Document 1: AI For Product Managers Course Outline.pdf

This document is a brochure for the "AI For Product Managers Course" offered by IvyProSchool, providing details on the course's curriculum, objectives, format, and career benefits. The course aims to equip product managers with AI skills to drive innovation and efficiency in product development and management.

Key Clauses or Issues Identified:

1. *Course Overview:* The course aims to help product managers utilize AI for effective product innovation, incorporating AI strategy, prototyping, workflow automation, and governance.
2. *Curriculum Details:* It outlines specific modules such as AI thinking for product managers, prompt engineering, internal AI systems, rapid AI prototyping, workflow automation, and AI governance.
3. *Career Advancement Opportunities:* The course offers practical career tools, including resume preparation, mock interviews, and industry projects for better job placement.

Missing or Risky Elements:

- *Accreditation Information:* The document does not mention if the course is accredited or recognized by any professional AI or product management bodies.
- *Refund Policy:* Details on whether there is a refund policy for the course fees are not provided.

Ambiguous or Weak Language:

- Course outcomes and benefits are generally described in aspirational terms without concrete metrics or success stories to back them up.

Suggestions for Improvement:

1. *Include Accreditation Details:* Clearly specify if the course has any form of accreditation or recognition which could add value for potential participants.
2. *Outline Refund and Cancellation Policies:* To build trust, provide clear

information about the options available if a participant needs to cancel or withdraw from the course.

Disadvantaged Party:

Potential course enrollees may be disadvantaged due to the lack of transparent refund policies and accreditation details, which could affect their decision-making.

Overall Risk Score:

Moderate — The lack of information about accreditation and refund policies presents a potential risk for prospective students who prioritize these factors.

Final Recommendations:

- Consider including a more detailed description of the practical assignments and projects to better illustrate the hands-on experience participants will gain.
- Clarify the accreditation status of the course for added credibility.
- Clearly outline terms around course refunds and cancellations to reassure prospective students.
- Provide success stories or case studies to illustrate tangible benefits and outcomes of the course.
