethernet implementation in a very small area that is footprint compatible with current generation 10/100Mbps Fast Ethernet designs.



For quantities greater than listed, call for quote.

GIGABIT ETHERNET PHYS

Intel's Gigabit Ethernet PHYs are compact, single-port integrated physical layer (PHY) devices that connect to appropriate Intel chipsets with an integrated Media Access Controller (MAC). The 82567 family of products are Gigabit copper networking components for mobile, desktop, workstation, and value-server designs with critical space constraints. The 82574L uses the PCI Express (PCIe) architecture and provides a single-port implementation in a relatively small area so it can be used for server and client configurations as a LAN on Motherboard (LOM) design.

ETHERNET OPTICS

Intel's family of Intel® Ethernet X520 Server Adapters with SFP+ connectivity are the most flexible and scalable Ethernet adapters for today's demanding data center environments. The escalating deployments of servers with multi-core processors and demanding applications such as High Performance Computing (HPC), database clusters, and video-on-demand are the types of applications driving the need for 10 Gigabit connections. Powered by Intel's third-generation 10 GbE network controller, the Intel® Ethernet 82599 10 Gigabit Ethernet Controller, the X520 server adapter family addresses the demanding needs of the next-generation data center by providing unmatched features for virtualization, flexibility for LAN and SAN networking, and proven, reliable performance.

INTEL Central Processing Units (CPU)

RoHS Compliant **This page of product is RoHS compliant.**

CENTRAL PROCESSING UNITS (CPU)

Intel Processor families include the most powerful and flexible Central Processing Units (CPUs) available today. Utilizing industry leading 22nm device fabrication techniques, Intel continues to pack greater processing power into smaller spaces than ever before, providing desktop, mobile, and embedded products with maximum performance per watt across a wide range of applications.

16-BIT PIC24 FLASH MCUs

16-bit PIC24 microcontrollers offer a new level of performance and higher integration. Features supporting this compatibility between these families include common: instruction set and architecture (dsPIC DSCs add DSP capability), peripherals, pin-out, and tool suite including MPLAB® IDE, C30 C Compiler and MPLAB® PM3 Programmer, Real Ice, Explorer 16 Development Board.

MICROCHIP Microcontrollers and High Gain Amplifiers

RoHS Compliant **This product is RoHS compliant.**

32-BIT PIC32 FLASH MCUs

Features:
- 10-Bit ADC
- Preftech

For quantities greater than listed, call for quote.

HIGH-LINEARITY POWER AMPLIFIER

Features:
- Small package size
- High linear output power
- High speed power-up/-down
- Turn on/off time (10%~90%)<100ns

◆ **Surface Mount Device**

For quantities greater than listed, call for quote.

579-AC320011	AC320011	M2M PICtail Daughter Board	

PICMICRO DEMONSTRATION KITS

MOUSER STOCK NO.	Microchip Part No.	Description	Price Each
579-DM163014	DM163014	PICDEM 4 Demo Board for PIC12F629, 675, PIC16F630, 676, 684, 627A, 628A, 648A, 818, 819,87,88,1220,1320	
579-DM163022-1	DM163022-1	PICDEM 2 Plus 18-, 28- and 40-pin PIC16FXXX, PIC16F1XXX and PIC18 devices	
579-DM163029	DM163029	PICDEM Mechatronics	
579-DM163035	DM163035	PICDEM Lab Development Kit	
579-DM163045	DM163045	PICDEM Lab Development Kit	
579-DV164039	DV164039	PIC24FJ256DA210 Development Kit	

PICMICRO DEMONSTRATION KITS (CONT.)

MOUSER STOCK NO.	Microchip Part No.	Description	Price Each
579-DM240001	DM240001	PICDEM PIC24/dsPIC33 Explorer 16 Kit	
579-DM240002	DM240002	PICDEM PIC24/dsPIC33 Explorer 16 (44-Pin)	
579-DM240312	DM240312	PIC24FJ256DA210 Development Board	
579-DM240313	DM240313	PIC18F87K22 Development Board	
Connectivity			
579-DV250501	DV250501	MCP250XX CAN Developer's Kit	

DSPIC 16 BIT DSC DEMONSTRATION BOARDS

MOUSER STOCK NO.	Microchip Part No.	Description	Price Each
579-DM300018	DM300018	dsPICDEM 2 Demo Board	
579-DM300019	DM300019	dsPICDEM 80L Starter Demo Board	
579-DM330021-2	DM330021-2	dsPICDEM MCLV-2 Demo Board	
579-DM300023	DM300023	dsPICDEM SMPS Buck Demo Board	
579-DM300027	DM300027	16-bit 28-PIN Starter Demo Board	
579-DM330013	DM330013	dsPIC33F and PIC24H Microstick Dev Tool	

DEMO AND EVKITS FOR PICMICRO

MOUSER STOCK NO.	Microchip Part No.	Description	Price Each
579-MA180029	MA180029	PIC18F47J56 Full Speed USB Demo Board	
579-DV164006	DV164006	MPLAB In-Circuit Debugger 2 Evaluation Kit	
579-DV164033	DV164033	MPLAB ICD 2 with Explorer 16 Dev. Board	
579-DV164005	DV164005	MPLAB In-Circuit Debugger 2 Module	
579-DV164035	DV164035	MPLAB In-Circuit Debugger 3	
579-DV164007	DV164007	MPLAB ICD 2 ws Module (includes ICD 2 Module, USB and RS232 cable, Power Supply)	
579-DV007004	DV007004	Production Prog/Dev Kit with built-in ICSP Programs PICmicro and dsPIC30F devices	

DEVELOPMENT TOOLS

MOUSER STOCK NO.	Microchip Part No.	Description	Price Each
579-AC164112	AC164112	MPLAB ICD 2 Vpp Voltage Limiter	
579-ARD00354	ARD00354	MCP6N11 Amp IC Bridge Dev Tool	
579-DM240013-1	DM240013-1	PIC24F K-Series Development Board	
579-MCP9800DM-PCTL	MCP9800DM-PCTL	Thermal Sensor PICtail Demo Board	
579-MCP9800DM-DL	MCP9800DM-DL	Tempurature Data Logger Demo Board	
579-MCP3221DM-PCTL	MCP3221DM-PCTL	PICtail™ Demonstration Board	
579-MCP3551DM-PCTL	MCP3551DM-PCTL	Delta Sigma ADC Demo Board	
579-MCP402XEV	MCP402XEV	Non-Volatile Digital Pot Eval Board	
579-MCP2515DM-PCTL	MCP2515DM-PCTL	CAN Controller PICtail Demo Board	
579-MCP215XDM	MCP215XDM	Data Logger Demonstration Board	
579-MCP23X17EV	MCP23X17EV	Evaluation Board	
579-SOIC8EV	SOIC8EV	8-Pin SOIC/MSOP/TSSOP/DIP E Brd	
579-TC1047ADM-PICTL	TC1047ADM-PICTL	Temperature to Voltage	
579-TC2030-MCP-NL	TC2030-MCP-NL	Tag-Connect In-Circuit Cable No Legs	
579-TSSOP20EV	TSSOP20EV	20-Pin TSSOP/SSOP Evaluation Board	
579-VSUPEV	VSUPEV	Voltage Supervisor Evaluation Board	

MOTOR CONTROL DESIGN

MOUSER STOCK NO.	Microchip Part No.	Description	Price Each
579-DV330021	DV330021	dsPICDEM MCSM Dev Kit	
579-DM330022	DM330022	dsPICDEM MCSM Dev Board	

EVALUATION BOARDS

MOUSER STOCK NO.	Microchip Part No.	Description	Price Each
579-MCP1640EV-SBC	MCP1640EV-SBC	MCP1640 Synchronous Boost Converter Eval Board	
579-MCP1726EV	MCP1726EV	MCP1726 1A LDO Evaluation Board	
579-MCP651EV-VOS	MCP651EV-VOS	MCP651 Input Offset Evaluation Brd	
579-MCP73213EV-2SOVP	MCP73213EV-2SOVP	MCP73213 Dual Eval Board	
579-MCP73831EV	MCP73831EV	MCP73821 Evaluation Board	
579-MCP73833EV	MCP73833EV	MCP73833 Evaluation Board

ENERGY METER IC

The EM773 is an ARM Cortex-M0 based, low-cost 32-bit energy metering IC, designed for 8/16-bit smart metering applications. The EM773 offers programmability and on-chip metrology functionality combined with a low power, simple instruction set and memory addressing with reduced code size compared to existing 8/16-bit architectures. The EM773 operates at CPU frequencies of up to 48MHz. The peripheral complement of the EM773 includes up to 32kB of flash memory, up to 8kB of data memory, one Fast-mode Plus I2C-bus interface, one RS-485/EIA-485 UART, one SPI interface with SSP features, three general purpose counter/timers, up to 25 general purpose I/O pins, and a metrology engine for energy measurement.

SILICON LABS Microcontrollers

RoHS Compliant This page of product is compliant.

HIGH POWER, LOW-POWER, 32-BIT PRECISION32™

Features:

- 32-bit ARM® Cortex™-M3 CPU
  80MHz maximum frequency, Single-cycle multiplication, hardware division support nested vectored interrupt control (NVIC) with 16 levels of interrupt priority

C8051F70X CAPACITIVE TOUCH SENSE MCUs

The Silicon Labs C8051F70x MCU family meets designers' demands for Capacitive Touch Sense features and best-in-class performance. These high performance devices perform a wide range of mixed-signal functions and includes a high-speed 8051 Core, Capacitive Touch Sense with 16-bit capacitance-to-Digital Converter, superior noise immunity, fast 40µs acquisition time, and digital peripherals that include up to 39 port I/O with high sink current. The C8051F70x MCU family is robust and reliable with noise immune architecture with best-in-class SNR. Silicon Labs offers a simple GUI and API library that make implementation ast and easy.

RoHS Compliant

Features:

- On-chip voltage comparator
- Capacitive Sense interface with 32 input channels
- Precision calibrated 24.5MHz internal oscillator
- In-system, full-speed, non-intrusive debug interface (on-chip)

C8051F8XX CAPACITIVE TOUCH SENSE MCUS

The QuickSense™ C8051F8xx family of capacitive sensing MCUs provides an easy and reliable solution for capacitive buttons, sliders, wheels and capacitive proximity sensing. The C8051F800 family builds upon the C8051F700 MCU family by adding a lower-pin count, small form factor option to the industry's fastest capacitive touch sense solutions. The C8051F800 adds 16-, 20- and 24-pin package options to the existing 48- and 64-pin C8051F700, providing more options to fit products with the optimal pin count, size and cost. Additional resources such as a 10-bit ADC and digital PWM provide additional human interface support for accelerometers, vibratory haptic feedback, LED illumination control, temperature sensing and resistive touch screen sensing.

RoHS Compliant

C8051F9XX ULTRA LOW POWER TOUCH SENSE MCUS

The QuickSense™ C8051F99x family of capacitive sensing MCUs provides the lowest power and highest sensitivity touch sensing solution for capacitive buttons, sliders, wheels and capacitive proximity sensing. Architected from the popular C8051F9xx platform the device features a 150µA/MHz active mode and multiple sleep modes as low as 10nA. With up to 14 capacitive sensing inputs and a patent-pending charge timing hardware capacitance to digital converter, the C8051F99x achieves unparalleled touch sensitivity, speed and ultra-low power in packages as small as a 3mmx3mm QFN20.

C8051F9XX ULTRA LOW POWER TOUCH SENSE DEVELOPMENT TOOLS

MOUSER STOCK NO.	Silicon Labs Part No.	Description	Price Each
634-F990SLIDEREK	F990SliderEK	Demonstrates the system level possibilities that can be achieved when combining Silicon Labs QuickSense™ technology with the C8051F99x ultra low power capacitive sensing MCU.	
634-C8051F996DK	C8051F996DK	Development Kit for the C8051F990, F991, F996 and F997 family of ultra low power capacitive sensing MCUs and the C8051F980, F981, F982, F983, F985, F986, F987, F988 and F989 family of ultra low power MCUs.	

C8051FXXX PRECISION MIXED-SIGNAL MICROCONTROLLERS

Silicon Laboratories' mixed-signal microcontrollers integrate world-class analog, a high-speed pipelined 8051 CPU, ISP Flash memory and on-chip JTAG based debug in each device. Configurable high-performance analog, up to 100MIPS core and in-system programmability provide the user with complete design flexibility, improved time-to-market, superior system performance and greater end product differentiation

RoHS Compliant

USB MICROCONTROLLERS

USB MCUs feature an on-board USB 2.0 function controller with an integrated transceiver and on-chip clock recovery. No external resistors, crystal, voltage regulator, EEPROM or other components are required. On-chip resources include a high-speed 8051 CPU with up to 64 kB Flash, UARTs, SMBus, SPI, timers, counters and PWM generators. On-chip analog features include a multi-channel 10-bit ADC, voltage reference, internal oscillator, comparators and a temperature sensor. Available in 28-pin QFN, 32-pin LQFP or 48-pin TQFP packages, these devices provide a single-chip solution for embedded USB applications.

RoHS Compliant

SMALL FORM FACTOR MICROCONTROLLERS

The Small Form Factor family of microcontrollers combines a high-speed 8051 CPU, Flash memory and high-performance analog circuits in remarkably small packages allowing system designers to reduce component count while improving system performance. These highly-integrated devices are optimized for space-constrained, low-power, low-cost applications in consumer, industrial, communications and automotive markets. Development is quick and easy due to low-cost, professional development tools and in-system debug. High integration, small size, high CPU throughput and best-in-class analog peripherals make the Small Form Factor family ideal for a wide range of applications.

SILICON LABS Microcontrollers

RoHS Compliant **This product is RoHS compliant.**

AUTOMOTIVE MICROCONTROLLERS

Silicon Labs offers automotive customers a complete family of of small footprint, high-performance, highly reliable mixed-signal mixed-signal MCUs, featuring:

- 50MIPS 8051CPU
- 24MHz on-board oscillator (±0.5%) with clock multiplier
- 32-channel, 12-bit, 200kbps ADC
- Up to 3 comparators
- -40ºC to +125ºC Operating temperature range
- On-board Temperature Sensor

For quantities greater than listed, call for quote.

OTP-EPROM MICROCONTROLLERS

Silicon Laboratories OTP-EPROM family of MCUs is a high-performance solution for cost and space-sensitive applications. Pin compatible with Silicon Labs' Flash-based MCUs, these devices provide designers the flexibility to develop code in Flash and switch to low cost OTP versions for mass production.

For quantities greater than listed, call for quote.

MICROCONTROLLER DEVELOPMENT KITS

MOUSER STOCK NO.	Description	Price Each
634-C8051F005DK	For C8051F000, F001, F002, F005, F006, F010, F011, F012, F015, F016, F017, F018 & F019 MCUs	
634-C8051F020DK	For C8051F020, F021, F022, and F023 MCUs	
634-C8051F040DK	For C8051F040, F041, F042, and F043 MCUs	
634-C8051F060DK	For C8051F060, F061, F062, and F063 MCUs	
634-C8051F120DK	For C8051F120, F121, F122, F123, F124, F125, F126, F127, F130, F131, F132 & F133 MCUs	
634-C8051F206DK	For C8051F206 MCUs	
634-C8051F226DK	For C8051F220, F221, F226, F230, F231, & F236 MCUs	
634-C8051F300DK	For C8051F300, F301, F302, F303, F304, & F305 MCUs	
634-C8051F310DK	For C8051F310 and F311 MCUs	
634-C8051F320DK	For C8051F320 and F321 MCUs	
634-C8051F326DK	For C8051F326 and F327 MCUs	
634-C8051F330DK	For C8051F330 and F331 MCUs	
634-C8051F336DK	For C8051F336 Family	
634-C8051F340DK	For C8051F340, F341, F342, F343, F344, F345, F346 & F347 MCUs	
634-C8051F350DK	For C8051F350, F351, F352, and F353 MCUs	
634-C8051F360DK	For C8051F360, F361 and F362 MCUs	
634-C8051F370-A-DK	For C8051F37x MCUs	
634-C8051F380DK	For C8051F380, F381, F382, F384, F385, F386 and F387 MCUs	
634-C8051F390-A-DK	For C8051F39x MCUs	
634-C8051F410DK	For C8051F410, F411, F412 and F413 MCUs	
634-C8051F500DK	For C8051F50x MCUs	
634-C8051F530ADK	For C8051F52xA and C8051F53xA MCUs	
634-C8051T600DK	For C8051T600, T601, T602, T603, T604 & T605 MCUs	
634-C8051T606DK	Dev Kit for C8051T606 MCUs	
634-C8051T606TDB	MSOP Socket Daughter Card	
634-C8051T620DB32	QFN32 Socket Daughter Card for C8051T620	
634-C8051T620DK	For C8051T620/21/320/321/322 & 323 MCUs	
634-C8051T630DK	For C8051T630 Family	
634-C8051F912DK	For C8051F912DK, C8051F902, F902, F911 and F912 MCUs	
634-C8051F930DK	For C8051F920, F921, F930, F931 MCUs	
634-C8051F960-A-DK	Development Kit CD, Third Party Tools CD, kit for 8051	
634-SLBLDC-MTR-RD	Sensorless BLDC Motor Reference Design	
634-STEPPER-MTR-RD	Stepper Motor Reference Design	

UNIFIED DEVELOPMENT PLATFORM

Motherboard

MOUSER STOCK NO.	Description	Price Each
634-UP-BACKPLANE01EK	CP2105 UDP Motherboard to use with MCU, I/O Expander, Radio and EZLink card	

Accessory Boards

MOUSER STOCK NO.	Description	Price Each
634-UPMP-F960-EMIFEK	For C8051F960, UDP MCU Card (with no LCD) to use with UDP Motherboard	
634-UPMP-F960-MLCDEK	For C8051F960, MCU Card (with Multi LCD) to use with UDP Motherboard	
634-UPMP-F960-SLCDEK	For C8051F960, MCU Card (with Static LCD) to use with UDP Motherboard	
634-UPMU-F390-A-EK	For C8051F390, UDP MCU Card to use with UDP Motherboard	
634-UPMU-F370-A-EK	For C8051F370, UDP MCU Card to use with UDP Motherboard	
634-UPMU-M3U1XX-B-EK	SiM3U1xx (USB) Development Kit	
634-UPMU-M3C1XX-B-EK	SiM3C1xx (non-USB) Development Kit	
634-UPPIF960-A-EK	For C8051F960, Pico Card to use with UDP Motherboard	
634-UPPI1020GMA915EK	For Si1020-GM, 915MHz Pico Card to use with UDP Motherboard	
634-UPPI1024GMA868EK	For Si1024-GM, 868MHz Pico Card to use with UDP Motherboard	
634-UPPI1020GMA470EK	For Si1020-GM, 470MHz Pico Card to use with UDP Motherboard	
634-UPIO-GLCD-SPI-EK	For EZRadioPRO, SPI graphic LCD I/O board	

EVALUATION KITS

MOUSER STOCK NO.	Description	Price Each
634-C8051F064EK	Evaluation Board, USB Cable and Software	
634-CP2103EK	For CP2103 USB-to-UART Bridge Chip	
634-CP2102EK	For CP2102 USB-to-UART Bridge Chip	
634-CP2120EK	Evaluation Board for CP2120	

TARGET/PROTOTYPING BOARDS

MOUSER STOCK NO.	Description	Price Each
634-C8051F005TB	Target/Prototyping Board with C8051F005 MCU	
634-C8051F020TB	Target/Prototyping Board with C8051F020 MCU	
634-C8051F040TB	Target/Prototyping Board with C8051F040 MCU	
634-C8051F060-TB	Target/Prototyping Board with C8051F060 MCU	
634-C8051F120-TB	Target/Prototyping Board with C8051F120 MCU	
634-C8051F300TB	Target/Prototyping Board with C8051F300 MCU	

TARGET/PROTOTYPING BOARDS (CONT.)

MOUSER STOCK NO.	Description	Price Each
634-C8051F310TB	Target/Prototyping Board with C8051F310 MCU	
634-C8051F320TB	Target/Prototyping Board with C8051F320/21 MCU	
634-C8051F340-TB	Target/Prototyping Board with C8051F34x Family MCU	
634-C8051F350-TB	Target/Prototyping Board with C8051F350 MCU	
634-C8051F360-TB	Target/Prototyping Board with C8051F360 MCU	
634-C8051F380-TB	Target/Prototyping Board with C8051F380 MCU	
634-C8051F410-TB	Target/Prototyping Board with C8051F410 MCU	
634-C8051F500-TB	Prototyping Board for C8051F50x	
634-C8051F912-TB	C8051F912-TB Target Board	
634-C8051F930-TB	Prototyping Board with C8051F930	
634-C8051F996-TB	Target/Prototyping Board with C8051F996 MCU	
634-AB1	Prototyping Board with 128KB SRAM	

ACCESSORIES

MOUSER STOCK NO.	Description	Price Each
634-C8051T600SDB	SOIC Socket Daughter Board	
634-C8051T600QDB	QFN Socket Daughter Board	
634-CAT5EXOVER-001	CAT5e Cross-over Cable - 3' length	
634-DEBUGADPTR1-USB	USB Debug Adapter for C8051Fxxx MCU	
634-EC-SJ	Standard JTAG Cable	

USB TOOLSTICK DEVELOPMENT TOOLS

MOUSER STOCK NO.	Description	Price Each
634-TOOLSTICKSK	Starter Kit	
634-TOOLSTICKBA	Base Adapter	
634-TOOLSTICK300DC	C8051F300 Daughter Card	
634-TOOLSTICK300PP	Programming Platform for C8051F30X MCUs	
634-TOOLSTICK310PP	Programming Platform for C8051F310/12/14, F361, F364, F366, F368 MCUs	
634-TOOLSTICK311DC	C8051F311 Daughter Card	
634-TOOLSTICK316PP	Programming Platform for C8051F316/17, F338, F339 MCUs	
634-TOOLSTICK320PP	Programming Platform for C8051F320, F342, F343, F346, F347 MCUs	
634-TOOLSTICK321DC	C8051F320/321 Daughter Card	
634-TOOLSTICK321PP	Programming Platform for C8051F321, F327 MCUs	
634-TOOLSTICK327DC	C8051F327 Daughter Card	
634-TOOLSTICK330DC	C8051F330 Daughter Card	
634-TOOLSTICK330PP	Programming Platform for C8051F330/1/2/3/4/5/6/7 MCUs	
634-TOOLSTICK336DC	C8051F336 Toolstick Daughter Card	
634-TOOLSTICK340PP	Programming Platform for C8051F340/1/4/5 MCUs	
634-TOOLSTICK342DC	C8051F34x Daughter Card	
634-TOOLSTICK360DC	C8051F360 Daughter Card	
634-TOOLSTICK370-ADC	Toolstick Daughter Card for C8051F370x/9x	
634-TOOLSTICK381DC	Daughter Card for C8051F381/2/3/4/5/6/7 MCUs	
634-TOOLSTICK410PP	Programming Platform for C8051F410/2 MCUs	
634-TOOLSTICK411DC	C8051F411 Daughter Card	
634-TOOLSTICK411PP	Programming Platform for C8051F411/3 MCUs	
634-TOOLSTICK500MPP	Programming Platform for C8051F50x (48QFN)	
634-TOOLSTICK500QPP	Programming Platform for C8051F50x (48QFP)	
634-TOOLSTICK502DC	C8051F50x Daughter Card	
634-TOOLSTICK502MPP	Programming Platform for C8051F50x (32QFN)	
634-TOOLSTICK502QPP	Programming Platform for C8051F50x (32QFP)	
634-TOOLSTICK520PP	Programming Platform for C8051F520A (DFN10) MCUs	
634-TOOLSTICK530ADC	Daughter Card C8051F53xA and C8051F52xA MCUs	
634-TOOLSTICK530MPP	Programming Platform for C8051F530A (QFN20) MCUs	
634-TOOLSTICK530TPP	Programming Platform for C8051F530A (TSSOP20) MCUs	
634-TOOLSTICK716MPP	Programming Platform for C8051F716 (QFN-32)	
634-TOOLSTICK717MPP	Programming Platform for C8051F717 (QFN-24)	
634-TOOLSTICK800QPP	Programming Platform for C8051F8xx (QSOP-24) MCUs	
634-TOOLSTICK800SPP	Programming Platform for C8051F8xx (SOIC-16) MCUs	
634-TOOLSTICK800DC	C8051F800 Daughter Card	
634-TOOLSTICK912DC	ToolStick Daughter Card for C8051F901/02/11/12-GM	
634-TOOLSTICK912UPP	Programming Platform for C8051F901/02/11/12-GU	
634-TOOLSTICK990DC	C8051F990 Daughter Card	
634-TOOLSTICK990MPP	Programming Platform for C8051F990 (QFN-20)	
634-TOOLSTICK930MPP	Programming Platform for C8051F920, F930 MCUs	
634-TOOLSTICK930QPP	Programming Platform for C8051F920, F930 MCUs	
634-TOOLSTICK931PP	Programming Platform for C8051F921, F931 MCUs	
634-TOOLSTICK961MPP	Programming Platform for C8051F961 MCU	
634-TOOLSTICK960MPP	Programming Platform for C8051F960 MCU	
634-TOOLSTICKDA	Debug Adapter	
634-CAPTOUCHSENSEDC	Capacitive Touch Sense Daughter Card	
634-CAPTOUCHSENSESK	Capacitive Touch Sense Starter Kit (ToolstickBA + CapTouchSenseDC)	

LCD INTERFACE DEVELOPMENT TOOLS

MOUSER STOCK NO.	Description	Price Each
634-CP2400AB	CP2400 LCD Development Board	
634-CP2401AB	CP2401 LCD Development Board	
634-CP2400DK	Development Kit for CP2400 and CP2402 LCD Drivers with SPI Interface	
634-CP2401DK	Development Kit for CP2401 CP2403 LCD Drivers with I2C Interface	
634-RF-TO-USB2-RD	RF to USB Reference Design Kit	
634-EC-SJ	Standard JTAG Cable

NEW! TECHNOLOGY

STMICROELECTRONICS STM32 ARM CORTEX™

STM32 (Cortex™-M0)

The STM32F051xx family incorporates the high-performance ARM Cortex™-M0 32-bit RISC core operating at a 48MHz frequency, high-speed embedded memories (Flash memory up to 64Kbytes and SRAM up to 8Kbytes), and an extensive range of enhanced peripherals and I/Os. All devices offer standard communication interfaces (up to two I2Cs, two SPIs, one I2S, one HDMI CEC, and up to two USARTs), one 12-bit ADC, one 12-bit DAC, up to five general-purpose 16-bit timers, a 32-bit timer and an advanced-control PWM timer.

For quantities greater than listed, call for quote.

STM32 (Cortex™-M3)

The STM32 family of 32-bit Flash Microcontrollers is based on the breakthrough ARM Cortex™-M3 core - a core specifically developed for embedded applications. The STM32 family benefits from the Cortex-M3 architectural enhancements including the Thumb-2 instruction set to deliver improved performance with better code density, significantly faster response to interrupts, all combined with industry leading power consumption. ST is now the first leading MCU supplier to introduce a product family based on this core. The STM32 family is built to offer new degrees of freedom to MCU users. It offers a complete 32-bit product range that combines high performance, low power and low voltage, while maintaining full integration and ease of development.

STM32 (Cortex™-M4)

The ARM® Cortex™-M4-based STM32 F4 series is an extension of the industry-leading STM32 portfolio towards even higher performance. Like the STM32 F2 series, these MCUs leverage ST's 90 nm NVM technology and ST's ART Accelerator™ to reach the industry's highest benchmark scores for Cortex-M-based microcontrollers with 210DMIPS at 168MHz operating frequency. The DSP instructions and the floating point unit enlarge the range of addressable applications. The STM32 F4 series is the result of a perfect symbiosis of the real-time control capabilities of an MCU and the signal processing performance of a DSP, and thus complements the STM32 portfolio with a new class of devices, digital signal controllers (DSC).

MOUSER STOCK NO. / Mfr. Part No.	Description	Price Each
M0		
511—STM32F0DISCOVERY	STM32 F0 Entry-level Cortex M0 DIP module evaluation board with USB debug interface.	
511—STM320518-EVAL	Evaluation board for STM32 F0 series fitted with an STM32F051 48MHz Entry-level Cortex M0 CPU and QVGA LCD display.	
M3		
511—STM32L152-EVAL	Complete hardware emulation platforms with the STM32L152, implementing the full range of device peripherals and features	
511—STM32L-DISCOVERY	Includes a 6-digit LCD display, one touch-sensing slider, 2 LEDs, 1 user button, current measurement and the embedded debugger (ST-LINK/V2).	
511—STM32VLDISCOVERY	Includes an STM32F100 and an in-circuit ST-Link debugger/programmer to debug Discovery applications and other target board applications.	
511—STM32100B-EVAL	STM32F100V EVB with HDMI CEC, 2xI2C, 2 SPI channels, 3 USART channels, 8KB SRAM, 128KB internal Flash, JTAG and SWD debugging.	
511—STM32100B-MCKIT	Starter kit (w/STM32F100B) provides a complete development platform for motor control applications	
511—STM3210E-EVAL	512K version of complete hardware evaluation platform with the STM32F103, implementing the full range of device peripherals and features.	
511—STM3210C-EVAL	Complete Connectivity Platform with USB-OTG, MAC, 2 CAN2.0, 2I2C, 5 USART, Smartcard, SPI, JTAG, SWD and Debugging Support	
511—STM32-COMSTICK	Complete low-cost Hitex evaluation supporting 10/100 ethernet, USB 2.0, Full-speed device/host/OTG with on-chip PHY and CAN	
511—STEVAL-IPC003V1	Demonstration board is a thermal printer adapter board for the STM3210C_EVAL and offers a solution for parking ticket vending machines.	
511—STM32L152-SK/IAR	IAR KickStart Kit for STM32L EnergyLite ARM, IAR visualSTATE 20-state eval with embedded IAR J-link Lite debugging probe	
511—STM3221G-EVAL	The STM3221G-EVAL evaluation board is a complete demonstration and development platform for the STM32F2 series and includes an embedded STM32F217IGH6 high-performance ARM Cortex -M3 32-bit microcontroller	
511—STM32MICOS-EVAL	The STM32-MICRIUM package consists of a evaluation board and a book. Step-by-step look at the inner workings of Micrium's latest real-time kernel, µC/OS-III.	
M4		
511—STM32F3DISCOVERY	Includes devices with 64 to 256K-bytes of on-chip flash memory and up to 48K-bytes of SRAM	
511—STM32F4DISCOVERY	Based on the STM32F407VGT6, it includes an ST-LINK/V2 embedded debug tool, two ST MEMS, digital accelerometer and digital microphone, one audio DAC with integrated class D speaker driver, LEDs and push buttons and an USB OTG micro-AB connector	
511—STM32373C-EVAL	Eval Board for STM32373C, 72MHz analog integration to complement STM32 F1 and F4 Series	
511—STM3240G-EVAL	Evaluation board for the STM32 F4 series and includes an STM32F407IGH6 high-performance ARM® Cortex™-M4F 32-bit microcontroller.	
511—STM3241G-EVAL	Evaluation board for the STM32 F4 series and includes an STM32F417IGH6 high-performance ARM® Cortex™-M4F 32-bit microcontroller with a cryptographic acceleration cell.	
511—STM3240GSKKEI	Keil starter kit is a complete solution for starting application development and evaluating STM32F4 Series ARM Cortex-M4	
511—STM32F4DISCOVERY	Based on the STM32F407VGT6, it includes an ST-LINK/V2 embedded debug tool, two ST MEMS, digital accelerometer and digital microphone, one audio DAC with integrated class D speaker driver, LEDs and push buttons and an USB OTG micro-AB connector	
511—STM3240G-EVAL	Evaluation board for the STM32 F4 series and includes an STM32F407IGH6 high-performance ARM® Cortex™-M4F 32-bit microcontroller.	
511—STM3241G-EVAL	Evaluation board for the STM32 F4 series and includes an STM32F417IGH6 high-performance ARM® Cortex™-M4F 32-bit microcontroller with a cryptographic acceleration cell.	

THIRD-PARTY SOFTWARE AND TOOLS

Users can choose from a full range of development solutions that deliver start to finish control of application development from a single environment. Solutions come with in-circuit emulators, and offer project management, source editing, application building and debugging from a single, easy-to-use graphical interface. They are available for all popular C/C++ compilers compatible with ARM cores.

PRODUCT NEW

For quantities greater than listed, call for quote.

MOUSER STOCK NO. / Mfr. Part No.	Description	Price Each
511—STM3210CPRIMER	EVOPrimer Raisonance Toolset for the STM32 Performance Line preloaded with 256Kb RAM, Flash, Ride 7, a C/C++ compiler, Circle OS task scheduler and C source code for all sample applications and libraries.	
511—STMPRIMER-BASE	EVOPrimer Raisonance base accessory for use with Target and extension Boards for the STM32 Line with removable transparent cover, USB cable with debugging/programming interface and most hardware features for MCU evaluation. This board can also be extended by add-on connectors.	
511—STMPRIMER-PROTO	STMPrimer accessory for prototype target STM32 extension boards.	
511—STM3210CPRIM-D	STMPRIMER accessory including 264KB flash for the STM32 MCU target boards for use with the EvoPrimer base.	
511—STM32L15PRIM-D	STMPRIMER accessory including 256KB flash for the STM32 and STM8 MCU target boards for use with the EvoPrimer base.	
511—STM3240GPRIM-D	STMPRIMER accessory including 256KB flash for the STM32 and STM8 MCU target boards for use with the EvoPrimer base.	
511—STMPRIMER-EXT	STMPRIMER accessory including 256KB flash for the STM32 and STM8 MCU target boards for use with the EvoPrimer base.	
511—STM3210C-SK/KEIL	Starter kit with uVision3, ARM RealView C/C++ compiler for code up to 16K-bytes, ULINK-ME (USB/JTAG) in-circuit debugger/programmer and evaluation board with STM32F107C (256Kbyte Flash, Ethernet, USB Host and OTG).	
511—STM3210E-SK/KEIL	Kit includes RealView Microcontroller Development, Kit for ARM (16K code-size limited version) with ARM C/C++ compiler, ULINK (USB/JTAG) in-circuit emulator and evaluation board for STM32 with external 1M RAM, 8M flash, and joystick for primer 2 applications.	
511—STM3210E-SK/IAR	Kit includes IAR Embedded Workbench for ARM (EWARM - 32K code-size limited version), J-Link (USB/JTAG) in-circuit emulator and evaluation board for STM32, E-version 512Kb flash memory for Primer 2 applications.	
511—STM3220G-SK/IAR	Complete, cost-effective solution for starting application development and evaluating the STMicroelectronics STM32 F2-series ARM core-based microcontrollers.	
511—STM3220G-JAVA	Kit is composed of the STM3220G-EVAL evaluation board and a DVD ROM which contains an evaluation version of the MicroEJ® Software Development Kit	

ST FLASH STICK (ST IN-CIRCUIT COMMUNICATION KIT); 8-BIT

MOUSER STOCK NO. / Mfr. Part No.	Description	Price Each
511—STX-RLINK	In-Circuit debugger/programmer supporting JTAG and ICC protocols for STM8, ST7, uPSD, STM32, STR7 and STR9	

STM32 GRAPHIC PANEL BOARD

The STM32-based STEVAL-CCM001V2 graphic panel demonstration board display images one by one in a slideshow fashion. The heart of this board is the STM32 microcontroller, which is capable of reading a memory card containing photographs, and display them on a TFT screen. The memory used to store the images is a microSD card. A 3-axis MEMS accelerometer is used for the picture orientation. The application can be used either as a standalone solution, or combined with other applications such as POS, card readers, security panels, USB speakers or high-end remote controls.

MOUSER STOCK NO. / Mfr. Part No.	Description	Price Each
511—STEVAL-CCM001V2	STM32-based graphic panel demonstration board display based on STM32 MCU containing photographs for a TFT screen with microSD and 3-axis MEMS	

STM32 Development Board

PRODUCT NEW

MOUSER STOCK NO.	Description	Price Each
511-STM3220G-EVAL	Full range of hardware features on the board USB OTG HS, USB OTG FS, ethernet, motor control, CAN, MicroSD card, smartcard, USART, Audio DAC, RS-232, IrDA, SRAM, MEMS, EEPROM to develop applications.

STM8L ULTRA-LOW-POWER 8-BIT

STMicroelectronics has introduced its first ultra-low-power family based on the 8-bit STM8 core. Paving the way for a future complete ultra-low-power platform, the STM8L family combines high performance and ultra-low power consumption thanks to a new proprietary ultra-low-leakage process and optimized architecture. This family is declined in three different lines making the STM8L an optimal family to support many applications with special care on power savings.

STM8L DEVELOPMENT BOARDS

MOUSER STOCK NO.	Description	Price Each
511—STM8L-DISCOVERY	For the STM8L152C6T6 which includes ST-Link embedded debug tool interface, LCD (24 segments, 4 commons), LEDs and push buttons.	
511—STM8L1526-EVAL	For STM8L152C6 which supports I2C, SPI, USART, 12-bit ADC, 12-bit DAC, LCD driver, 2KB internal SRAM, 32 KB EEPROM and SWIM debugging.	
511—STM8L15LPBOARD	Low-power demo board demonstrates all the STM8L15x low-power modes, and permits the user to take consumption measurements in all modes.	
511—STM8L1526PRIMER	EvoPrimer STM8L Ultralow power line complete evaluation tool including base and target board with 32KB Flash, program/debug USB port, 3 character display, 8 segments, temperature sensor, MEMS accelerometer, rechargeable battery, solar cells, and push buttons.	
511—STM8L1526PRIM-D	STMPRIMER accessory including 32KB flash for the STM8L MCU target boards for use with the EvoPrimer base.	

STM8S GENERAL PURPOSE 8-BIT

The STM8S family of general-purpose 8-bit Flash microcontrollers offers ideal solutions for industrial and appliance market requirements. An advanced core version combined with a 3-stage pipeline ranks the STM8S in the top position for performance to cost ratio . The embedded EEPROM and the calibrated RC oscillator allow a significant cost effectiveness. An easy-to-use and intuitive development environment contributes improving time to market.

For quantities greater than listed, call for quote.

POWER ARCHITECTURE® AUTOMOTIVE, 32-BIT

PRODUCT NEW

This 32-bit system-on-chip (SoC) automotive microcontroller family is the latest achievement in integrated automotive application controllers. It belongs to an expanding range of automotive-focused products designed to address chassis applications—specifically, electrical hydraulic power steering (EHPS) and electric power steering (EPS)—as well as airbag applications.

For quantities greater than listed, call for quote.

OLIMEX Development Boards

RoHS Compliant **This product is RoHS compliant.**

Olimex Ltd. designs, prototypes, and manufactures printed circuit boards, sub-assemblies, and complete electronic products. Olimex provides product/PCB design assembly, harnessing, and panel work ranging from small analog devices to large, complex microprocessor products. Olimex is recognized as a third party hardware developer for Texas Instruments, Atmel, STMicroelectronics, IAR Systems, Cirrus Logic, and more.

909-RFID125-ISO	RFID Transponder Tag, 125KHz ISO	
909-RFID125-WAT	RFID Watch Tag, 125KHz	
909-RFID125-STI	RFID Sticker Tag, 125KHz	
909-RFID1356-ISO	RFID Transponder Tag, 13.56MHz ISO	
909-RFID1356-STI	RFID Sticker Tag, 13.56MHz	
909-MOD-ENC624J600	Ethernet Controller Header Board w/UEXT Conn 100Mbit	
909-MOD-ENC28J60	Ethernet Controller Header Board w/UEXT Conn 10Mbit	
909-MOD-IO	Expandable Board Input/Output w/UEXT	
909-MOD-USB-RS232	USB to RS232 Interface Module	
909-MOD-POE	PoE Injector for PIC-MICRO-WEB	
909-MOD-MMA7260	3-AXIS Accelerometer Board with AT91SAM7S64	
909-MOD-SMB380	3-AXIS Accelerometer Board with UEXT Conn	
909-MOD-SM380	UEXT Accelerometer Module	
909-MOD-VGA-32MB	Gameduino 32MB VGA Shield	
909-MOD-LCD4.3	Olimex 4.3" LCD Panel extension, UEXT	
909-MOD-NOKIA6610	TFT LCD 128x128 Pixel 12bit Color	
909-MOD-LCD3310	LCD 84x48 B/W Nokia 3310 UEXT Connector	
909-MOD-LCD1X9	LCD 1x9 Alphanumeric UEXT/I2C	
909-MOD-SDMMC	SD/MMC Card Module UEXT/BAT Connector	
909-MOD-RS485	RS232 to RS485 Converter Module w/ UEXT Conn	
909-MOD-EKG	MSP430 Heart-Rate and EKG Kit w/ LCD & RS232 EKG Output	
909-MOD-PULSE	MSP430 Heart-Rate and Blood Oxygenation Dev. Board	
909-MOD-RTC	Real Time Clock Interface Board w/ PCF8536 & UEXT	
909-SHIELD-LOL-SMT	Red SMT3528 LED Shield for Olimexino-328	
909-MOD-POE-V2	PoE Adapter Module	
909-MOD-ZIGBEE-UEXT	Zigbee Uext Module	
909-MOD-ZIGBEE-PIR	Zigbee PIR Module	
909-MOD-USB-RS232	USB to RS232 Interface Module	
909-MOD-IRDA	IRD Uext Module	
909-MOD-TC	Thermocoupler Uext Module	
909-MOD-MAG	Magnetometer Uext Module	
909-MSP430-RFLINK	Wireless Module with MSP430F1232	
909-AVR-GSM	Development Board for ATMEGA32 32KB Flash 2KB RAM	
909-PIC-GSM	Development Board w/GSM Module PIC18F97J60-I/PT	
909-RFID125-ISO-5	RFID Tag 125KHZ ISO 86x54x0.8mm	
909-RFID125-KEY-5	RFID Tag 125KHZ Keyfob 36.5x30x7.5mm	
909-RFID125-STI-5	RFID Tag 125KHZ Sticker 20x1mm	
909-ENC28J60-H	Ethernet Controller Header Board 30x24mm	
909-CS8900A-H	Ethernet Controller Header Board 53x29mm	
909-USB-ISO	FL SPD USB Isolator 1000V 41x36.5mm	
909-MSP430-LEDBOOST	8x8 LED Matrix for TI MSP430 Launchpad	
909-MOD-LED8x8	MSP430 Launchpad 8x8 LED Add-on	
909-MSP430-PIR	PIR Sensor for MSP430F2013 Low Power	
909-MSP430-GBD	Glass Break Detector	
909-MSP430-SOLAR	Solar Panel Battery Charger w/MSP430 JTAG	
909-BATTERY-LITHPO	Lithium Polymer Battery w/JST Conn. for Olimex Arduino Compatible Boards	
909-USB-ULIPO	Lithium Polymer Battery

META WATCH™ DEVELOPMENT SYSTEM

Meta Watch™ is a wearable development system that enables rapid development of 'connected-watch' applications. With Meta Watch™, developers can quickly and easily extend the interfaces of devices and applications to the wrist. The Meta Watch™ platforms utilize embedded Bluetooth® technology to connect to smartphones, mobile devices and other Bluetooth enabled devices.

Watch Features:
- A great looking watch
- An easy-to-use Bluetooth enabled wearable development system
- Fully-tooled; production-ready modules with FCC, CE certification
- Stainless steel case
- Leather strap
- Water-resistant (3 ATM)
- Mineral crystal lens
- Vibrating motor
- Three-axis accelerometer
- Ambient light sensor

Embedded SDK Features:
- Add your own thread to the watch for special functions
- Use the Meta Watch™ low-power application framework
- No need to open the watch for in-circuit debugging
- Uses TI SPI-BY-Wire
- Leverage the Bluetooth radio and remote protocol for communication
- Sample code which is an Open Source Android SDK project demonstrating watch connectivity to an Android phone. The project demonstrates watch idle screen use as well as notifications for: CallerID, SMS messages, alarms, calendar events, music control, email and IM

Kit Includes:
- Programming/charging clip & USB cable
- Ability to easily program through external clip & cable; no need to open watch
- Supports open source projects that support both CCS (Code Composer Studio) and IAR tool chains
- One digital display watch
- Preprogrammed to connect to an Android device out of the box

Benefits:
- MetaWatch™ is a fully-tooled production unit which lowers the barrier to market entry
- As a development platform it allows users to create custom wearable applications
- Bluetooth technology allows connection to over 3 billion + Bluetooth devices in the market
- Freely available source example code allows for easy development
- Meta Watch™ community with forums, documentation nd links to sample code

MSP430X4XX FLASH/ROM LCD MICROCONTROLLERS

MSP430x4xx – This family of LCD flash/ROM based devices offers 1.8V-3.6V operation, up to 120kB/Flash/ROM 8MIPS with FLL + SVS along with an integrated LCD controller. Ideal for low power metering and medical applications.

For quantities greater than listed, call for quote.

MSP430X5XX/6XX FLASH NO LCD MICROCONTROLLERS

MSP430x5xx/6xx – Introducing the new Flash-based family featuring the lowest power consumption up to 25MIPS with 1.8V to 3.6V operation starting at 12MIPS. New features include an innovative Power Management Module for optimizing power consumption, an internally controlled voltage regulator, and 2x more memory than previous devices.

For quantities greater than listed, call for quote.

CC430 RF SoC SERIES DEVELOPMENT TOOLS AND ACCESSORIES

NEW PRODUCT

For quantities greater than listed, call for quote.

MOUSER STOCK NO.	TI Part No.	Description	Price Each
595-EM430F5137RF900	EM430F5137RF900	Wireless development tool for the CC430 that includes all the hardware required to develop an entire wireless project. Includes two sub-1GHz wireless target boards (including antennas) featuring the CC430F5137IRGZ RF System-on-chip.	
595-EM430F6137RF900	EM430F6137RF900	Wireless development tool for the CC430 that includes all the hardware required to develop an entire wireless project. Includes two sub-1GHz wireless target boards (including antennas) featuring the CC430F6137IRGC RF System-on-chip.	
595-CC-6LOWPAN-DK868	CC-6LOWPAN-DK-868	The CC-6LOWPAN-DK-868 is a complete development kit for a sub-1 GHz 6LoWPAN system. The kit offers a flexible development platform for Sensinode's NanoStack running on the CC430 and CC1180 devices.

SITARA™ ARM CORTEX-A8 AND ARM9 MICROCONTROLLERS

The Sitara™ ARM® MPU Product Platform – High performance, ARM-based microprocessors include more than 70ARM Cortex™-A8 and ARM9® options. With speeds ranging from 375MHz to 1.5GHz which enables you to find the processor you need for your end application and a roadmap to meet additional performance and power requirements. In addition, Sitara ARM microprocessors offer a software-compatible roadmap if you are using existing Sitara solutions.

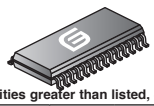
STELLARIS™ FAMILY OF ARM® CORTEX-M3™ MICROCONTROLLERS

The Stellaris family of microcontrollers incorporates the ARM Cortex-M3 MCU core running up to 50MHz, embedded Flash and SRAM, a low-dropout voltage regulator, integrated brown-out reset and power-on reset functions, analog comparators, 10-bit ADC, SSI, GPIOs, watchdog and general purpose timers, UARTs, IC, motion control PWMs, and quadrature encoder inputs.



For quantities greater than listed, call for quote.

STELLARIS™ EVALUATION KITS, REFERENCE DESIGN KITS, AND MODULES

Features:

- Fully functional evaluation versions of microcontroller toolsets from ARM/Keil, CodeSourcery (GNU), Code Red Technologies and IAR
- Everything needed to develop and prototype embedded applications right out of the box, including all cables, jumpers, and power over USB
- All boards can be used as booster packs for the MSP430 and Stellaris Launch pads

For quantities greater than listed, call for quote.

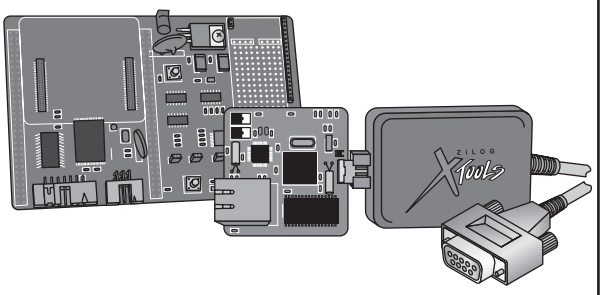
ZILOG eZ80Acclaim! Flash Microcontrollers

Products may be RoHS compliant. Check mouser.com for RoHS status.

zilog
Embedded in Life
An IXYS Company



ZILOG EZ80F91 FLASH MICROCONTROLLER

Features:

- eZ80 core operating at 50MHz
- On-chip 10/100BaseT Ethernet MAC
- 256KB on-chip Flash memory
- 16KB on-chip SRAM
- Power management features supporting Sleep, Halt, and peripheral power-down controls
- Glueless external bus supporting eZ80, Z80, Intel, and Motorola modes
- 32GPIO
- IrDA compatible Infrared Encoder/Decoder
- Two independent UARTs with multidrop mode
- SPI and I2C ports
- Four, 16-bit counter/timers with I/O capability
- Watch Dog Timer with selectable clock inputs
- Real-time clock with on-chip 32KHz oscillator
- Full-feature PLL
- JTAG and ZiLOG Debug Interfaces
- Interrupt controller supporting internal and external maskable interrupts as well as non-maskable interrupts input
- New DMA-like eZ80 instructions

Description:

The eZ80F91 is the flagship device of the eZ80Acclaim! family of Flash Microcontrollers (MCUs). With 50MHz speed and an on-chip Ethernet MAC, designers now have the necessary performance to execute complex applications quickly and efficiently. Combining 256KB of Flash with 16KB SRAM, the eZ80F91 provides the memory needed to implement communication protocol stacks and achieve the flexibility when performing in-system updates of application firmware. Complementing the high performance, the eZ80F91 offers a rich set of serial communication peripherals to address application designs ranging from consumer electronics and point-of-sale terminals to security systems and industrial control.

ZILOG EZ80F92 FLASH MICROCONTROLLER

Features:

- eZ80 core operating at 20MHz
- Up to 128KB on-chip Flash memory
- Up to 8KB on-chip SRAM
- Power management features supporting Sleep, Halt, and peripheral power-down controls
- Glueless external bus supporting eZ80, Z80, Intel, and Motorola modes
- Up to 24GPIO
- IrDA compatible Infrared Encoder/Decoder
- Two independent UARTs with multidrop mode
- SPI and I2C ports
- Six, 16-bit counter/timers with I/O capability
- Watch Dog Timer with selectable clock inputs
- Real-time clock with on-chip 32KHz oscillator
- JTAG and ZiLOG Debug Interfaces
- Interrupt controller supporting internal and external maskable interrupts as well as non-maskable interrupts input
- New DMA-like eZ80 instructions

Description:

The eZ80F92 is another of the devices which make up the eZ80Acclaim!™ family of Flash Microcontrollers (MCUs). Combining 20MHZ speed, 128KB of Flash, and 8KB SRAM, the eZ80F92 provides the performance and memory needed to implement communication protocol stacks and achieve the flexibility when performing in-system updates of application firmware. Complementing the high performance, the eZ80F92 offers a rich set of serial communication peripherals to address application designs ranging from consumer electronics and point-of-sale terminals to security systems and industrial control. The zZ80L92 is the ROMless equivalent to the eZ80F92/93.

ZILOG EZ80F93 FLASH MICROCONTROLLER

Attention:

- Above features and development kit for eZ80F92Acclaim!™ are applicable to eZ80F93Acclaim!™

Description:

The eZ80F93 is a new part comprising part of the eZ80Acclaim!™ family of Flash Microcontrollers (MCUs). Combining 20MHz speed, 64KB of Flash, and 4KB SRAM, the eZ80F93 provides the performance and memory needed to implement communication protocol stacks and achieve the flexibility when performing in-system updates of application firmware. Complementing the high performance, the eZ80F93 offers a rich set of serial communication peripherals to address application designs ranging from consumer electronics and point-of-sale terminals to security systems and industrial control.

Z16FMC SERIES FLASH MICROCONTROLLER

Zilog's Z16FMC Series MCU, a part of the Flash Motor Control family of devices, is a powerful 16-bit CISC microcontroller that outperforms most RISC microcontrollers in its class. The Z16FMC boasts a unique architecture that provides the power, punch and performance of a 32-bit micro with the code, current efficiency and cost of a 16-bit. The Z16FMC features Zilog's ZNEO® CPU, which boasts a highly-optimized instruction set that achieves higher performance per clock cycle with less code space and lower overhead than competing architectures. Optimized for motor control applications, these devices are designed for the control of multiphase AC and DC variable-speed motors.

Features:

- 16-bit optimized Single-Cycle CISC core
- Up to 128KB of in-circuit programmable Flash memory
- Flexible communication interface including a 9-bit UART with LIN & IrDA, I2C, ESPI
- 12-Channel, 10-bit ADC with a 2.1µs conversion time
- Highly integrated Digital/Analog peripherals
  - Operational Amplifier
  - Analog Comparator
  - Internal Precision Oscillator
  - 4-Channel DMA Controller
  - 12-bit PWM module with three complementary pairs or six independent PWM outputs

RoHS Compliant

For quantities greater than listed, call for quote.

Z16FMC SERIES MOTOR CONTROL DEVELOPMENT KIT

The Z16FMC Series Motor Control Development Kit features a Motor Control Modular Development System (MC MDS) daughter board mounted on a 3-Phase Motor Control Application Board. The MC MDS board consists of a 64LQFP Z16FMC chip and a DBG connector to connect the kit to a host development PC via the USB Smart Cable. The 3-Phase Motor Control Application Board provides spade lug connectors for the 3-phase motor and fused spade lug connectors for an adjustable 24V DC, 3A workbench power source.

RoHS Compliant

ZILOG Z8 ENCORE!™ XP MICROCONTROLLERS

Specifications:

- Each Z8 Encore! Microcontroller contains the following: Watchdog Timers, Analog Comparator, Temp. Sensor, Current Sense Amplifier, and Internal Precision Oscillator
- Core Speed: 20MHz
- Voltage: 2.7V to 3.6V
- UARTs: 1
- 2 16-bit Timers with PWMs
- Surface Mount

RoHS Compliant

For quantities greater than listed, call for quote.

ZILOG Z8 ENCORE!™ FLASH MCU DEVELOPMENT KIT

The Z8 Encore! Microcontroller (MCU) Development Kit is a general-purpose platform that allows design engineers to evaluate the capabilities and operation of the Z8 Encore! family of microcontrollers and provides tools to shorten the development cycle. Included with the Development Kit is a free full-version ANSI C-Compiler and a Target Interface Module board that interfaces with the on-chip debugger converting a one-wire interface to a two-wire RS-232-like interface. All necessary hardware, software tools, and technical documentation are included, to provide a complete solution at minimal cost.

Features:

Hardware:
- Evaluation Board, Z8 Encore!
- Smart Cable – DB9 to six-pin male (Z8F08200100KIT)
- RS-232 DB9 Serial Cable
- 9VDC Universal Power Supply

Software:
- ZDS II - Z8 Encore! IDE with ANSI C-Compiler
- Sample code
- Device Driver software

CD-ROM contains:
- ZDS II Quick Start Guide
- Development Kit User Manual
- ZDS II - IDE User Manual
- EZ8 CPU User Manual
- Product Specifications
- Product Briefs
- Application Notes
- Flyer
- Product Linecard

943-5.15.01	5.15.01	E	Renesas RX600 (RX610, RX621, RX62N, RX62T)	Programming Tool For Renesas RX600 Series Microcontrollers With On-chip Or External Flash Memory And Renesas RX Core	

EMULATORS/SIMULATORS FOR ARM DEVICES

Features include high download speed into RAM and flash memory, the ability to set an unlimited number of breakpoints into flash memory of MCUs. Supports ARM 7/9/11, Cortex, and Coldfire and various IDEs. SDK available.

Features:

- High visibility of tool chain parameters
- Hardware independent breakpoints
- Debugger independent flash download

APACER Memory Modules

Apacer
Access the best

RoHS Compliant This product is RoHS compliant.

RoHS Compliant

SD2.0 COMMERCIAL SDHC CARDS

Apacer Commercial SDHC Class 4/6/10 Memory Cards are designed specifically for SD 2.0 card applications that put a premium on small form factor with lower power, such as consumer digital cameras, high-resolution cameras, camcorders, and multimedia products. All device and interface configuration data are (such as maximum frequency, card identification, etc.) stored on the card.

Features:
- Variable clock rate 0 - 50MHz
- Correction of memory field errors
- Card Removal during read operation will never harm the content
- Built-in write protection features (permanent and temporary)

For quantities greater than listed, call for quote.

INDUSTRIAL COMPACTFLASH

Apacer Industrial CompactFlash provides solid traceability to ensure all product HW/FW are the same as you qualified.

Features:
- Longevity Support with Fix B.O.M.
- Compliant with CFA 3.0 specifications for CFCIII
- Compliant with CFA 4.1 specifications for CFC4
- Advanced wear-leveling and Block Management
- Secured Protection Zone/Quick Erase for ATA CF
- Interface: PC Card Memory Mode; PC Card I/O Mode; True IDE Mode
- ECC Support: Up to 8/15 bit correction per 512byte page size (BCH)
- Shock: 50G
- Vibration: 15G
- Humidity: 5% ~ 95%
- MTBF (hours): 2,000,000
- Active Mode (Typ.): 80mA/95mA
- Idle Mode: (Typ.): 700μA/900μA

Specifications:
- Ruggedize Power Failure Recovery
- Connector: 50-pin
- Built-in HW ECC and SMART Functions
- Shock resistance, Anti-vibration and Low power consumption

RoHS Compliant

Standard Temperature: 0°C to 70°C

For quantities greater than listed, call for quote.

microSDHC™ CLASS 4 MEMORY CARDS

The Apacer microSDHC™ memory card– the world's smallest removable storage – features a thumbnail-sized footprint and sufficient storage for all 3G phones' digital content including high-resolution photos, large audio and video files, MMS, e-mail messages, and Java-based games.

Features:
- Supports ECC function to detect and correct errors
- Supports Wear Leveling function to extend product life cycles
- Complies with highest security of SDMI standard
- Speed Class: Class 4 (minimum write speed of 4MB/sec)
- Available with Norton Internet Security

RoHS Compliant

SDHC CLASS 10 MEMORY CARDS

Designed to meet the trend in consumer cameras, Apacer SDHC Class 10 memory card's write speed is over 10MB per second, and available in 8GB-32GB.

Features:
- Supports ECC function to detect and correct errors
- Supports Wear Leveling function to extend product life cycles
- Mechanical write protection switch
- Speed class: Class10 (minimum write speed of 10MB/sec)
- Available with Norton Internet Security

RoHS Compliant

CYPRESS Memory

RoHS Compliant **This product is RoHS compliant.**

Cypress is an industry leader in synchronous, fast asynchronous, low power asynchronous and non-volatile SRAMs, as well as in multi-port solutions and FIFO products. The company remains an optimal solution for a memory market characterized by a shrinking supplier base and dwindling product portfolios. As companies continue to abandon the market, Cypress remains an innovative, reliable, committed supplier for your memory needs. Our long-term commitment to the broadest product line, product development, industry longevity, and most advanced technology sets Cypress apart as a memory supplier of choice. Whatever your application—from handhelds to network gear—Cypress's memory lineup is a testament to versatility: micropower, fast-asynchronous, synchronous, and nonvolatile SRAMs, as well as multi-port, FIFO, and serial EEPROM memories. In a market landscape dotted by "EOL", Cypress gives you the support and confidence you need for the long run.

Cypress provides the broadest portfolio of fast asynchronous SRAMs from 4Kb to 32Mb available in industry standard voltage, bus width, and package options. These devices offer the fastest access times available, making them optimal for network equipment. The company's fast asynchronous SRAMs are supported by best-in-class process technology, manufacturing and customer support. The fast asynchronous SRAMs are offered in RoHS-compliant, industry-standard packaging options such as: FBGA, VFBGA, SOJ, TSOP, TSOP II, and PDIP, in industrial temperature range.

Advantages:
- Access time: 10ns in industrial temperature range
- Low Power Dissipation
- Industry standard packaging options and RoHS compliant
- Cutting edge of process technology: 90nm
- Industrial and automotive temperature ranges

Applications:
- Switches and routers
- IP-phones
- Test equipment
- DSLAM cards
- Automotive electronics

CYPRESS Memory

RoHS Compliant **This product is RoHS compliant.**

MULTI-PORT MEMORIES

Cypress's multi-port memory solutions offer the highest-performing interconnects in the industry. Our multi-port memory portfolio includes more than 250 synchronous and asynchronous products in densities from 8Kb to 36Mb. The FullFlex™ family of high density synchronous dual-port SRAMs developed in 90nm technology is offered in 4Mb, 9Mb, 18Mb, and 36Mb densities in x18, x36, and x72 configurations. Cypress multi-ports are offered in industry-standard packaging such as: TQFP, FBGA , PLCC and molded DIP.

For quantities greater than listed, call for quote.

NON-VOLATILE SRAM

Cypress's nonvolatile SRAM integrates the company's proprietary Quantum Trap™ nonvolatile elements into high-performance SRAM memory cells. The memory array is accessed the same way as conventional SRAM, supporting standard system designs while adding the ability to retain data when power is lost. On power-up "recall," the nonvolatile elements set the state of the SRAM, then the nvSRAM can be read or written without altering the nonvolatile elements. Recall may also be initiated upon command. Parallel transfer of all data from the nonvolatile elements to SRAM requires a maximum of only 20 milliseconds to complete.

For quantities greater than listed, call for quote.

SYNCHRONOUS SRAMS

Cypress is committed to offering a complete range of high-density synchronous SRAM families, including QDR/DDR , II and II , No Bus Latency™ and standard pipelined and flow-through products. From 1Mb to 72Mb, Cypress delivers the industry's broadest synchronous SRAM portfolio. This commitment to SRAM technology is demonstrated by the company's investment and product development in 65nm technology for 144Mb products. As a top-tier synchronous SRAM manufacturer, Cypress complements its products with best-in-class manufacturing and customer support. No other supplier can match Cypress in density, speed-grade options, temperature ranges, and TQFP and BGA leaded and lead-free packaging.

CYPRESS Memory

RoHS Compliant **This product is RoHS compliant.**

ULTRA LOW POWER SRAMS

Cypress is committed to maintaining support for both fast asynchronous and low-power SRAMs, even with major players exiting the market. Offering the most advanced process technology in the SRAM world, Cypress's MoBL™ SRAMs dominate the low-power segment with the industry's broadest portfolio, from 64Kb to 64Mb. Cypress's RoHS-compliant MicroPower SRAMs offered in industry-standard packaging options such as: FBGA, VFBGA, SOIC, STSOP, TSOP, TSOP II, PDIP, in industrial temperature range. These SRAMs are appropriate for high-performance, high-battery-life memory solutions.

FIFOS

Cypress delivers FIFO memories in densities ranging from 2Kb to 1Mb which provide ideal solutions to interconnect problems like flow control, rate matching and bus matching. The comprehensive FIFO product line is offered in industry standard packaging such as: TQFP and PL CC. These devices can be easily integrated into new and existing designs to help designers simplify system design and reduce design cycle time. More than 100 types of asynchronous and synchronous FIFO memories are available.

GREENLIANT Parallel Flash Memory

RoHS Compliant This product is RoHS compliant.

27 AND 37 SERIES MTP (MANY-TIME PROGRAMMABLE) PARALLEL FLASH

The 27 & 37 Series of Many-Time Programmable (MTP) low cost flash, based on SuperFlash® technology. The split-gate cell design and thick oxide tunneling injector attain better reliability and manufacturability compared with alternate approaches. These MTP devices can be electrically erased and programmed at least 1000 times using an external programmer with a 12V power supply. They have to be erased prior to programming. These devices conform to JEDEC standard pinouts for byte-wide memories. Designed, manufactured, and tested for a wide spectrum of applications, these devices are offered with an endurance of at least 1000 cycles. Data retention is rated at greater than 100 years. They are suited for applications that require infrequent writes and low power nonvolatile storage. These devices will improve flexibility, efficiency, and performance while matching the low cost in nonvolatile applications that currently use UV-EPROMs, OTPs, and mask ROMs.

Features (GLS27 Series):

- 5.0V Read, 12.0V Program and Erase
- Same package and pin assignments as EPROM/OTP
- For use in cordless phones, VCD players, printers and fax machines where code is frozen and in-system programming is not required

Features (GLS37 Series):

- 2.7-3.6V Read, 12.0V Program and Erase
- Same package and pin assignments as standard flash
- For use in cordless phones, VCD players, printers and fax machines where code is frozen and in-system programming is not required

♦ Surface Mount

PLCC-32

29 SERIES SSF (SMALL-SECTOR FLASH) PARALLEL FLASH

The 29 Series SSF (Small-Sector Flash) devices are suited for applications that require convenient and economical updating of program, configuration, or data memory. For all system applications, they significantly improve performance and reliability, while lowering power consumption. They inherently use less energy during Erase and Program than alternative flash technologies. The total energy consumed is a function of the applied voltage, current, and time of application. Since for any given voltage range, the SuperFlash technology uses less current to program and has a shorter erase time, the total energy consumed during any Erase or Program operation is less than alternative flash technologies. They also improve flexibility while lowering the cost for program, data, and configuration storage applications.

Features (GLS29EE Series):

- 128 byte Sector-Erase
- Sector-by-sector Erase operations
- Byte-by-byte Program operations

Features (GLS29SF/VF Series):

- 128 byte page size
- Page-by-page Write operations
- Page-Write operation includes an internal Erase transparent to the external system

36 SERIES CSF (CONCURRENT SUPER FLASH) PARALLEL FLASH

The 36 Series CSF (Concurrent Super Flash) is a dual-bank flash memory device designed for wireless communication and consumer applications.
The dual-bank architecture supports the Concurrent Read-Write operation where the user may read from one bank while programming or erasing in the other bank.

Features:

- Dual-bank architecture for Concurrent Read-While-Write operations
- Operating voltage: 2.7-3.6V for Read and Write operations
- Hardware top or bottom sector protection
- Flexible Erase capability
- Factory and User programmable security ID
- Erase-Suspend/Erase Resume
- User selectable x8/x16 Data Bus through a BYTE# pin
- Hardware Write protection through WP# pin

85 SERIES SATA FLASH NANDRIVE

The SATA NANDrive™ family extends Greenliant's portfolio of high-performance, fully integrated embedded solid state drives (SSDs). These managed NAND products integrate a Serial ATA controller and one or more NAND flash die in a multi-chip package. A built-in microcontroller and flash file management firmware replace the need for host-side Flash File System (FFS) and Memory Technology Driver (MTD) software. Compatible with the latest generation chipsets, SATA NANDrive products have the same footprint across all capacities for backward compatibility, simplifying system-level board design.

Features:

- Small Form Factor SATA Solid State Drive
- Industry Standard Serial ATA Interface
- Energy Efficient
- Multi-tasking Technology Increases Performance
- Pre-programmed Firmware in Embedded SuperFlash® Memory
- Robust Power Down Data Protection
- Bad Block Management
- Built-in ECC
- Advanced Data Security
- SSD Lifespan Monitoring
- Multiple Densities with Same Pin-out
- Commercial and Industrial Temperatures

COMPACTFLASH CARD CONTROLLER

The GLS55LC200 NAND Controller is the core of a high performance, flash media-based, data storage system. The controller recognizes the control, address, and data signals on the CF bus and translates them into memory accesses for standard NAND-type flash media. Using both Single Level Cell (SLC) and Multi-Level Cell (MLC) flash media, this technology supports solid state mass storage applications by offering new, expanded functionality while enabling smaller, lighter designs with lower power consumption. The NAND Controller supports standard CF protocols with up to PIO Mode-6, Multi-word DMA Mode-4, and Ultra DMA Mode-4 interface. The CF interface is widely used in products such as portable and desktop computers, digital cameras, music players, handheld data collection scanners, PDAs, handy terminals, personal communicators, audio recorders, monitoring devices, and set-top boxes.

Features:

- CompactFlash Association Specification Revision 3.0 standard
- Interface for standard NAND Flash media
- Low current operation
- Power management unit
- Flash Media Interface: Single or Dual 8-bit access
- Supports up to 4 flash media devices per channel
- Supports Single-Level Cell (SLC) or Multi-Level Cell (MLC) media 2K Byte and 4K Byte program page size
- 20-byte unique ID for enhanced security
- Programmable, multitasking NAND interface
- Firmware storage in Embedded SuperFlash®
- Pre-programmed Embedded Firmware
- Built-in Hardware ECC
- Built-in Internal System Clock
- Automatic recognition and initialization of Flash Media devices

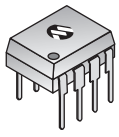
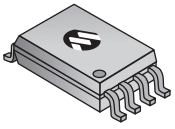
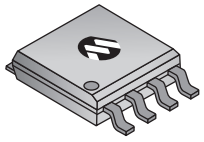
MICROCHIP Serial EEPROMs



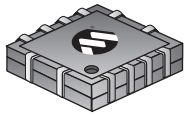
PDIP-8



TSSOP-8



SOIC-8



DFN-8

UNI/O™ BUS SERIAL EEPROM FAMILY

♦ Surface Mount Device

Features: • Can support any data rate from 10kHz to 100kHz • The only 1Kbit, 2Kbit, 4Kbit, and 16Kbit EEPROMs available in SOT-23-3

For quantities greater than listed, call for quote.

MICROWIRE® COMPATIBLE SERIAL EEPROM FAMILY

Features:

- Range of packages including 8MF, 8SM, 8SN, ST, 8MS, and wafer
- Operating temperature of -40°C to +85°C
- Maximum bus speed of 3-10MHz
- AA=1.8-5.5V, LC=2.5-5.5V

34XX02 SERIAL EEPROM

Features:

- Range of packages including PDIP-8, SOIC-8, TSSOP-8, MSOP-8, and DFN-8
- Operating temperature of -40°C to +125°C
- Maximum Clock Frequency: AA = 400kHz, LC = 1MHz
- Operating Voltage Range: AA = 1.7-5.5V, LC = 2.2-5.5V

25 SERIES SERIAL FLASH

♦ Surface Mount Device

SPI Serial Flash is small, low-power flash memory that features Serial Peripheral Interface (SPI) and pin-for-pin compatibility with industry-standard SPI EEPROM devices. Its small footprint reduces ASIIC controller pin-count and packaging costs, saves board space, and keeps system costs down. Lower power consumption than standard flash and fewer wires than parallel flash; SPI Serial Flash is the ideal cost-efficient, data transfer solution. Microchip's CMOS SuperFlash® technology boosts data retention and endurance, reduces erase time and power consumption, making Microchip serial flash ideal for portable designs.

Features:

- Endurance: 100,000 cycles (typical)
- Greater than 100 years data retention
- Fast Sector-Erase or Block-Erase time: 18ms (typical)
- Byte program time: 7uA (typical)
- Active Read Current: 10mA (typical)
- Standby Current: 8uA (typical)

Applications:

- HD DVD
- HDTV
- Bluetooth
- MP3 players
- DSL and cable modems
- Optical disk drives
- Hard disk drives
- PC BIOS
- Printers
- Zigbee
- Wireless LAN
- LCD monitors
- Digital radios
- Set-top boxes

RoHS Compliant

26 SERIES SERIAL FLASH

♦ Surface Mount Device

Microchip's 26 Series boosts performance while maintaining the compact form factor of standard serial devices. Utilizing Serial Quad Interface (SQI) and operating at frequencies reaching 80 MHz, the 26 Series is a perfect choice for Bluetooth headsets, optical disk drives and GPS applications. The 26 Series SQI flash memories are manufactured with Microchip's proprietary, high performance CMOS SuperFlash® Technology, significantly improving performance and reliability while lowering power consumption. For cutting edge designs requiring high bandwidth and compact layout, the 26 Series is an ideal solution.

Features:

- High speed clock frequency: 80MHz Max
- 4-bit multiplexed I/O's with SPI-like serial command structure
- SPI protocol support for Read, High Speed Read and JEDEC ID Read
- Burst Read: 8, 16, 32, 64 byte burst with wrap around
- Index Jump: Reduce number of input clocks for faster data access
- Write Suspend and Resume: Suspend Program or Erase operation
- Individual Block Locking: 64KB blocks with 8x8KB parameter blocks
- Write protection through Block-Protection bits in status register
- One Time Programmable (OTP) 256-bit Secure ID

Applications:

- Bluetooth Headsets
- Optical disk drives
- GPS
- Portable Media Devices
- Digital Video Recorder
- Blu-Ray
- Hard Disk Drives

RoHS Compliant

39 SERIES MPF (MULTI-PURPOSE FLASH) PARALLEL FLASH

♦ Surface Mount Device

The 39 Series MPF (Multi-Purpose Flash) are manufactured with Microchip's proprietary, high performance CMOS SuperFlash® technology. The split-gate cell design and thick oxide tunneling injector attain better reliability and manufacturability compared with alternate approaches. To protect against inadvertent write, they have on-chip hardware and Software Data Protection schemes. Designed, manufactured, and tested for a wide spectrum of applications, these devices are offered with a guaranteed typical endurance of 10,000 cycles. Data retention is rated at greater than 100 years. They are suited for applications that require convenient and economical updating of program, configuration, or data memory. For all system applications, they significantly improve performance and reliability, while lowering power consumption. They inherently use less energy during erase and program than alternative flash technologies. The total energy consumed is a function of the applied voltage, current, and time of application. Since for any given voltage range, the SuperFlash technology uses less current to program and has a shorter erase time, the total energy consumed during any Erase or Program operation is less than alternative flash technologies.

RoHS Compliant

Features:

- 50% smaller than competition's 6mm x 8mm BGA packages
- Industry's smallest 1.8V packages for 8M-bit products
- Thinnest standard flash package in the industry
- Best total-cost solution for price sensitive, fast to market applications
- JEDEC approved packages
- For applications requiring high performance features such as set-top boxes, PDAs, digital cameras and networking equipment

For quantities greater than listed, call for quote.

38 SERIES ADVANCED MPF+ (MULTI-PURPOSE FLASH PLUS) PARALLEL FLASH

♦ **Surface Mount Device**

The 38 Series Advanced MPF+ (Multi-Purpose Flash Plus) is a family of high-performance, parallel flash memories that feature data protection capabilities as well as fast program, erase and read times. These high speed operations enable quick boot times and field updates, resulting in better end-user experiences. These capabilities also provide higher through out in manufacturing lines that use in-system programming of the flash. The data protection features of the Advanced MPF+ family prevent unauthorized data changes, ensuring that content stored on the flash memory is secure. These are ideal for applications that need high performance or require integrity of data and services. Available in standard packages with compatible pinouts, this family of devices also offers the benefits of SuperFlash® technology; high performance, low power and reliability.

Features:

- Page Read
  - 25ns/word (max) page read access time
  - 4-Word page read buffer
- Write-Buffer Programming
  - 2.5µs/word (max) programming time (full buffer)
  - 16-Word write buffer
- Protection/Security
  - 128-bit unique ID
  - 256-Word user programmable SEC ID area
  - Individual block protection
  - Irreversible block lock
  - Boot-block options
- SuperFlash® Technology
  - Endurance, 100,000 cycles (minimum)
  - Greater than 100 years data retention
  - Fast Sector-Erase and Block-Erase time: 25ms (maximum)
  - Low Power

49 SERIES LPC (LOW PIN COUNT) FIRMWARE FLASH/FIRMWARE HUB

♦ **Surface Mount Device**

The 49 Series LPC (Low Pin Count) Firmware Flash/Firmware Hub is a family of flash memories designed for system code and data storage. It complies with the Intel LPC Interface specification supporting multi-byte Firmware Memory and single-byte LPC Memory cycle types. The low pin count interface allows ASIC host controllers to have more free pins resulting in lower overall system costs. These products are ideally suited for embedded systems and processor applications. Available in an array of package and density combinations, this family of devices also offers all the benefits of SuperFlash® technology; high performance, low power and reliability.

Features:

- Intel Support
  - Compliant with Intel low Pin Count (LPC) Interface specification 1.1
  - Compatible with Intel 82802 Firmware Hub (FWH) component
- High Bandwidth
  - Up to 33MHz operating frequency
  - Parallel Programming (PP) for fast production programming
  - Unique features for 16Mbit devices
  - 128-byte burst programming
  - Up to 15.6MB/s data transfer rate
  - Auto Address Increment (AAI)
- Protection Security
  - 256-bit secure ID space
  - Boot block operations
  - Hardware write protection
- SuperFlash® Technology
  - Endurance, 100,000 cycles (minimum)
  - Greater than 100 years data retention
  - Fast Sector-Erase and Block-Erase time: 25ms (maximum)
  - Low Power

CATALYST I2C BUS (2-WIRE) CASCADABLE SERIAL EEPROM

Features:

- 16-Byte Page Write Buffer
- Hardware Write Protection for Entire Memory
- Schmitt Triggers and Noise Suppression Filters on I²C Bus Inputs (SCL and SDA)
- Low Power CMOS Technology
- 1,000,000 Program/Erase Cycles
- 100 Year Data Retention

RoHS Compliant

CATALYST DUAL PORT SERIAL CMOS EEPROM

The CAT24C208 is an 8 kb Dual Port Serial CMOS EEPROM internally organized as 4 segments of 256 bytes each. The CAT24C208 features a 16-byte page write buffer and can be accessed from either of two separate I2C compatible ports, DSP (SDA, SCL) and DDC (SDA, SCL). Arbitration between the two interface ports is automatic and allows the appearance of individual access to the memory from each interface.

Features:

- Supports Standard and Fast I2C Protocol
- 2.5V to 5.5V Supply Voltage Range
- 16-Byte Page Write Buffer
- Schmitt Triggers and Noise Suppression Filters on I2C Bus Inputs
- Low Power CMOS Technology
- 1,000,000 Program/Erase Cycles
- 1 Year Data Retention

RoHS Compliant

CATALYST MICROWIRE BUS (3-WIRE)

These Microwire Serial EEPROMs are configured as either registers of 16 bits (ORG pin at VCC) or 8 bits (ORG pin at GND). Each register can be written (or read) serially by using the DI (or DO) pin. They are manufactured using Catalyst's advanced CMOS EEPROM floating gate technology. The devices are designed to endure 1,000,000 program/erase cycles and has a data retention of 100 years.

Features:

- High speed operation: 1MHz
- Low power CMOS technology
- 1.8 to 6.0 volt operation
- Selectable x8 or x16 memory organization
- Self-timed write cycle with auto-clear
- Hardware and software write protection
- Power-up inadvertent write protection
- 1,000,000 Program/erase cycles
- 100 year data retention
- Sequential read

RoHS Compliant

CATALYST SPI BUS WITH LOW STANDBY CURRENT (MOTOROLA COMPATIBLE)

These SPI Serial CMOS EEPROMs use Catalyst's advanced CMOS Technology that substantially reduces device power requirements. They operate via the SPI bus serial interface and is enabled though a Chip Select (CS). In addition to the Chip Select, the clock input (SCK), data in (SI) and data out (SO) are required to access the device. The HOLD pin may be used to suspend any serial communication without resetting the serial sequence.

Features:

- 10MHz SPI compatible
- 1.8 to 5.5 volt operation
- Hardware and software protection
- Low power CMOS technology
- SPI modes (0,0 & 1,1)
- 1,000,000 program/erase cycles
- 100 year data retention
- Self-timed write cycle
- 16-byte page write buffer
- Block write protection – Protect 1/4, 1/2 or all of EEPROM array

RoHS Compliant

AMD BOOT/UNIFORM MEMORY FLASH

The Spansion F NOR Flash memory family is available in densities of 1 Mb through 32 Mb. Each device requires only a single 5V power supply for read and write functions and is entirely command set compatible with the JEDEC Flash standards. The Spansion F NOR Flash memory is one of the longest-supported Flash memories in the industry.

For quantities greater than listed, call for quote.

MIRRORBIT® ECLIPSE FLASH NON-VOLATILE MEMORY

The Spansion® S29GL01G/512/256/128S are MirrorBit Eclipse flash products fabricated on 65nm process technology. These devices offer a fast page access time as fast as 15 ns with a corresponding random access time as a Write Buffer that allows a maximum of 256 words/512 bytes to be programmed in one programming time than standard programming algorithms. This makes these devices ideal for today's embedded applications that require higher density, better performance and lower power consumption.

For quantities greater than listed, call for quote.

PAGE-MODE INTERFACE FLASH MEMORY

The S29GL-N family of devices are 3.0-Volt single-power Flash memory manufactured using 110nm MirrorBit technology with Page-Mode interface. The S29GL032N is a 32-Mb device organized as 2,097,152 words or 4,194,304 bytes. Depending on the model number, the devices have an 8-bit wide data bus only, 16-bit wide data bus only, or a 16-bit wide data bus that can also function as an 8-bit wide data bus by using the BYTE# input. The devices can be programmed either in the host system or in standard EPROM programmers.
The S29AL032D is a 32-megabit, 3.0 volt-only flash memory device, organized as 2,097,152 words of 16 bits each or 4,194,304 bytes of 8 bits each. Word mode data appears on DQ0-DQ15; byte mode data appears on DQ0-DQ7. The device is designed to be programmed in-system with the standard 3.0 volt VCC supply, and can also be programmed in standard EPROM programmers.

For quantities greater than listed, call for quote.

SERIAL PERIPHERAL INTERFACE (SPI) PRODUCTS

The new 3.0 volt Spansion® S25FL Flash memory family with Serial Interface is designed to reduce costs and dramatically simplify system design of consumer electronics and PC peripherals such as hard disk drives, optical drives, printers, cordless phones, DSL/cable modems, and DVD players and recorders.

DUAL INTERFACE EEPROMS

Dual Interface EEPROMs from STMicroelectronics are an innovative family of memories that provides new features and capabilities. The EEPROM memory bank can be accessed either by a standard I²C interface or by an ISO 15693 RF interface. The ISO 15693 RF interface is based on a passive RFID technology that does not require a battery or power to operate, as it gets both the energy and the data stream from the RF reader.

EVALUATION KITS AND BOARDS

ST provides tools for system designers to help determine the remote operating distance they can expect from the device and the impact of the reader antenna, as well as impact of reader and IC antenna sizes on the overall system performance. They also allow evaluation of interaction of I2C and RF modes, entire memory, partitioning, lock mechanisms and password protection. All tools come with an I²C programmer, an RF reader, two different M24LR64 reference antennas with I²C connector. Connections to host computers are USB based.

ZEROPOWER® NON-VOLATILE RAMS

ZEROPOWER® NVRAMs combine Low Power SRAMs and Automatic Battery Switchover and Write Protect circuits to implement Non-Volatile RAMs. They can be used just like standard SRAMs, but retain their contents when power is removed. Densities range from 16Mbits down to 16Kbits.

For quantities greater than listed, call for quote.

TIMEKEEPER® NON-VOLATILE RAMS

TIMEKEEPER® NVRAMs build on ST's ZEROPOWER® NVRAMs by adding non-volatile Real-Time Clocks. The Automatic Battery Switchover and Write Protect circuits are extended to the RTC section where counter-registers keep track of year, month, day, date, hours, minutes, and seconds. A low-power 32KHz oscillator provides the timing. It is optimized to draw only a tiny amount of current - as low as 40nA - so it adds only a small additional load to the battery. The RTC registers are mapped into the LPSRAM. Eight to 16 bytes of the LPSRAM are replaced by the RTC registers. The day, date, and time are read and written just like RAM locations.

For quantities greater than listed, call for quote.

511-4053	HCF4053BEY	DIP-16	Triple 2-channel Multiplexer			
511-4060	HCF4060BEY	DIP-16	14-stg cntr/drvr & oscillator			
511-4066	HCF4066BEY	DIP-14	Quad bilateral switch			
511-4069U	HCF4069UBEY	DIP-14	Hex inverter			
511-4070	HCF4070BEY	DIP-14	Quad exclusive OR gate			
511-4081	HCF4081BEY	DIP-14	Quad 2-input AND gate			
511-4093	HCF4093BEY	DIP-14	Quad 2-in NAND schmitt trig			
511-4094	HCF4094BEY	DIP-16	8-stg shift-and-store bus reg			
511-4098	HCF4098BEY	DIP-16	Dual monostable multivibrator			
511-4538	HCF4538BEY	DIP-16	Dual precision monostable			
511-4541	HCF4541BEY	DIP-14	Programmable timer			
511-40103	HCF40103BEY	DIP-16	Presettable 8-bit bin dwn cntr			
511-40106	HCF40106BEY	DIP-14	Hex schmitt trigger			

74HCT HIGH SPEED CMOS

For quantities greater than listed, call for quote.

MOUSER STOCK NO.	STM Part No.	Case Type	Description	Price Each 1	10	100
Thru Hole						
511-M74HCT14	M74HCT14B1R	DIP-14	Hex schmitt inverter			

74LVC HIGH PERFORMANCE CMOS

For quantities greater than listed, call for quote.

MOUSER STOCK NO.	STM Part No.	Case Type	Description	Price Each 1	10	100
Thru Hole						
511-74LVC245AT	74LVC245ATTR	TSSOP-20	Octal bus tranceiver			

74LX1G SINGLE GATE LOW VOLTAGE CMOS

For quantities greater than listed, call for quote.

MOUSER STOCK NO.	STM Part No.	Case Type	Description	Price Each 1	10	100
Surface Mount						
511-74LX1G07C	74LX1G07CTR	SOT-323	Single buffer/driver			
511-74LX1G08C	74LX1G08CTR	SOT-323	Single 2-input AND gate			
511-74LX1G14C	74LX1G14CTR	SOT-323	Single schmitt inverter			
511-74LX1G70S	74LX1G70STR	SOT-23-5L	Single buffer			

74V1G SINGLE GATE HIGH SPEED CMOS

For quantities greater than listed, call for quote.

MOUSER STOCK NO.	STM Part No.	Case Type	Description	Price Each 1	10	100
Surface Mount						
511-74V1G02S	74V1G02STR	SOT-23	Single 2-input NOR gate			
511-74V1G04S	74V1G04STR	SOT-23	Single inverter			
511-74V1G08C	74V1G08CTR	SOT-323	Single 2-input AND gate			
511-74V1G08S	74V1G08STR	SOT-23	Single 2-input AND gate			
511-74V1G32C	74V1G32CTR	SOT-323	Single 2-input OR gate			
511-74V1G66S	74V1G66S	SOT-23	Single bilateral switch			

POWER LOGIC (STPIC SERIES)

For quantities greater than listed, call for quote.

MOUSER STOCK NO.	STM Part No.	Case Type	Description	Price Each 1	10	100
Surface Mount						
511-STPIC6C595T	STPIC6C595TTR	SSOP-24	8-bit shift register low

595-CD74HC4053PWR	TSSOP-16	Triple 2-Chann Multiplex		
595-CD74HC4066E	DIP-14	Quad Bilateral Switch		
595-CD74HC4066M96	SOP-14	Quad Bilateral Switch		
595-CD74HC4066PWR	TSSOP-14	Quad Bilateral Switch		
595-CD74HC4067M	SOIC-24	16-Ch Mux/Demux		
595-CD74HC4067SM96	SSOP-24	16-Ch Mux/Demux		
595-CD74HC4316M	SOP-16	Quad Analog Switch		
595-CD74HC4316M96	SOIC-16	Quad Analog Switch		
595-CD74HC4538E	DIP-16	Dual Retriggerable Multivibrator		
595-CD74HC4538M	SOP-16	Dual Retriggerable Multivibrator		
595-CD74HC534E	PDIP-20	Edge-Trigg D-Type Flip-Flop		
595-CD74HC540E	DIP-20	Octal Buff and Line Driver		
595-CD74HC541M	SOIC-20	Octal Non-Inv Buff and Line Driver		
595-CD74HC564E	PDIP-20	Edge-Trigg D-Type Flip-Flop		
595-CD74HC573M96	SOIC-20	Octal Trans Latch		
595-CD74HC574M	SOIC-20	Edge-Trigg D-Type Flip-Flop		
595-CD74HC688PWT	TSSOP-20	8-bit Magnitude Comparator		
595-CD74HC7046AE	PDIP-16	Phase-Locked-Loop		
595-CD74HC7046AM	SOIC-16	Phase-Locked-Loop		
595-CD74HC7266E	PDIP-14	Quad Exclusive-NOR Gate		
595-CD74HC73E	PDIP-14	Edge-Trigg J-K Flip-Flop		
595-CD74HC74E	DIP-14	D-Type Flip-Flop		
595-CD74HC74M	SOIC-14	D-Type Flip-Flop		
595-CD74HC74M96	SOIC-14	D-Type Flip-Flop		
595-CD74HC75E	DIP-16	Dual Bistable Trans Latch		
595-CD74HC75M	SOIC-16	CMOS Dual 2-bit Bistable Latch		
595-CD74HC85E	DIP-16	4-bit Magnitude Comparator		
595-CD74HC86E	DIP-14	Quad 2-Input Exc. OR Gate		
595-CD74HCT00E	DIP-14	Quad NAND Gate		
595-CD74HCT00M	SOP-14	Quad NAND Gate		
595-CD74HCT00M96	SOIC-14	Quad NAND Gate		
595-CD74HCT02E	DIP-14	Quad Two-Input NOR Gate		
595-CD74HCT03M96	SOP-14	Quad NAND Gate		
595-CD74HCT04E	DIP-14	High Speed Hex Inverter		
595-CD74HCT04M	SOP-14	High Speed Hex Inverter		
595-CD74HCT08M	SOIC-14	Quad 2-Input AND Gate		
595-CD74HCT08M96	SOIC-14	Quad 2-Input AND Gate		
595-CD74HCT123E	DIP-16	Dual Monostable Multivibrator		
595-CD74HCT123M	SOP-16	Dual Monostable Multivibrator		
595-CD74HCT125E	DIP-14	Quad Buff		
595-CD74HCT125M	SOIC-14	Quad Buff		
595-CD74HCT132E	DIP-14	Quad NAND Gate		
595-CD74HCT138M96	SOIC-16	3-to-8 Line Decoder/DeMultiplex		
595-CD74HCT139M	SOIC-16	Dual 2-to-4 Line Decoder		
595-CD74HCT14E	DIP-14	Hex Schmitt-Trigg Inverter

IMPACT SENSOR

Features:

- Programmable event recorder internal and external trigger inputs
- Low power operation
- Wake-up and record function
- Peak acceleration sample-and-hold
- Digitally controlled bias correction
- Programmable alarms for condition monitoring
- Programmable digital input/output lines

For quantities greater than listed, call for quote.

TRI-AXIS GYROSCOPE/ACCELEROMETER/MAGNETOMETER

Features:

- Autonomous operation and data collection
- No external configuration commands required
- 220ms start-up time
- 4ms sleep mode recovery time
- Embedded temperature sensor
- Programmable operation and control
- 2000g shock survivability

For quantities greater than listed, call for quote.

AUDIO SAMPLE RATE CONVERTERS

Features:

- Automatically senses sample frequencies
- No programming required
- Atetnuates sample clock jitter
- Input/Output sample ratios from 7.75: to 1:8
- Multiple TDM Daisy-Chain Mode
- Bypass mode

For quantities greater than listed, call for quote.

CABLE EQUALIZER

Features:

- Compensates cables to 200 meters for wideband video
- All resolutions through UXGA
- Fast rise and fall times: 8ns with 2V step@200 meters of UTP cable
- DC output offset adjust
- Compensates both RGB and YPbPr
- Two on-chip comparators with hysteresis
- Low output offset voltage: 24mV

For quantities greater than listed, call for quote.

LVDT Signal Conditioner

Features:
- Single chip solution, contains internal oscillator and voltage reference
- No adjustments required
- Unipolar or bipolar output
- DC output proportional to position

For quantities greater than listed, call for quote.
